

The vertuose booke

Of the distillation of all maner of waters of the herbes in this present Volume expressed with the figures of the stillatozpes to that noble worke belongynge. First made and compyled by the Chierie peres studie and Labour of the most famous and expert master of Physike / Master Hieronimus Brouwerke / in tye Almayne. And nowe of late newly translated into Englyshe out of duche by me Laurence andrew to the synguler / prosyde / helth and cure / of myn eyn crysten in theyr diseases / And in espyrall for them of this noble Kynge of Englonde my natyve Contrey. We shall vnderstande that the great Master Auyenna testifieth in his fourth Canon that the waters be farre better than the Herbes in theyr Operacions.

After dyuers & sondry small volumes & tryfles of myrthe
& pastauice / Som newly composed / Som newly transla-
ted & of late synysshed. Now mynyded to exercise my pen
in mater to the reder moze profytable / I haue chosen a-
monge all other the boke of dytillacyō of waters / wry-
ten by the .xxx. yere labour of master Jerom byrmdwyl /
To translate into Englyshe. Nat thynkyng (thoughe
pauūture com in that part wyll take it) that my know-
lege in these two tongues is such that I of all other to this Translacyon
sholde be mozte mete / but only beyng moued with naturall loue vnto my
contre / which surely sholde wante no profytable boke for lacke of a Tran-
slatour yf I were able to perfoyme it / that is in any other language wry-
ten. for me thynke where the maysters in all science experte wyll take no
such paynes / It is nat dyscomendable for a man of base lernynge to put
to his helpynge hande. It is an olde sayng / thought power often dothe
fayle / I wyllynge harte is to be accepted. The whyche ones well remem-
bered. Spare nat fauozable reder to peruse & reuolue to thy synguler helth
conforte / & lernynge / this boke of dytillacyō. Lerne the hygh & meruelous
vertue of Herbes / knowe howe inestimable a pfectuarie to the helthe
of man god hath prouyded growynge every day at our hande / vse the ef-
fectes with reuerence / and geue thanks to thy maker celestyal. & holde
how moche it excedeth to vse medycyn of esycacy naturall by god ordey-
ned than wycked wordes or charmes of esycacy vnnaturall by the deuyl
inuented / whyche yf thou doste well marke / thou shalt haue occasyon to
geue the moze louynges & prayse to our sauoure / by redynge this boke &
knotolegyng his benyfytes innumerable / To whose prayse and helthe
of all my chrysten byzethern / I haue taken vpon me this synple Transla-
cyon / with all humble reuerēce / euer redy to submyt me to the correccyon
of the lerned Reder.

¶ Eternal lord / of thy great benyngnyte
Thy seuensolde spyte / wytsake to enclyne
And the drowpes mellefluose / of thy deyte
Robly sende from hygh / my wyttes tenlumyne
I call to mary also. that glozious vyrgyne
Regarde that she wyll take / at my petycon
This boke thus begon / to haue a good concludon

These be the chapters of the second parte of the fyrst booke in the whiche chapters ye shall fynde the manner and science of distyllacions.

The fyrst chapter of the fyrst booke sheweth what distyllynge is.

The seconde chapter is wherfore distyllynge is founde

The thyrde in howe many maners ye may distyll.

The fourth what instrumentes belong vnto this worke.

The fyfte chapter sheweth howe the stoness/the luteum or lome shall be made belongynge to this worke.

The syxte howe the foynayle shall be made belongynge to this worke.

The vii. howe the instrumentys shall be ordred/and the water kepte after the distyllacion.

The viii. howe ye shall distyll per filtrum / named per filtra distillacionem / that is a fyte.

The nynthe howe that ye shall distyll in the sonne.

The tenth howe to distyll in bzede in the ouen.

The leuenth to distyll in horse dosige.

The twelfth to distyll in an ante hyll amonge pyrmets.

The thyrtyenthe to distyll in warine water/named in latyn/ distillacio per Balneo Marie.

The fourtenthe for to distyll in water myxed with horse downge / named in latyn/ distillacio per ventrem equinum.

The. xv. for to distyll in asshes/named distillacio per cinerem.

The. xvi. to distyll in sande.

The seuententhe to distyll frely in the wynde ouyn / or foynayle/named distillacio per ignem.

The. xviii. to distyll in the comon stylatoryes.

The nyntenthe to distyll in generall eche accordynge to his nature.

The. xx. to distyll at all seasons byr herbes/flowres/rotes/or sede/whan the grene can nat be gotten

The one and twenty chapter sheweth howe the waters shall be rectified after theyr distyllacions.

The two and twenty howe the waters shall be kepte.

The thre and twenty howe longe they may abyde/and be kepte good.

There after foloweth the table of the names of the herbes.

¶ Here syneth the table of this pte-
sente boke, and here after folo-
weth the fyfte parte of the
same volume.

Here begynneth the fyrst part of this booke/wherin is comprehended the noble science & the trewe distyllacions of waters/and other dyuers thynges artynycallys.

The fyrst chapter sheweth what distyllacion is. Ca. i.

In the fyrst it is nedfull to be expessed and shewed what distyllinge is/ for it belongeth to all maner of people to vnderstande and to knowe the cause of that thyng that they begynne or enterpryse to worke vpon/ to the entente that he may haue a persyte knowlege of suche workes as he begynneth/ how he may byynge it to a good ende. Wherefoze it is to be vnderstande that distyllinge is none other thyng but onely a purgynge of the grosse frome the subtyll/ & the subtyll frome the grosse/ eche seperatly from other/ & to the entent that the corruptyble shalbe made incorruptyble/ and to make the mater pail vnmaterpail/ & the quicke spyryte to be made moze quicke/ because it shold the soner perce & passe thugh by the vertu of his great goodnes and strengthe that there in is sonke and hyd for the conceyning of his helthfull operacyon in the body of man/ for distyllacion is an elementall thyng/ for thugh the mouyng of the naturall heupnes/ every one must be naturally gouerned by the bodies aboue/ lyke wyse y body of man thugh an experte maister in medecyne/ and thughe the waters that there ben deuyned from the grossenes of the herbes ethe in his sub

stance/ & that to be conuered to the place most nedfull for helthe & confort/ lyke as hereafter moze dylygently shalbe declared.

Wherefoze distyllinge is founde and ordeyned. Ca. ii.

Distyllinge is necessarily founde & ordeyned for many maner of necessyties/ and specially for the loue of man hym for to bepe in helth & strenthe and to byynge the seke and weake body agayne to helthe/ and to the entent that the grosse and corruptyble body may be agayn clenfed and purgfyed/ for who so euer taketh herbes/ rotes/ or other substaunces and stampe them/ the iure ther of strayned & myxstred is not syghtly whiche many one therfoze doth them abhorre/ because of the inconuenient syght. Secundarely with waters distyllid/ al maner of confectiones/ syropes/ pouders and electuaries be myxced to the entent that they sholde be the moze syghtly and doulcet to be ministred/ receued & vsed. Also this distylling is ouely founde for the comon people that dwell farre from medecyns & physycions/ & for the that ben not able to pay for costly medecyns the whiche hath moued me greatly this my lytell worke to open and dysclose for the helthe and prosperyte of myne euen chrysten. ¶ Thyzdely. The distyllinge is ordeyned/ bycause that to han any medecyne is myxstred with her corpus or substance in the maner of electuaries/ confectiones/ pouders or syrops/ or any medecynes with styngs or swalowynge downe/ or drynynge/ or in what maner so euer it be/ is a p

dus in the body becauſe of her ſubſtance
 of the whiche Auteenna wyrteth in the
 begynnyng of the fourth Cano/wher
 as he thurgh the lernynge of ypoctas
 ſayth/that euery medycyne that is vſed
 with her ſubſtance/ſebleth and maketh
 aged and weke/for the whiche ypoctas
 Meſue/Arnolbus de villa noue & ma-
 ny other moze haue ſoude the noble ſe-
 pence to ſeperate the groſſe and erthy ſub-
 ſtance from the ſubtyll thurgh his ope-
 racyon / that is named the handworke
 of diſtillacyon thurgh the Alembike oz
 oz helme/ & other instrumentis as here-
 aft ſoloweth & to you ſhall be ſhewyd.

**In how many maners may be diſtill-
 ed** Capitulo.iii.

It is nedefull with ſhorte conclu-
 ſyon to ſhewe the moſte experte &
 comon oz lyghteſt way of diſtillynge to
 the entent that the reder oz lerner ſhoulde
 vnderſtande me without any murmur-
 racyon oz longe reherſynge / wherfoze
 I haue taken two maners of wayes/
 wherin is cōprehēded in bzeſe the ſhoz-
 teſt waye of diſtillacyon. ¶ The fyrſt is
 how it may be done in .v. maner wayes
 without any coſt. ¶ The ſeconde waye
 with coſte onely of fyre/ and that alſo
 in .v. maners. ¶ The firſt without coſte
 is done thurgh a thre cornered ſylt/na-
 med per filtru diſtillationem. ¶ The ſe-
 conde maner of the fyrſt way is this. A
 glaſſe fylled vpon another glaſſe turned
 with the bothome vpwarde/and well

ſtopped/ſet oz ſo hanged in the ſonne/ is
 named per ſolis diſtillationem. The thyrde
 of the fyrſt waye is. A glaſſe fylled and
 well ſtopped wroughte in doughte and
 ſo ſet in the ouen whan the bzede is ba-
 kyng/ is named than per panis diſtilla-
 tionem. The fourth maner of the fyrſt
 waye / is a glaſ the thyrde parte fylled
 well ſtopped & buryed in hoꝝe dozwinge
 named per ſini equi diſtillationem. The
 fyfthe maner of the fyrſt waye/ is a glaſſe
 fylled well ſtopped buryed in an ſtepyll
 named per ſormice diſtillationem. ¶ The
 fyrſt maner of the ſecond way is of the
 dyſtillynge with fyre/as thus. A glaſ
 reaſonably fylled ſet in water/ vnder it
 a fyre made/ & there vppō an helme/ oz
 alembike ſet/named diſtillacio per bal-
 neum marie/oz diſtillacio i duplo baſe
 The ſecond maner of the ſecond way is
 ye ſhall put to the ſame water that the
 glaſ ſtādeth in/hoꝝe dozwinge/ thā ſhal
 it be named/ diſtillacio per ventru equi
 num. The thyrde maner of the ſeconde
 way is. Set your glaſ i a capel where
 as ſifted aſhes be in/named diſtillacio
 per cineres. The fourth maner of the ſe-
 cond way is/ye ſhal put ſāde for aſhes
 in the chapell where/as the glaſ ſhall
 ſtāde i/ is called diſtillacio p arenā. The
 fyfthe maner of the ſeconde wayes is/ye
 ſhall ſet boldly the glaſ vpon the fyre/
 and nothyng betwene the fyre & it/put
 onely an yron grate oz an yron ſcyuet/
 named diſtillacio per ignem Thus ye
 haue the maner of two wayes of dyſtill-
 lacions. How be it many moze maners
 there be to dyſtill/wayes out of/ nom-
 bre wherof the alchymiſtes aparte can
 teſtyfyre/ & is to them well be knowen/

whiche is no nede to be reherſed.

¶ What instrumentes be necessary
or nedefull vnto this worke.

¶ After the reherſals of the diſtillacy-
ons aforeſayde nowe it is behouſfull to
knowe the instrumentes therunto belon-
gynge/whiche as mygh as god wyl geue
me grace/ in ſhorte concluſyon I wyl
to you declare them/ to the entente that
the operacyon of diſtillacyon may be ac-
compliſhed/ and openly ſhewed in ſy-
gures as herafter ſoloweth. Becauſe it
may be knowen to all maner of people
I ſhall make herof as thus. the fyrſt re-
herſall.

¶ Ye muſt haue thre cornerde whyte ſyl-
tes ſyke ſyltes of hattes/claye/ or ſome/
byrke/baken & onbaken. After that yron
grates/ a ſquare ſynger thycke/ made
rounde or ſquare as this ſygure ſheweth.

¶ After that ye muſt haue cappelles of
whyte claye/ ſuche as the goldeſmythes
crowſybles be made of ſome leded and
ſome nat leded/ commonly halfe a yerde
wyde and depe/ or moze or leſſe as it be-
houeth/ accordynge to the proportion of
the fornace. And the cappelles be made
after this maner in ſygures ſolowynge.

¶ After that ye muſt haue copet bettels
or copper cappelles beynge in quantyte
halfe a yerde of wydenesse and depthe
with a pype of copet beynge a quarter
& halfe a yerde of lengthe/ & it ſhal haue
within two ſynger brede of the border
or edge of the bettell as this ſygure ſhe-
weth/ for to diſtelle in balneo marie/ or
in beſtre equino/ as here after I ſhall
to you moze expreſſely declare.

¶ Than muſt ye haue leden places tho-
row perſed in the myddell/ with foure
rounde rynges about it/ great & ſmall
lyghte and heavy. The myddell bare of .x.
pounde weght. The ſmall of viij. pound
The greateſt of all .x. or .xij. pounde/ as

this figure folowynge shewith. Also ye must haue bordes as brode and long as the cappell or soynaple is / in suche manner þ the glasse may stande in the myddylmost hole / to the intent that the glasse fall nat one way or other thugh the heuynes of the anhangynge of the ledys in the byndynge therto / whan ye shall dy styll in balneo marie.

¶ After that ye must haue helmes made of whyte clare / suche as befoze is specified / a ledd without and within / or els they must be copper / tynne or lede of the facyon hereafter folowynge.

¶ Under that ye must haue pānys acorbyng to the quantity / mode of crusblerthe glased or ledyd without & within or els made of copper / tyn / or lede acorbyng to your power. After that ye must haue glasses or spoles named Circuyp of such facyon as this figure shewith. And they must be made of venys glasse. because they sholde the better withstand the hete of the fyze.

¶ Also ye must haue glassis or spoles þ ye may to helme eche vpon other / of such the facyon as here is shewed / to distylle therwith in the sonne as moze expressly in the ix. chapter shall apere.

Ye muste haue also crooked glasses named retorte/ and also glasses wpth two armes named pellycane/ falyconed as thys fygure shewyth.

After that ye must haue blide helmes of glasse lyke a gorde tourned in to an other glas without any pipe/ named alembicu circum. And glasses that be toppe above and beneth and narowe in the myddest named circulatorii as here is fygured for to putryfy & degesse therein as here after moze playnly is expressed.

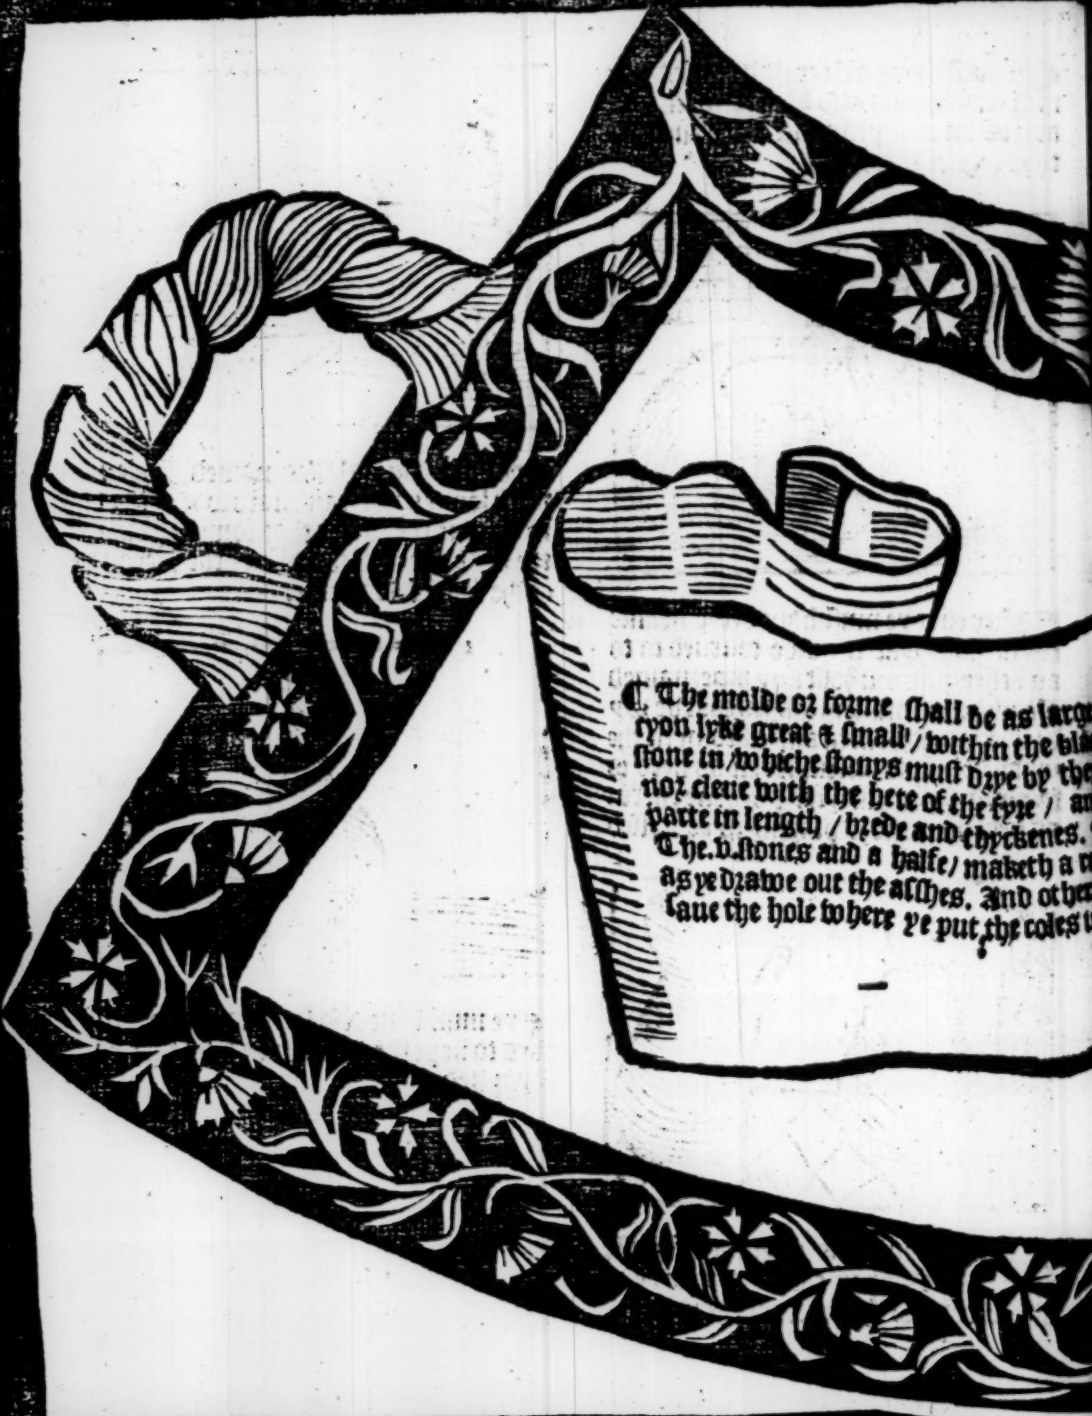

After þ ye must haue helmes of glasse with longe pypes called alembike of alembicum as this picture shewyth

Ye must haue glasses named fyles with longeneckes and narow mouthes to receyue the water that cometh frome the pype of the alembike of the falycon of the same folowynge.

Ye must haue also stone cannes or cokes to kepe the waters in afire they be destilled.

The molde or forme shall be as large
as you like great & small / within the block
stone in / so hiche stonys must dye by the
not cleue with the hete of the fyre / and
parte in length / brede and thychenes.
The .v. stones and a halfe / maketh a row
as ye drawe out the attches. And other
save the hole to here ye put the coles in

within as this picture is in every condy
picke is the instrument to facyon the
rode / bycause the ouyn shold nat tye
he dye they shal mynythe the thez
es maketh a rounde laye to the dyen.
to the wynde hole of the foways where
and a halfe clofeth an other rounde lay
ake the fowayte.

How ye shoulde make the stones/
claye/oz lutum/that belongeth to
these workes. Cap.v.

By the grace of almyghty god to
you shall be declared the hande-
worke of this here after folowynge/the
whiche ye be desyrous to accomplishe.
Fyrst to forme oz make your stone that
ye shal make your forneys of/itis of ne-
cessyte that ye shold haue an instrument
of yro oz nut tre/oz pere tre wode of. vii
punches of thyckenes. Also ye must haue
good erthe neither to fat nor to leane/
well purfied from all vnclenes and
tempered with water. Also it must be be-
ten and troden to gyder/till it be tempe-
rate and of maner lyke ware oz dowgh.
the forme must be threst in water oz ma-
de wet layd in sande vpon a bozde and
therin ye shal put of your forsayd clay.
If there be to moche ye shall stryke it of
with a wette hande/than ye shall lyfte
bp your instrumet by the ears & knock
vpon it on an other bozde/thā the stone
shall fall out. And the instrument is as
the precedent pecture sheweth. And in
this maner ye may make as many & as
few stones as ye wyll and set them in
the ayze in a shadowy place/oz hye in
your house till they be drye. Also ye
may take yron synders smal betē to pou-
der the. vii. yte therof as moche as clay/
thā the stones become as harde as yron
in the fyze. Or els bere your instrument
to the tyle maker and cause hym to
make as many as ye nede. Whā ye haue
your stones it is nedefull for you to tem-
pre your lome oz claye for your fornays
in suche maner that he do not ryue nor

clene/nat onely your fornays/ but also
the instrumentes of copper/yron & glas
oz erthen/to be stryken oz lute thē ther-
with at all tymes requysyte.

Fyrst ye must haue a tounge purfied
claye at the potters well be knowen/
how here/stockes/oz hozs tozdes/beten
with a lytle wāde till euery here be lose
from an other/than shal they be chopped
small and tempered with the claye/so
moche that it bere the thygde part of the
claye/and it is best that ye reper it with
salte water/to the entent that the claye
doth not ryue with the fyze. For no ma-
ner cappels/pannes/oz glasses/that be
lutyd therewith thre oz foure tymes ouer
and let it drye by hym selfe. If ye wyll
make a lome oz claye to enoynte youre
glasses oz fyoles/ye must take pure clay
oz lome/and put it in a tubbe oz payle
oz other close vessell/and cast wyne v-
pon it and myrre it with hozse tozdes
and with smalle shyues oz herdes of
flarce lyke thycke pappe/and therewith
enoynte oz ouer stryke your glasses oz
fyoles and let them so drye by them selfe
in the shadowe. If ye wyll that no ma-
ner of stones shall ryue rente nor burst
asonder thughe the hete of the fyze/thā
temper your lome with dyspyled water
of nettles/and enoynt oz washe there-
with your stones. Also that no maner of
lynen clothe burne with the fyze that
your glasses shall be luted with/whan
the one is welhmed on the other/take
your lynen clouthe and depe it well in
salte water and than let it drye by hym
self. After that wet it in the tohyte of an
egge well beten/& let it drye agayn by
hym selfe. Whan you wyl lute any thyng

ges what so ever they be/enoynt it well
with fyne clay tempered as is before spe-
cified. Nota a lutyng for a glas that ry-
ueth vpon the fyre/take red lede a halfe
as moche vnsleked fyne beten to pow-
der and a lytell mele dust of the myles/
temper all this togyder with the wyhte
of an egge/ and make a lynnyn cloute
wet therin/than holde it a lytell by the
fyre tyll it be warme/a so ordred lay it
to the ryue of the glas standenge vpon
the fyre/ye must beware that no maner
of coide thyng toweche your glasse the
wyhle that it is hotte/for that wyll make
it to rente and bryke asunder.

Thus shall ye make Intum sapientie
as Arnolbus de villa noua sayth wher-
with ye shall lute all maner of glasses/
to the entente that the fyre shal not pe-
rythe or hurt it. Take two partes of
well purged lome or claye/a one yre
of horse forde cleue/gadered as before
is sayd. And to the entent that the claye
shall be the stronger/and nat rente nor
cleue. Tha put thereto the powder of tye
stones or els powder of vnsleked fyne/
all this lute with salt water well myx-
ed togeder with your handes in a ma-
ner of thyn doughe/a so occupied.

Thus haue I shewed you diuers ma-
nes and wayes of lutyng/ and how to
be ordred. Of that ye desire any more
knowledge therof/ye may enuyse that
of the skynnyng.

Howe ye shal make the comon fornays
that belongeth to this woike

A diuers maners a fornay these
fornayes be made/therefore by the
helpe of almyghty god. I shal shew you
the most comon a redy wayes her to be
desull a most necessary/a leue the other
vnsleked/ because I wyll reuiewe the
tedynousnes of the readers/a the letters
of the skynnyng/ to that copylling of our

for named workes my purpose is to
shew you. in maner of wayes / and every
way in dyuers maner of formes / as her
after playnly to you shall be exprest.
¶ The fyrst waye of these fornayses or
stillatores that be comunly used ben
named rose garlandes or helmettes. In
other maner there is to be made forna-
yses or stillatores hauyng many maner
of facyons. The first is to be shewed of
the fornayses that ben well beknownen
amonge the potters made of erthe ledd
or glased / of facyon lyke the figure here
before / and it may be remeupd from the
one place to another

¶ How ye shall distyll in sande / named
distillacio per arenam.

This chapter is ordered in euery
condycion lyke as the chaptre
spekyng of the distyllinge in the ashes
saue only the glasses nede to be better /
as venys glasse is thereto best / and also
the glasses must be strongly luted / and
for passhes ye must take pure systed sade
and as ye tell one / two / thre by the clocke
so softly must your dzoppys fall alwaye /
and thus ye must orde your selfe yf ye
woyll haue the trewe way of distyllacyō
for it is the hvest degre in heet of all dy-
stillacions / wherfore take hede that ye
make nat to sharpe a fyre / for yf ye do
your waters woyll brenne and stube /
and your glasses woyll brest. Also ye shal
nedir distyll four herbes so dye out of
all moysture in the ashes or the sand as
ye may do in balneo marie / or in ven-
equino. for in balneo marie or in ven-

tre equino / they can neuer be out stilled
so dye that they can ben / synke or take
harme. But in ashes / and specially in
sande / for therein at the ende comonly they
brenne / therfore take hede to the extent
that ye may the better optayne poure
purpose.

¶ A other fornaise ye maye make
after the facyon of the great figure
with two / thre / or four helmes / that be
all hete with one fyre / and i euery helme
a sondry water distyllinge / But that for-
naise may nat be remeupd / and therfor
ye must take hede in what place ye set it
in that there come no seache therof / and
that shall ye make in this maner / fyrste
make the herth as lōge and bōde as ye
woyll which shalbe the fote or fundamet
of the fornaise wher as the ashes shall
fall on / & than lay two layes of stones
on heighe aboue it that it may be holow
in the myddest aboue the holow place ye
shall laye rounde or square yron barres
euery barre a great ynche of thychenes
and they must be layde an ynche from
eche other as before is figured / and
aboute the greddyron or yron barres
ye shall make up your fornaise alwaye
the longer the wyder within / of a fote
hye / & within it shall be enoynted with
the lome or clay tempered with salt wat-
thereto prepared as is before sayd / and
the uppermost parte ye shall laye two
stronge yron barres. but ynches from
eche other well enoynted woth the for-
sayd barres shall be layde a great yron
plate metely thicke / woth a hole in the
myddest / for to cast the cooles thozough

but
hol
pla
for
the
mo
my
left
wo
say
tes
bel

vnder the plate shalbe made four round
 holes/for to let the smoke oute/and the
 plate shalbe enoynted as the barres be-
 fore specyfyed well thicke/ and aboue
 the plate the foznays shall be repled all
 moche halfe a stone thynnes/and in the
 myddeste of the foznays a hole shall be
 left euen iust aboue the hole of the plate
 where the coles be cast thrygh. vpon the
 sayd plate shall be left foure brode pyt-
 tes accordynge to the quantyte of your
 helmes. In the whyche pyttes ye shall

put o2 strewe fyne sifted ashes o2 sande
 of two ynches hye. in the whiche ye shall
 set your pannes of erthe/ coppe/ o2 lede/
 but the leden pannes may not well abyde
 by the fyre without meltynge. excepte
 ye make very small fyre vnder it/ vpon
 such pannes be set the dyllatozres named
 helinets o2 rose garlandes here before
 reherced & fygured. And to euery smoke
 hole/ye shall make a plogge o2 rappe to
 gouerne your fyre with/ great o2 small
 as it is nedefull.

Therafter foloweth of an other maner of distyllacyons/as here is fygured.

Can you wyll make a stillatozre
 than lay vpon therthe v. stones
 in maner of a ryng/which fastyō
 of stone standeth fygured in the v. chap
 ter/the syrt stone shall be dreyded in .ii.
 than the mouth of the forneys abydeth
 oppn/than lay vpon the next lay .vi. sto
 nes couched mason wyse/than enoynt
 it without and withen with suche claye
 as before is sayd of/than lay the grate
 of yron barres ouer it/and lay agayn .vi.
 stones vpon it/and vpo that/lay agayne
 .vi. stones / vpon these .vi. lay agayn v.
 & a halfe / & than abydeth the hole oppn
 to put colys in/& se that it be alway wel

luted or enoynted as is before sayd/than
 laye agayn .vi. stones to close the mouth
 aboue/than haue ye two holes/ one for
 to drawe out the ashes/the other to put
 in the coles/than laye agayne .vi. stones
 well lutyd alway/thā lay vpo it a roude
 ryngc lyke a tryuet/athat must be very
 well luted with the clay before sayd. vpo
 the tryuet of yron/ye shall sette an erthen
 cappell as before is sayd/ & that wel lu
 tyd/than ye shall hyghen your formayle
 so longe tyll he be as hye as the cappell
 in suche maner that he haue foure wynd
 holys of smoke holys aboue/made iuste
 to the Capell with foure erthen tappes
 to gouerne the fyre/ye shall strew cytred
 ashes/or sande in the cappell/& therin
 set your glasses / & the ashes or sande
 shall be foure ynches thicke strewed.

If you desyre to make a formayle
 of stillatozre named balneo Marie than
 take for the erthen cappell a copper cap
 pell or kettill with a copper pyre as be
 fore is fygured/& that well luted/& sette
 the pyre before ouer the furnayse lest the
 wat fortune to sethe as yf it sholde rōne
 ouer/than shall it rōne thugh the pyre
 without hurtynge of the furnase In su
 che copper kettill or cappell shalbe none
 ashes nor sande for it burneth lyghtly
 but ye may put therin horse tozdes/ for
 to be distyllled in ventre equino.

Also there be other formayles made
 with a longe hye pyre i the myddst with
 thre or four cappells about / and there is
 a grate of yron vnderneath the lōge pyre
 aboue the hole toher as the ashes be dra
 wen/& haue holis seuerally vnder euery
 cappell haupnge a sondry formayle pen

dyng to the sayd longe pype / & euerie
cappell hath a smoke or wynde hole to
gyue thynge it a feuerall hete to euerie
cappell / & that to draw to his registryer /
And thus ye may hete your cappelles
seuerally / or all in generall / the longe
pype stadyng in the myddell shalbe fyl
led with coles / and it shalbe well closed

about / that non ayre com out / than the
fyre breneth only vpon the yron grate /
ye may make this pype as hie and as
lowe as shall please you / and kepe the
fyre with stoppynge of the wynde holes
about and benethe / as nedde requyret
with .xiii. or .xiiii. tappes / & this formayle
is made as here is fygured.

31.

How ye shal order or prepare your
instrumētes where as your waters
shalbe dystilled & kept. ca.vii:

After the preparacyon of your forney
ses/it is nedefull to you and expedyent
to make and prepare your instrumen-
tys and your vessels to kepe your wa-
ter in after that they be dystilled/& so
may ye well accomplishe this noble
practyse and former enterpryse. **A**gain
whan ye wyll dystille in glasses let in
ashes or sande/it is necessary for you to
ouer lute them more than halfe the part
of the glasse with the fornamed lome or
claye/but they that be occupied in bal-
neo marie nede not to be luted/& suche
glasses be named cucurbite & þ best glas
thereto belongynge be made of bohemy
glas or of the great rōude shyues of ve-
nys glas/& such curbytus be not only
made of glas but also of crusbyle ethe
well glased withyn/some be made of co-
per/lede/or tynne. The tynnen be occup-
ed in balneo marie/and copperen bene
often tymes luted and so set in the fyre
The copperē be sōtyme occupied in bal-
neo marie also. Sōmtym they be set in
ashes or sande/and they must be luted
more than the two other partes. Whan
ye wyll put any thyng in glasse or in
any other instrumētes/of what nature
so euer the substance be/wet your cloth
in your lutum or claye/and wynde your
glasses therein twyes or thryes rounde
about. And whan ye wyll dystyll oyle
or any such lyke/thā ye must enoynte it

with your forsayd lutum two ynches
thyeke/yet it wyll scantly holde. For
the oyle wyll often tymes perlethruge
out /therfore ye must take hede to your
lutū or claye/yf you wyll kepe your wa-
ters wel after the dystyllacyons ye must
take a stone Cruke / But yf ye can
not gette suche as ye desyre / Than ta-
ke an erthen canne and sette it in an
ouen whan the brede is drawen/whan
it is through warme/than put in it mol-
ten waxe/and stre that rounde aboute
that the waxe maye cleue to euery place
thā tourne it with the bottom upward
and pure out of the waxe/than enoynte
the canne without with a wollen clothe
full of molten talowe/than set it agay-
ne lytyll within the ouen than the wate
and the talowe soketh in to the canne.
And whan it is colde than putte thy wa-
ter therein and stoppe the mōthe ther-
of with a woden tappe and with wa-
re / and hange on the cruke in a small
byll the name of your water / and what
tyme it is dystilled

How ye shall distill through a fyte na-
med per saccum distillacio. C. a. viii.

If ye to distill all maner of sapoure
or other watery moystours through
a fyte/as water/wyne/or other liquore
of sape/wher ye will purifye from all
troublous & vnclere substances/for ye
can distill no maner of harde thynges
through a fyte/as herbes/rotes/or frag-
res because of theyr hardnes/wherfore
ye must haue .x. or .xii. fytes pure & whyte
beringe .iii. square & a fote of length & .viii.
ynches of bryde & the sapour to be distoured
shalbe done in an earthen panne well re-
bedd within and the panne shalbe set v-
pon a hye stayes/wher the panne shalbe
somewhat lentyng to wher shal lay the
broadest ende of the fyte & the smallest
ende shall hangge in a glasse or in a no-
ther panne that shall stande vpon the
nexte steppe of the stayes downwarde
& in the sayd vndermoste panne shalbe
a fyle layd as it was in the fyte alway
the panne helyngge downwarde & the
fyte with the smallest ende hanggyng
downwarde in an other panne and so
forth doyngge with as many fytes & as
often as ye will. Nowhan your fytes be
ouerladen & stopped with the vnclenes
that therin is sowked by the distillacio
ye shall washe theym in fayre waters
till they be purifyed of theyr vnclenes
than ye shall drye them agayne & laye
the in the pane as they were before. In
this maner ye may distill .x. or .xii. times
in a day with one labour/till the sub-
stance be purely claryfied from al vncl-
nes. And this is pryncypally good for
the waters that be distilled with fyte

for to rectifye them herewith in the
fours & this is the fyte maner to dy-
still without fyte. C. i. to be edd downe

How ye shall distill in the forme na-
med per solis distillationem. C. a. ix.

The second maner to distill with-
out fyte which may be don woth
our fyte as thus. ye shall take a glasse
that shall be almost as wyde above as
beneathe named an vernall/or fyle that
figure aboute. The two partes of this
glas shalbe fylled with blossom of flow-
res/as roses/brookes/or other bloo-
mes/or suche lyke that shal ye make a
small crosse of wooden styches and laye
that vpon the mouth of the glas to make
an other crosse of wooden styches some-
what longer than the other that may be
bene crosse wyse ouer the other styche
within the glasse to make the both sure
than to tyme the mouth of the glas down-
warde vpon the mouth of suche and
other glas that the mouth of it may be
somewhat within the fyll glas that lute
therin well to gyder that there come no
ayre out than hangge them in the hottest
b. ii.

of the son the glas with the floures by
warde. So distylleth your substance
thugh the hete of the sonne out of the
vppermost glas into the vndermoste.

How ye shall distyll in hote bred with
in an ouyn/named per panis distillati-
onem.

Thus shall ye distyll in an ouyn.
Take a flatte flacon or bottell of
glas/a put it full of roses or other flou-
res/or other blossom/or yppimer eggys.
than stoppe the glasse fast with a woden
stoppell/and couer the glas ouer all/as
yf it were a loof and put it in the ouyn
whan ye put other brede therin & drawe
it out agayn with the same brede whan
it is baken/and let it cole by hyt selfe &
whan the brede is colde / than breke it
softly of / saupnge the glas frome bre-
kyng/ than pull out the stoppell/ & put
it in another luche glasse / & order it as
the other glasse was/so often tyll it be
ynough.

Of it be nat than pure & cleue ynough
ye may distyll it per fultrum yf ye wyll.
And these two maners be very good to
distyll of floures / the waters serupnge
for the yen.

How ye shall distyll in hors doynge
named per simu Equoru distillacio.

Capitulo. xi.

Take a glasse lyke a horde named
in latyn cucumer/on it a blynde
helme. Or els take a glas that is small
in the myddle / & great benethe and also
aboue / named in latyn Circulatorium/
lyke as these glasses here be figured.

Distyll the thyrde parte of this glas with
what maner of floures that ye wyll and
stop that glas wel with a wode stoppell
and ouer lute it well / than put the glas
in warme hors doynge / whiche hors
doynge must lay in a wodyn vessel chest
wyse wel stopped and couered/and ther
in it must lay a moneth or lenger / and
also this hors doynge must be renewed
euery foftenyght/after that drawe oute
the tappe softly/ than purifye the cleuest
of in an other glas named a pellycane
whiche before is figured or in an other/
wherof there be twayne as here is figu-
red/the one in the other.

This glas oz the pelycan shall be well lutyd and also sette in the hofse dounge as before is sayde/ Than this lycour oz water wyll ronne vp and downe from the one glas in the other. Thā becometh it sayze/ & of great operacyon. Thus be also other cosely waters rectifyed/ as aurum potabile/ aqua vite/ and other waters/ for with the great ronnynge vp & downe in the pelycane it is rectifyed and amended. Thus ye haue the fourth maner of dystyllacyon without fyre.

How ye shall dystyll in a pelymer hyl named p fornice distillationem. Ca. xii.

The .v. maner is thus. fyll a glas full of flours/ of what maner of floures ye wyll/ and stopp'd in the maner aforesayd/ than bury it in a pelymer hylle/ that some call an antehyll where as many of them be/ fourten dayes or more/ as nede requyrez.

Than take out the glas agayn/ & poure out the clearest about therof in so another glasse and hange it in the sonne/ or put it in a pelycane in hofse dounge to rectify it as is aforesayd/ than it shall be pure & sayze. In this maner is wyne put into a glas/ & set in a pelymer hylle as before is sayd a month contynynge than it shalbe as pure and sayze as yf it were dystillyd by Alembike/ & hache a goodly taste/ & is well smellynge. In this maner is dystillyd the may dewe. Thus ye haue the fyfte maner of dystyllacyon without fyre.

How ye shal dystyll in balneo marie

named per balneum marie/ or in duplo bafe.

Ca. xiii.

The fyfte maner of dystyllacyon is ordred in this maner. The glasse shall be sette in warme water/ whych water shall be in a copper ket-tell oz copper cappel with a pype of copper/ as I shewed you before that the forneys be not wet/ yf it fortun'd to lethe & ronne ouer. And the dystyllacyō is ordred thus. Take a glas named ciur byte/ tyll the two ytes of the same glas with uice herbes/ floures/ leues/ frutes/ or what so euer it be/ chopped small/ & set the glas vpo a ryng of ledelyke as before is figured in the fourth chaptre/ make a bande of cloth .iiij. fingers brode about the upper parte of the glasse/ & about the same bande make foure small rynges of cloth haupnge .iiij. bandes conynge downe to the foure rynges that be fast on the leden ryng & bynde them fast eche to other as here is figured.

Than set the glas with the lede in the water standynge vpryght and sure fre fallynge on the one syde or on the other

b.iii.

through the weight of the lede/that set the
 Alembrycke or glasse and lute it well as
 before is specified/ in the fyfte chapittre
 That make fyze in your fornyays to hete
 your water with/ and let it be no hotter
 than ye may suffer you finger in it/ &
 haue alwaye warme water to fylt your
 kettell agayn/ whā the water by lengthe
 of tyme is wasted though the hete of the
 fyze/ for yf a drop of colde water touche
 the glas it wylt rye and bryke asonder
 Ye shall vnderstand that whan it drop
 peth nomore it is clene dystilled/ Than
 ye must let the glas stande still in it for
 to cole/ for yf ye dryue the glas hote out
 of it/ it wolde bryke asonder. It is ne-
 cessary for you also to haue a rounde boorde
 with a rounde hole in the myddest and
 cleft asonder. for to lay alway about the
 glas to the entent it may be the longer
 warme. Ye shall also vnderstande
 that all maner of waters that be dystil-
 led in this maner kepe the souerayn sent
 and odour of the herbes that those wa-
 ters be dystilled of. wherfor they be gret-
 ly praysed/ moche more than the waters
 of the herbes & flowers that be put in a
 glas/ as it is shewed in the .x. chaptre
 of that that is buryed in hors douge. b.
 or. vi. wekys to be putrified/ & than the
 one with the other dystilled in Balneo
 Marie as I shewed you before.

How you shall dystill in the hors bely
 named in latyn Dystillacio per ventre
 Equi. Capitulo. xiii.

De. vii. maner is thus to dystill in
 the hors bely/ ye shall set the glas
 fylled in the forsayd maner in Balneo

Marie/ as before is sayd/ but in the wa-
 ter ye shall put hors toad/ taking good
 hede yf there be no strawe nor haye ther
 in/ and that the water be so thicke of the
 hors toadys as yf it were wortres. Ye
 must also take hede that ye put oftyn ty-
 mes warme water in it/ for it is sone co-
 lmed & wasted away/ and this is halfe
 a degree hotter than in balneo marie/ ther-
 fore ye may dystille harder substaunces
 in it than in balneo marie.

How ye shall dystill in ashes/ named
 distillacio per Sineres Carv.

The. viii. maner is ye shall strewe fyne
 sifted ashes in a cappell. iiii. yn-
 ches of thykenes/ than fylt a glas the
 third parte full with suche substance as
 ye wylt/ & sette it in the ashes/ than fylt
 the cappell full of ashes tyll the thyrde
 part of the glas be covered/ & the cap-
 pell toheras the ashes be in shall be erth
 for yf it were of copp/ through the force
 and hete of the fyze it wolde melte.

After that set the alembrycke vpon the glas
 & lute it well vpon it with lutum sapi-
 entie as I haue shewed you before in p.
 vi. chaptre. That make fyze vnder it that
 it may droppe cretably as yf ye wolde
 tell yf clocke .ii. p. than there fall a drop
 and so contynewe after the same soft ma-
 ner/ for if it fall faster or quicker the fyze
 is to great/ therefore stoppe the wynd ho-
 les about & beneath/ than it shall fall the
 softer and bren the less/ and so it shall
 distill the lesse of the fyze/ & whā it drop-
 peth nomore than let the glas stande a
 hole nyght a colynge or euer ye mous or
 stee it/ or ellys it wolde bryke & sonder

The glasses be also lutyd to the thyrde parte/as I shewed you before in.ca.v. bycause they shold breke the lesse.

CHow ye shall distyll in sande/named distillacio per arenam. ca.xvi.

This chaptre is ordred i every co dyenon/as the chaptre is ordred of the alchies/a as before is shewed in the.v.chapitre.

CHow ye shall distyll on the fyre with a wynde ouen/named distillacio p ignem. Ca.xvii.

The tenth maner is this to distyll so that there be nothing betwene the glas and the fyre/lyke as aqua fortis and other stronge waters distyll.

To this distyllacion is necessary for you to haue a treuel in the myddest of the fornays with the .iii. fete masoned in the wall of it. And the glas must be made of Denyer styue glas. That glasse shalbe on the out syde well lutyd a great ynche of thychenes / and after that ye shall fyl the thyrde parte of your glas whiche shalbe also well enoynted with such claye as before hath ben spoke of. Then shall ye enoynte your fornays in the same maner/And after that ye shall set the alembryke on your glas/a & that it be well lutyd/than ye shal set a recep tacle oz dyole so that the pype of the alembryke hang within it/and than it must be well luted therein.

At the fyrste to begyn with the space

of thze hotores ye must make softte fyre and after that the longer the greater/a at the begynnynge ye shall stoppe your wynde holes/whiche shall be foure in nobze aboue the grate oz treuel agaynst the coles/wherewith ye may mynyshe oz encrease your fyre as ye lyst to gyue it aye/for it is no chyldees play nor game to distyll stronge waters/oz aqua fortis/wherfor ye ought the better to take hede but the most part of al the glasses breke a conder wher as aqua fortis is distilled in/for in the ende y helme becometh as red of the great hete as any Ruby oz euer the spyryte fro hym departeth. And let your glas stode colynge by hym selfe oz it be taken out.

CHow ye shall distyll in comon stillatoyes/named Rosegarlandes oz hel mets as here is figured. Ca.xviii.

Than ye will distyll moche water in a comon stillatoye/ ye shall laye sande vnder the panne of it. iiii. ynches of thychnes. Therpon ye shall sette your panne of ethe ouer ledyd oz glased as the potter maketh/ Oz ellys

of copper / rounde aboute the panne ye shall lay sande & bestryke y above with claye / to the entent that it be nat lyghtly with handys remeuyned or lyfted vp. Than lay therein such thynges as ye wyll dystyll / and set the helme vpon it. Than make a longe smale linnen clothe wet in thynne claye tempered as befoze is sayd with the same clothe ye shall stoppe your stillatoze betwene the helmet and the panne / than set a glasse befoze it that the pypp therof may hange in the glas / and lute it well that none ayre come oute of the glasse / Thus dystyll / & marke though the glasse how the drops fall therein accordyng to the same temper your fyze / get or small as it behoueth & whan ye se y it droppeth nomoze / than it is tyme to breke it vp agayn / and put other herbes therein. whan ye wyll haue moche water out of lytell herbys. Than laye the herbes thre ynches thicke vpon eche o-ther in the pan / floures shalbe layde. vi. ynches thicke / & frutis. ii. ynches thicke / for yf it laye thicker vppon eche other / than is the moystour of the vndermoste herbes dissolved or euer it can be sublimed through the vppermoste / wherfoze whan y wyll dystyll costly herbs which ben nat easy to get / as marioram / rosemary flowres / or other such lyke. Than y thynke nat my labour lost noz yet teduous to lay but a lytell in at onys / for the labour and coste is duple recompensed / ye shall vnderstande that all maner of waters whiche be dystilled in glasses be the best / Next vnto them those whiche be dystilled in erthen vessels & be well luted with erthen panes vnder & helmets

aboute as the potters can make full well After tynnen helmets aboute and leden panes vnder / After that leden helmets and panys / as y haue sene occupied in howses of relygion at Straesborow in hye Almayn / wher as they made theyr fyze with wode / but it was very small for fear of meltyng of theyr ledyn pan whiche stode vpon cytted asshes an hld full hye and nat in sand / After that copper helmettes ouertynned within. After that brasyn helmets / but alway the copper helmettes be to fear / and specially the brasyn helmettes / for two maner of causes / the first is the water that in the is dystilled / comonly brenneth and smel- leth of the fyze / and hathe a reed colour lyke wyne that is deed in hymselfe. The seconde cause is / for the copper and bras hathe alway a maner of a goutte & palsy pendyng vnto hym moze thā any other metal which geueth occasyon that euery one shold therof beware / as Crystophorus de honestatellisyth sup Antidotario medie.

CHow ye shall dystyll in generall eche accordyng to his nature Ca. xij.

CWhat maner of people that wyll vse the science of dystyllacyn / it is nedefull for them to knowe whan they dystille / what way is moste conuenient therfoze / to the entent that it lese nat his strength and goodnes of complexyn and propriete / but that it be the better drawn and brought in to the water / as farre as it is possible & conuenient / for it is nat possible that

any body lpyunge thowde byunge all thi
ges to purpose after his mynde & wyll/
but only god that hath created heuyn
& erthe/ and all thynge that is there in
There fore it is to be regarded that all
maner of floures and blossoms wher of
is but lytyl to gette/ and is very scarce/
it moost conuenient to be dystyllid in
Alembick or Alembicum of glas in bal
neo Marie/ and in none other vessel.

¶ Also your floures or blossomes that ye
wyll dystylle / muste be plucked whan
they be fully ripe/ but yet or they fall/ or
fade her colour/ or whan they marre and
decrease/ and they shall be layd coste and
lyght in the glas/ as I reherse to you be
fore in the xiiij. chapitre in Balneo Ma
rie/ or in the xliiij. chapitre in Grosse equi
no/ And whan that water is cleane dys
tilled / it is rectified afterwarde in the
sonne/ as to you more plainly shalbe shew
ed here after in the xli. chapitre. But
whan ye wyll haue the water moost re
ger and better/ than ye muste take the flou
res that the water is dystilled wth/ and
put them in a glas named Cretellatozill
as before is shewed in the xi. chapitre.
And cast vpon them the same water dy
stilled of the same & selfe floures/ than
stoppe the glas agayne surely/ and let it
in pure horse doge a. xliij. dayes & nygh
tes or moze/ or in Balneo Marie. ii. or
iii. dayes and nyghres. and let it so dy
gest in hym selfe. Than put it agayne in
the first glas and dystyll it ouer agayne
in Balneo Marie/ and the oftener that
ye so do the purer and moze nobler and
excellenter it wyll be in strengthe and
vertue.

¶ If you wyll dystylle herbes they shal

be gathered in seiden comenent or rure
the leues fade or change theyr naturall
coloure. Also they shall not be gathered
whan they be wet with rayne/ but whan
they be drye in fayre wedder and cleere
as yppocras and Aupenna testifyeth.

¶ In the thrid part of this boke I wyll
shew to you the tyme and season whan
all the herbes shal be dystilled/ that in
this boke shalbe specified. ye shal steepe
the herbes and leues from theyr stekes
and stalkes/ and chope them small/ and
than ye shal choppe the stekes and stal
kes by the selfe also/ & than ye shal put
them agayne to gyder with theyr herbes
or leues/ & ye shal put a char in a glas
or helmet/ & so dystyll it in bentre equi
no/ or in Sinerex/ whan it is so dystilled
thruogh helmet or glas/ than it shalbe rec
tified as I shal shew you hereafter in
the xli. chapitre. ¶ Ye shal vnderstande
that to dystyll herbes or floures/ wylling
therof to haue the sente and odoure of
the herbes or floures that it is dystilled
of/ the dystyllacyon therof shalbe dyd
in two or thre maners. The first is or
dyed and dystilled in bentre equino/ or
in balneo marie/ so that the water be no
hoter but that you may suffer your syn
ger therin. ¶ In other maner. Pour the
water all redy dystilled vpon the sayd
herbes/ agayne/ or els purifye it or
it be dystilled as before is shewed you
of the floures in this present chapitre.
¶ The herbes and the stekes maye comon
ly suffice stronger fyre than the floures/
wherof they may be dystilled in bentre
equino/ which is half a degree hotter than
in balneo marie/ and althys more hoter
& the sande hysk. ¶ Whan ye wyll dystyll

any rotes they must be gadred i the hottest
 dayes / or in diebus canicularibus /
 that is in the canyuler dayes whan the
 leuys begyn to fall. The rootes must be
 washed cleue / and the water dyed of
 agayn / and so chopped small & broken
 than put in a panne / or in a glasse / and
 so distyll it thurgh an helme or glas / as
 before is reherfed. ¶ The fourth ma-
 ner whan ye wyl distyll any superfluo-
 tes of fowles or bestes / as egges / blode
 lyuer / longues / cowtozde / or any suche
 that is thicke of substance / ye shall chop
 theym small and distyll theym in ven-
 tre equino and not wel stopped for ellys
 the water becometh stinkyng / but if it do
 become stinkyng / ye shall distyll it agayn
 in Balneo Marie / for cowtozde water
 of the first distyllacyon is seldom with
 out stenge / but mylke or honny / may be
 stopped and at the first tyme well distyl-
 led. ¶ The v. who so desyres to styll wa-
 ter off fleshe / he shall kyl it / be it beste or
 fowle / or ellys wozow it that no blode
 yssewe from it / after that yf that it haue
 any fatte or grese take it awaye / than
 take the fleshe and chop it smal & distyll
 it in ventre equino with softe fyre / to
 the entent that the water donat synke /
 or smell of the fyre / for sodenly therof co-
 meth a gret stenge / wherfore all suche
 waters may be distilled / for therewith
 it is greatly amended. ¶ Also whan ye wyl
 distyll any frutes / as plommes / peerys
 apples / bone medlers / nuttys / & suche
 lyke. ¶ They shall be gadred whan they
 be fully ripe / or euer they fall & waxe
 soft / & they shall be chopped small and
 dampyd than shall it be styllid in an hel-
 met in the saunde with so softe fyre that

it do not burne / and than it shall be rec-
 tyfied as I shall shew to you in the next
 chapter followinge. ¶ Nota ye shall vn-
 derstande that all maner of herbes / flou-
 res / frutes / or rotys / that ye wyl distyll
 moste conueniently ought to be gadred
 in the meryspunge of the mone / whan it is
 fayre wedder / accordyng as the tyme re-
 quyeth / than they shall be sayd washed
 and well pyked from all viciennelle /
 and than shall they lay a dyenge a hole
 day / and than chopped & distyllid as be-
 fore is specyfyed.

¶ To distyll waters of dyre herbes / flou-
 res / and rotes / whan the grene can nat
 be gotten. Capitula.

In the forineth contynue y ye haue
 no distyllid water / nor none can
 gette i no place whan ye behoue it thurgh
 forgetfulnes of the tyme that is past /
 whan they shoulde be distyllid / or ellys
 thurgh great hete and brought / by the
 whiche the herbes and floures be brent
 and witherd / or thurgh great rayne or
 supfluyte of wetnes / thurgh the whiche
 the herbes and floures be marred and
 rotten / and also the water therof distyl-
 led shall haue lytell strength or none.
 Therfor it is necessary to you for to kno-
 we howe ye shall distyll waters of dyre
 herbes / flours / or rotes / such as ye shall
 behoue / howe best it were moze profyta-
 ble and better of the grene herbes / yf it
 were possyble to get them. But yf it for-
 tuned that ye shoulde distyll the dyre
 herbes &c. Curry yere in the mo-
 neth of May before the sonne rysynge
 whan it is fayre wedder / & hath nar ray-
 ned y nyght / ye shall take a fayre wbyte

lynen clothe spreade abroad; & trayled oꝝ
drawen ouer the gras in a fayre lese oꝝ
gardeyn tohere as many fayre herbes &
floures stande growynge. Thelane lese
oꝝ gardyn wher as ye do this in ought
nat to stande in a marreys oꝝ watery
grounde; noꝝ in depe valeys; but vppon
hye groundes as nye as it is possyble &
than shal this clothe be wzonge out in
a glasse; & than do so agayn as oftē tyll
ye haue ynough. This dew must be thyste
dystylled in balneo Martie; and rectifyed
as here after shall be declared in the
nexte chapytre folowynge; and so kepe
that water from yere to yere; than yf ye
yst to dystyll within the yere any dyse
herbes; than take such herbes as is dryed
in the shadowe as moche as ye wyll/
haupnge his naturall sente & odour; &
cast vpon it thre tymes of the fornamed
water of dewe so moche that at euery
tyme the herbes be couered. This put it
in a glas & stoppe it well; & so put it in
hows donge. ii. oꝝ. iii. dayes and nyghtes.
After that dystyll it in balneo marie thre
tymes steepe; and at euery tyme agayne
dystyllled; but Albucasis wyrteth i libro
seruitoz that vpo euery poude of dyse
floures oꝝ herbes shalbe poued. v. l. of
comon water and so dystyllled in an hel
met; the whyche is not so good as the
water before sayde; for I haue red of
an olde experte phylosopher a doctoꝝ in
medecyn; that wolde that the may dewe
shold be. ix. tymes dystilled i balneomarie
& that the herbes be gadzed i the sonner i
a dew seaso; & they shalbe cleneyed &
the leues stroped from the stalkes oꝝ ste
lys; & layd in a shadowy place a dyeng
so that they may kepe theyꝝ sauoure.

Take as moche of those herbes as ye
wyll & cast thereon. iii. tymes as moche as
the fornamed may dewe. ix. tymes dystyl
led; dystyll that thre tymes ouer; as be
foze is specyfyed; & that water is better
thā the water dystyllled of grene herbes;
because nat onely the flegma of the
grene herbes is dystyllled. And sayd that
the may dewe that hathe ben. ix. tymes
dystyllled draweth the myght & strenght
to hym wardes lyke wyse as aqua vite
oꝝ other dystyllled wyne dothe. Therefore
it wate good that euery water sholde
be cast vpon his owne feces; that is vpo
his owne herbes tohere as it had be dy
stilled of; and is puttyfyed; & agayn dy
stilled; but yet it were moche better that
ye sholde poute that water of suche lyke
herbes before dyed; and that so dystyl
led; and than as I haue wyrtten before
it to be puttyfyed in a circulatorium; oꝝ
in a blynde helmet; named in latyn alē
bicus cecus; whych is before fygured in
the. ix. chapytre; and so dystyllled; it get
teth great goodnes and strengthe.

¶ How ye shall rectifye your waters af
ter they haue ben dystyllled. Ca. xxi.

Now after the dystyllynge of the
waters it is nedful that they be
rectifyed; to the entente that the fyze be
drawen out of them; & the flegmatyke
nature and complexion be temperated.
And also that they maye the longer
continue without marrynge; whych is
often done thouroughe the hete of the
sonne; whan the waters be put in to

a glas/the two partes therof fylde and well stopped with ledder and that well surely bounde/ The thyzde parte of the glasse shall be set in fyne sand and so in the sone the space of fyr weekes in the continual dayes / or after as the weder is temperate/ for the sande becometh very hote for to rectifye the waters frome the superfluytees of theyz moystures / lyke wyse the waters of fyry nature that be distylled of spytes / a fyrt steved in aqua vite a certayn whyle / theyz superfluytes of colera is nedefull to be tēpered of the fyry cōplexyon. for thugh the gret hete and drowght / the complexyon of man is often marred & destroyed by pendynge therto of some maner of goutes. Suche lyke wates be rectified thus. The glas shall be fast stopped as it is before sayd and the two partes therof shall be set in wet or moyst sande in a cellar the space of a month / or moze or lesse as the water requyrez. Or ellys dygge a hole in the grounde of a moyst seller / and set it moze than the two partes therein and so let it stande as is before sayd / for therewith the fyry cōplexyon is expzessly mynished. ¶ Also it fortuneth often tymes whan two maner of waters be myxed toggyder / & they become troublous incontinēt and whyte lyke mylke / as whan ye put olde waters into new / therfor ye shall myrce in two or thze poude of waters. vi. or. viii. Dropes of good whyte wyne bynegre: than the troublesomnes of the waters draweth to the bottom & becometh sayze and clere.

¶ How and where the distylled waters ought to be kepte.

I T is necessary and pzoftable to knowe how and in what maner the distylled waters shalbe kept / to the entent that they may the longer abyde in theyz goodnes / and be preserved frome theyz hynderaunces. fyrst whan the distylled waters be better distylled / as before is specyfied / than it is nedefull for you to haue stone pottes with smal neckes or pure spoles with small mouthes well washed / specially with the pouder of the herbe named paritaris / well myrced with the water or attyes of the same herbe & so closed as yt they were new / those vessels alway wel stopped with a woden stoppell / or stoppels made of the two partes of ware / one parte of rosen / torpentyne / & fyne pouder of tyle stone / of eche one parte and a halfe / all those myrced toggyder and molten on the fyre but they may not sethe / and whan it is colde make therof theyz stoppels / and a boue that ye shal bynde ledder very tust and close to the entente that the water kepe his nature & strengthe thā ye shal wyte about the vessel the name of your water and the tyme of his distyllacyon. Than shal your vessel be it pot or glas be set in a cellar to the entent that it do not frese for whan any distylled waters ben frosen they lese theyz myght & strengthe and chaungeth nature so that ye must poure them out & cast the away. Also whan any water is set in a hot stewe in the wynter it becometh redde & his power and strengthe is mynished therfore it shalbe set in a couenēt place that is nouthet to hote to colde nor to moyst to the entente that it abyde the longer in vertue & strengthe without hynder

heraumer of pteffhyng.

¶ Here after foloweth howe longe ye may kepe your distilled waters/ and whan they must be poured or cast away.

Capitulum. xxiii.

¶ Whan the waters be distilled/ rectified/stopped/and kepte in a conuenient place/ yet it is good and conuenient to knowe and vnderstande howe longe those waters may endure in goodnes/ and whan ye shall cast them awaye/ howe be it that the booke of Nicoloas de Bombardis sheweth that commonly every water ought to be renewed ones i a yere/ wherewith he meneth that they can abide but one yere in theyr goodnes/ whiche can nat be true/ for it may not be/ no/ is nat of necessite for these causes folowynge. ¶ First that the herbes/ floures/ rotes/ or frutes/ ben nat perysh to be distilled/ as I haue shewed to you in the .ix. chapptre before/ & in the begynnyng of the .xx. chapptre. The seconde/ whan they be well rectified in the sone. The thyrde whan they be well stopped and kepte in a conuenient place/ The fourthe/ whan they be every yere ones set in the sone the space of forty dayes or moze. The fyfte yf nede requyre every yere ones ye shall strayne your water thurgh a wollen sacke/ that so the feces be deuyded from the pure water. The syxte that the water be renewed towarde the ende of the yere/ as I shall shewe you moze expressely. The seuenth the waters that be distilled contynue longer than the waters that be byened/ for the clere and subtyll partes be deuyded from the grosse superfluytes/ for the difference betwene distilled waters and

byened waters is this/ the one is ordred with fyre/ & the other in other maners. The vniuersal manner of waters that be distilled of drye & hote herbes contynue longer than the waters that be distilled of colde/ moyst/ or clymy herbes or rotes. The .ix. some waters be yere a yere vntill or aboute/ do alter or chaunge theyr complexion with mynisthyng of theyr humours colde or hete. Therefore in these sentences I shall shewe to you howe longe the distilled waters may be kepte as nete as god therto wyll geue me grace/ for it is right distyll for any erthly creature to haue therof vnderstādyng/ wherfore I call to god for help/ for the pte knowlege therof is onely in hym/ and in none other without hym/ wherfore it is very necessary to you for to wyte the tyme of theyr byenynges or distyllacions.

¶ Howe longe the waters may be kepte in substance. ¶ Every manner of water is to be kepte a yere/ whan it is byened/ distilled and kepte as before is shewed. But whan the waters be nat close and finely stopped/ than shall they be cast out before the yere/ yf they be all manner of water distilled of beestes/ of foules/ or other wormes that bereath life may easily contynue a yere. Yet sōdarely al manner of vnty distilled of floures/ as maye floures/ bozage floures/ blew floure/ Deluce/ bene floures/ blew dyolentes/ may floures/ named Adam cornallum i latyn/ whiche hille floures water/ whan they be disty gently kepte as before is prescribed they contynue from the one yere to the other. ¶ If that they in the seconde

pere be rectified in the son / or distilled
 per seltrum or poboized through the woul-
 len sacke as I haue shewed you before /
 they abyde good vnto the ende of the se-
 conde pere / but thā they shal be cast out.
 Rede rose water dureth vnto the ende
 of the thyrde pere / yf it be well kept and
 euery pere rectified / but in y thyrde pere
 it is moze confortatylfe than colynge or
 sytptyke / whyte rose water may endure
 two pere yf it be well kepte and rectify-
 ed / whyde rose water endureth .ii. pere in
 great operacyon and vertue for to cole /
 yf it be well kepte / but in the thyrde pere
 his colynge is soze mynyshed / and is
 good for confortatylues / wherfore it is
 not to be kept ouer the thyrde pere / & it
 must be euery pere rectified / as before
 is specyfied. ¶ Also the water of Renu-
 fara floure whiche is growynge in the
 ryuers hauynge a greate rounde grene
 lefe / whiche floures be somtyme yelow /
 somtyme whyte / and whan the floures
 fall / the seide of the is closed in a rounde
 botton lyke a smal gorde / or an byrnal /
 may endure in his colde operacyon tyll
 the fourth pere / the fyrst pere to be lard
 without vpon the dysleales / for it is half
 popson or denyin thurgh his great col-
 denes or stupefactylfe / the seconde pere
 it may be vled withi the body for to cole
 In the thyrde pere his colynge is tempe-
 rate / & in the ende of the thyrde pere it
 shalbe cast out / but it must be well kept
 and rectified as before is specyfied. Of
 the same nature be rede roses growynge
 in the corne / & so is poppe floure water.
 ¶ Secundarely all floures water of hote
 herbes / as Camomyl floures / centory /
 floures / archangel floures / hylle flow-

res / yelow byolettes / whyde tansley flou-
 res / laundret floures / rosemary floures /
 marypolayne floures / sage floures / saynt
 Johāns warte floures / all these waters
 may be kept vnto the ende of the thyrd
 pere / yf they be duly seded & rectified as
 before is specyfied / but y waters that be
 nat so hote in theyr operacyon / may be
 kepte vnto the ende of the seconde pere
 as whyde perwynke floures / quices flou-
 res / flozes til / peche floures / sloen flou-
 res / whyte lylle floures / al these waters
 shalbe cast out in the ende of the second
 pere.

Of the water of leues.

¶ The thyrde / all suche waters that be
 distilled of leues of trees / as of byrch le-
 ues / whyde purpyn leues / beche leues / oke
 leues / yue leues / as the leues / leues of al-
 nus / byne leues / leues of fadam / leues
 of thamariscus / laue leues / & euery wa-
 ter of leues may be kept vnto the begyn-
 nyng of the thyrde pere / yf they be truly
 distilled / rectified / and well stopped / &
 set in a place conuenient.

water of frutes or beryes.

¶ The fourth al maner of waters distil-
 led / as of holme berries / in latyn viscus /
 whyde hramble beryes / grene benes / be-
 nes shales / great platayn seide / straws be-
 ryes / plomes or damscens / goides / black
 & rede cherries / duckes meat named lenti-
 cula aque vel lenigo in latyn / grene wal-
 nut shelles / campernoyles that som me
 call rode stoles / whyde or tame apples /
 whyde peres / ndcom / nly all maner of
 waters distilled of frutes may be kepte
 a pere or moze / yf they be well ordred as
 before is sayd.

Water of comon hete.

¶ The .v. of the herbes that be nat to hote nor to moyst/nor very hot/nor be ry drye/as *Sorrell water/Endyue water/beneftle water/bozage water/cresse water/water of Brunella/water of barba hyrcyna/water of Arthemisia/water of ruba oz rubra/water of Centum mozia/water of Scatū reile oz pennywort/water of treyfles/water of apium domesticum/water of cokerowpntell oz aaron/water of pacea oz herba clauellata/water of our lady thūsel/water of cynkfoyl/fenel water/water of herbe robert oz herba roberti in latyn/parow water/water of grounde rue/water of fumytory/water of *Consolida media/lyuer wort water/Cheruell/water of Cardus/bouage water/Auisticum in latyn/water of cauda equina/water of lettyes/lyuer wort water/water of may dewe/nyghtshade water/perseley water/parseneps/water of Dandelion/ Dandelion stalkes water/Tansy water/water of herba paralis/ Sacifrage/ Scabyose/ Celadry/Centum nodia/ & water of Harggol-des. These waters endure in vertue & strength fro the begynnyng of the fyrst yere to the ende of the seconde yere/whā they be kept as before is specified.**

¶ Of colyng waters.

¶ The .vi. Of waters of herbes/beinge very colde/as *Handrake/Benquayle/porzelayne/Houfleche/Duchess meate/popy herbe/crassula minor/hemlocke bel peuta in latyn. These waters and suche lyke may be kepte from the first yere to the ende of the thyrde yere/ if they be oyled in althyng as before is specified.*

but for the outwarde parties they be in theyr colde operacyon of great vertue & strengthe/for in the fyrst yere they be so colde & stupefactyfe that they take away the feylng of man. In the seconde yere they be metly temperate in theyr colyng therfore they shall not in the fyrst & seconde yere be vsed withyn the body/and som shal neuer be vsed in the body alone/ but onely to be layd without.

¶ Of the hote & drye herbes of nature.

¶ The seuenth/the waters of herbes that be hote and drye of nature/as *horehounde oz marubium in latyn/Scabworste/oz Enula campana in latyn/Horse mynte oz mentastrum in latyn/Agrimonie/pulegium/basilicon/cardo benedicta/centory/camomyll/archageill/dylle/brennyng netles/herba veronica/gamonder/ Tanacetum agreste/hoppes/herbes tōgue/mirtica/verberna/Jlope/laundre/marcolayn/menta/apium/melissa/salua oz sage/ Arystologia longa oz smertworste/wylde tyme oz our lady bedstraw/wylde treyfle/ruta oz rue/saint Johns wort/rofinary/saponaria/dayle oz consolida minor in latyn/propola/waters of those herbes & suche lyke may be kept to the ende of the thyrde yere. Whā they be ordered and kepte as before playnly is shewd.*

¶ Of waters of moyst nature.

¶ The .viii. Water of rotes whiche be grosse/moyst/ & stympt of nature/as *bozage/rotes/parseneps rotes/rotes of cardo bndictus/fenell rotes/perseley rotes/rotes of hemidactylus/Radice/raspes/wallowt rotes/rotes of wylde lylles/rotes of sigilla salamonis. The wa-*

tets of these rot? & such lyke may be kept from the one yere to the other / whan it is ordred as befoze is specified.

water of rotes that be hote of nature. Waters distylled of roots that be hoot & drye of natures / as roots of Enula cā pana / angelica / pmpynell / blew flour de luce / baleryan / nettles / yelow lylles / spargus / asara alba / assa dulcis / all suche lyke rootes water may be kept from the begynnyng of þy fyrst yere vnto the ende of the seconde yere / yf they be duly tendyd as befoze is reherfed.

¶ If all suche waters as be distylled of bestys / fowles / vermyyn / or woymes.

The tenth suche wats / as wat of pres ducks / greys blode / gote hockes blode / blode of an ass / yolkes of egges / whyte of egges / ates or pismir egges / frogges hennys / hennys matwes / capons / cowe creme / cowe dounge / calves blode / flies / mannys dounge / ore blode / swynes blode / storkys / mayls / These waters and suche lyke may be kepte / frome the one yere to the other yere / yf it be ordred and kepte as befoze is sayde / but that may not be sayle / hony water may be kepte. b. or. vi. yeris yf it be euery yere ones rectified in the sonne.

Now wyll I wypte to you wyth byrse sentece of al maner of waters igenerall / as of herbes / rotes / flowres / fruytes / & leues / & other thynges befoze reherfed. How longe these waters may be well kepte to the entet þy al tho se that redeth this boke may haue þy better vnderstadyng of suche thyng as befoze is not reherfed. Therefore ye shal vnder-

derstande þy all maner of herbes that be colde or moyst / or flymy / or fat thycke substance may dure from the one yere to the other / except these that be cold in the .iij. degre they may be kept longer as I shal shewe moze playnly to you in the ende of this chapitre / lyke wyse all flowres þy be fatte / moyst / and thycke of substance be kepte in the same maner. Also al blof soms that be thynne / subtyl / drye / or hote of substance may be kepte from the begynnyng of the one yere to the ende of the other yere. But al waters of herbes that be hote of complexyon the inclynnyng to bitternes with drye thynne subtyl stelles & leues & drye flowres / these may be kepte from the fyrst yere / in to a parte of the thyrd yere. All fatte / flymy / moyst rotes þy be of a grosse colde substance may be kepte from the begynnyng of the yere almost to the ende of that same yere. All maner of waters of rotes that be hote / & drye / subtyl / & thynne of substance / may be kepte from the fyrst yere in to the begynnyng of the thyrd yere. All waters of bestes & suche lyke / as befoze is spokē of / cold and moyst of nature / or grosse & fatte of substance / may be kepte wel nyghe from the begynnyng of the yere vnto the ende / but waters of blode may cōtynue a yere full. All waters of fruytes colde / moyste / and flymy / of substance myxed with sozemes or sweetenes may be kepte from the one yere in to the other. But all waters of hote fruytes of smal thynne substance / inclynnyng them vnto a drye and better complexyon may be kepte from the begynnyng of the one yere vnto the ende of the other. But all maner of herbes / flowres / rotes / sedys /

oz frutes that be deped oz wet in wyne
 & therwith distylled/rectified/close stop
 ped/& kept in a conuenient place may
 contynue.ii.oz thre tymes as longe oz lo
 ger. Whan ye kepe your waters so long
 that ye thynke that they strength wyll
 peryshe/thā ye may renew the in this
 maner. In the next yere oz they peryshe
 take of euery eche water of what nature
 so euer it be/the thyrde pte of as moche
 herbes/rotes/floures/oz frutes that be
 freshe & grene/stamped/stepped/& wey
 hed in balneo marie.iii.oz. foure tymes
 well stopped in a blynde helmet & hath
 no pypp/oz els in a glas named circula
 torium as here is figured/oz in horse
 donge.iii.oz. foure dayes.

After that distylled & wel rectified in
 the sonne as I shewed you before, than
 may it cōtynue his hole tyme as it ought
 do at his fyrst distyllacion/& this may
 betwylse done & no more. In the which
 I haue founde great vertue. But what
 it is to knowe the sadynge of the waters
 and to knowe the dewe tyme whan it
 shall be poured out and cast awaye ex
 cepte ye knowe the tyme whan it was
 distylled. Neuer the lesse I shall shewe
 you a pte therof how it may be done in

b. dyuers maners. ¶ Fyrst by the smell
 as these waters folowynge/rose water/
 water of myntes/melisse/may flowre
 water named lithum conualuū in latyn
 camomell floure water/ylope water/la
 tiender water/rosemary water/marpo
 layn water/snel water/& such lyke wa
 ters. If they be distilled in balneo marie
 oz with a softe cole fyre & thā well stop
 ped/so they kepe they sent/& whan ye
 se it expelly minished/faded/oz gone/
 than ye ought to cast them out.

¶ Secondly, yf the herbes haue no
 sent noz sauour that the water is distyl
 led of/than ye shal take the water and
 holde your spole oz glas of a gret height
 & poure out a pte of y water/yf it spyn
 thā lyke a threde/it oughte not to be oc
 cupied/but cast away for thā it hath no
 vertue. ¶ The thyrde maner/ye shal let
 a droppe of your distylled water vpo the
 nayle of our thombe/yf it runne not
 awaye of/thā cast it away. The fourth/
 whan there dryue feces in the botthom
 of your glasse lyke cloutes/& deuyded
 lyke flockes of snowe cast it out/for it is
 nought. ¶ The v is whā the water is
 of a red colour & smellery yll/than cast
 it out inconyent/oz it were able to do
 moze harme than good.

¶ Thus endeth the fyrst boke of the dy
 stillacion.

¶ Hereafter foloweth the regestire of the
 table of the seconde boke of the herbes/&
 to fynde the waters agaynst all maner
 of sekenelles and infirmytees.

Item this present table
is deuptyd in .xxxi. partes
wherin ye shall fynde re-
medyes agaynst all maner
of dysleases or infirmytees
comynge or fallynge vnto
mankynde / from the hede
vnto the fete.

The first parte sheweth
with what water the helth
of man is to be preserued.
And in this first present
parte be .x. souerayn chap-
ters of the whiche ye may
occuppe the best / & that is
moost nedefull to your help
And those ye shall fynd by
the nombze of your chap-
tres / and by the registre of
your letters / as **A B C D**
E. &c. And seke for this in
the twelfth chapter in the
letter **D**. after that seke
for this in the **xvii** chapter
in the letter **I**. and in the
lxxxix. chapter in the letter
A

C If a body had etyn a spynner / howe he shall be holpen

| | |
|-------|----|
| clvii | BB |
|-------|----|

C This chapter sheweth whan a body is impoisoned of smellynge of any metall oꝝ byas / of the whiche the mebzies within begyn to rotte / lyke as it is often tymes sene on the bodyes that be enoyted with vnguentū. Mercuriale oꝝ by the smellynge of argen- tum viuu / the gōmes and the mouth rotteth / and the tethe fal out / than ye wene it cometh of herte / but it is nothyng so / because the Mercurye is colde & moy- sty in the fourth degre. and whan it is sublymed than it is hoot and dyre / howbeit neuertheles / it de- stroyeth the body of man / and byngeth it to a stymy fleshe / named in Latyn / Estumonium / with this water he shall be holpen.

The prologue of this present
boke of his dysyllacions.

In the name of
the holy trynite/
the fader/ the so-
ne/ & the holy go-
ste. Here begyn-
neth the boke of
these present ope-
racions/ as of the vertue/ strength/ &
goodnes of the dysyllid waters/ oꝝ
deyded agaynst all maner of sekeneſ
and dysseases compyled and gadred
to gydder for the comon people that
haue no phyſcyons noꝝ can get no
medecynall substaunces/ for lacke of
money that they be not able to paye
for it. All such to comfort and suppoꝝ
racyon of theyr infyrmities/ tyl that
they may get an expert & lerned phy-
ſycio/ oꝝ maister in medecyn/ to who
the sekeneſ oꝝ disseses be wel bekno-
we/ & also the coplexions of the dissea-
sed bodyes/ whether they com of hete/
of droughte/ of moystour/ oꝝ of cold-
nes/ the which is farre fro the know-
lege of the vnlernd people/ also yf
the people can gette no phyſcyons
noꝝ medecynes/ yet I wyl shew som
maner of wayes to be holpe thugh
the experyence that I haue founde
by vsynge of the waters/ to whiche is
nother heuy noꝝ scathfull to be my-
nistred/ for they haue not the appen-
dyng goutes of lacytise medecynes
oꝝ receptes/ lyke wyse the substaun-
ces of theyr corpus be not ministred
in the body but onely thugh a loue-
ly & layre maner wel pleasynge to the

patient/ as I haue shewed before in
the ii. chapitre of the fyrst boke/ but
moche better it were & moꝝ profita-
ble to solowe the lerned medecynes
oꝝ physicians to ha theyr may be gotte.
O good lord how ofte haue I sene
an vnlernd physicion minister his
medecins that knowe nother disseses
noꝝ yet the complexyon of the patient
hete to hete/ thugh the whiche the
natural moystour was spent/ & the
body dreyd away & columed/ oꝝ mo-
sture to moysture/ thugh the whiche
the body rotted away/ oꝝ cold to col-
de the whiche the naturall hete that
shold pserue the lyfe of man is hole
minished & brought to nought for
the holy prophet Job sayth that the
lyfe of man is placed for to dye a na-
turall dethe without any payne/ yf
he may attayn his natural lyfe vnto
the dethe/ the which may so wel com-
to purpose/ by an experte and lerned
maister oꝝ phyſcyon. Wherefore I
meruaile for that any wyse persone
of vnderstandynge/ can fynde in his
harte to gyde hym selfe so folyshly
ouer in to the handes of such an vn-
lernd maister/ that knoweth nother
begynnyng/ myddell/ noꝝ ende of me-
decynes noꝝ complexyons. Thus I
counceill you and instantly requyre
you/ that ye cast not away ignoran-
tely the pcyous Jewell of your natu-
ral lyfe that god hath created & plan-
ted in you naturally to be kept with
suche graces as he therto had giuen
you/ therewith to be pserued.

The first chapvtre the worth of the
water of Marubium. The first cha
pvtte. *Good herbe*

Marubium or passum in lati
Thys herbe is of .ii. maners
both male & female/therfore whā it
is wryten marubium alone without
more/therby yeshal marke thefema
le/yet they be bothe good/for the ma
le is mynystrēd vnto the men/and
the female vnto the women/And it
must be dyspyllēd with hys hole sub
stance/as rote/stele/and herbe chop
ped to gyder and dyspylled in the ende
of the may **A** The same water
dronke two oz. .iii. dayes at moznyn
ge & at nyghte/ at eche tyme an ounce
or an ounce and a halfe/ helpeth
them that haue the cough **B**

The same water helpeth them that be
streyt brested **C** The same wa
ter is somtyme good for womē with
chylde to drynke at eche tyme an ounce
for it cōforteth the womā & strēg
theth the chylde **D** The same wa
ter .viij. oz. .x. dayes at moznynge & at

nyght at eche tyme dronke an ounce
& the hede be enoynted therewith cau
seth good vnderstādyng **E** Also
thesame water made luke warme &
put in the eares/oz a lyne clout wet
in the same/ & oftē tymes solaid vpon
the eare/ wrythdwyerth the payne of
thē **F** Lykewys the same water
droke in the moznynge & at nyght at
eche tyme an ounce or an ounce & a half
somtyme amōge is good for thē that
spytte blode **G** For them that be
drye oz hath eny fātalyses/this wa
ter is good for them to be dronke at
moznynge & at nyghte at eche tyme
an ounce & a halfe/ **H** Lykewys it
heleth freshe woundes/whā they be
wasshed therewith luke warme/and
dried agayn/ & thā a grene wounde
plaster layde vpon it. **I** It heleth
also open impostumes yf it be luke
warne and wasshed therewith in the
moznynge & at nyght & lyne cloutes
wet therein and laide vpon it **K**
Thesame water is good to be dronk
at moznig & at nyght/ at eche tyme
ii. ounces is good for thē that haue
the dropsy/ if they can refrayne them
of moche drynk/ & moostly meat/ & oc
cupp the same water/ at tyme conty
nuyng **L** At eche tyme of the same
wat droke an ounce/ or an ounce & a
halfe strengtheneth the stomake/ If
it be takē at moznynge & at nyght.

M Also it strēngtheneth the breste
vied in the same maner/ **N** The
longues & the hyert. **O** The hyd
nes oz raynes & the mylte. **P** And
also the bladder/ all this be wregthe
ned by the same water.

Sozell water.

Call.

The water of the her
be foxell.

I Cetosa in latyn. foxell in
Englyshe. **I** foxell wa
ter is good to be dronke often of the
hat be i hote schenelles/ & his drin
ke myxed with the same is very go
de. for it slaketh the thurst. **I** If
it be dronke as befoze is sayde it is
good for the hote ague or feyres. **C**
foxell water is good for the yelow
Jandys if it be dronke. vi. or. viii.
dayes. **I** foxell water withdy
ueth the hete frome the hyet if it be
dronke as befoze is sayde. And with
a foure doctoble cloute or with hem
pen towes staped in the same/ and a ly
tell to yonge out layd without on the
ryght syde on the lyuer/ and whā it
waireth dye do as ye dyd befoze twi
le or thyr a daye.

Chis water dronke tht or foure ty
mes a daye at eche tyme an ounce
caueth good appetyte to meate. **I**
Chas water slaketh saynte Antho
nyes fyre or plage whan there is a

cloute or tuble of hynpe wete in the
same and layd vpon it. or foure ty
mes in a daye vpon the hynpe. **I** foxell water dronke
in. or. foure tymes in a daye at eche ty
me an ounce and a halfe. is good a
gaynst the poysoning colicage of he
te. **I** foxell water dronke is good
for all manner of hote thynges for it
cooleth and slaketh all hote thynges
bothe within the body and without
yf it be dronke in the mo:nyng/ at no
ne/ and at nyght/ at eche tyme an
ounce/ and outwardly layd vpon it.

I foxell water dronke/ and the
hede wete with the same/ and let it
dreyne awaye by hym selfe/ wethdy
ueth the hete of the hede that cometh
of payne. foxell water is good agayn
st the shorn that is an vnnatural
hete on the body with great redeness
cloutis thereon. lay them therto two
or thre tymes in a daye.

The same water withdyueth impet
gines/ whan there be wette cloutes
or towe layde to it/ or if it be washed
therewith. **I** If you wasse
your eyen therewith ones a daye an
houre before the nyghte/ it purifieth
eyen/ it slaketh the hene and withdy
ueth the redeness of the eyen/ comyng
of hete.

Also if it be luke
warne/ and so dropped in the eares
it caueth hym to hete. **I** fox
rell water is alway good to be dū
be at eche tyme an ounce and a hal
fe agaynst the pestilence. **I** fox
rell water dronke in the mo:nyng at
nyght at eche tyme an ounce is good
for the that be empty stomached thyn

ghe overmoche hete of the stomake
and causeth lust and appetyte though
his shapenesse and styptye/ it streng-
theth and conforthe the stomake/ the
harte and also corage.

¶ Of viscous water. **Ca. iii.**

A Iscus in latyn. Thys herbe
hath a longeslender leafe no
ther full grene/ noz full yelow/ and
bereth a small wyhte berye. And the
water shall be dystilled of the same
beryes/ **A** Thys water ys fit be
dronke in the moynynge/ at none/
and at nyght/ at eche tyme halfe an
ounce strengtheth the longues whā
they be dysseased woth ouer moche
moystoure/ **B** The same water
dronke in the forsayd maner is good
for the cotwagh comynge of the longues

¶ Of Bulbus oz waltwoxt water. **ca. iiii.**

E Bulus in latyn/ waltwoxt/
The best tyme of his
dystyllacon is the herbes oz leues
choped & dystilled whan yt begyn-

neth to blossom. **A** Whoso dryn-
keth the same water/ at eche tyme ii.
ounces/ oz ii. ounces and a halfe cau-
seth larayse. **B** The same water
is good to be dronke at moynynge &
at nyght/ at eche tyme an ounce and
a halfe oz two ounces/ is good aga-
i the swellynge inwaerde and oute-
warde & specially agaynste droptye
whan clewtes be wet in the same &
laid vpon it. **B** The same water
dronke somtyme amonge an ounce/
oz an ounce and a halfe is good for
the dayly aces oz iebres. **E** Wal-
woxt water is good/ yf it be dronke
in the moynynge and at nyghte at
eche tyme an ounce & a halfe/ oz el-
lys two ounces for the payne in the
sydes/ and laid vpon it whan there
come stiches oz other payne in the
sydes comynge of blode oz other moy-
stoure.

¶ Of Enula campana water. **ca. v.**

E Enula campana/ the mooste co-
mon parte and tyme of hys dy-
styllacon is/ the rote & the herbe chop-
ped with eche other and dystilled in
the ende of may/ but moche better it
were onely the water of the rotes.
A The water of the herbe and ro-
te of Enula campana dronke in the
moynynge and at nyght at eche tyme
as moch as wyl go in an eggys shel-
le fyue oz fyr dayes cōtynuyng woth
dryneth the grauell. **B** Of the sa-
me water dronke in the forsayd ma-
ner/ and pour drynke myxt with the
same/ is good for them that be reue-

with in the body. **C** Dye of the same
me in the same maner before sayd/ &
the hede w^t with the same/ and let
dye agayn by hym selfe strengetheth
it well. **D** In the morning and
at nyght/ and somtyme amonge be
syde dyne of the same water at eche
tyme an ounce or an ounce & a halfe
consozeth the stomake. **E**

In the morninge/ at none/ and som
tyme besyde dyne of the same water
& the lymmes shybed & rubbed ther
with strengitheneth them soze. **F** All
so the same water of the herbe and ro
te dyne in the morninge & at nyght
there of an ounce after all maner of
dynekes whan ye go to bedde is gode
for the stone in the raynes and in the
bladder. **G** Lyke wyse the same
water vled in the same maner purg
fyed the hydnes and the bladder.
H The same water oft tymes dy
ne/ and at eche tyme halfe an ounce
causeth one well to pylle

Of Chula Campanacola

R Ote water of Chula capana
is dyne in the morninge
fyre it is stamped/ and than dyl
led/ with the dylle/ and is dyne
in the morninge. **S** The water of this
rote dyne in the morninge and at
nyght/ at eche tyme an ounce & your
dyne myxed with the same lof
neth and maketh a large body.

T In ounce & a halfe of the same
dyne in the morninge & at nyght
a certayne reason/ belect the dys
eases named ruptur & marior.

C In ounce/ or an ounce & a halfe of
the same water dyne/ and clout
wetherin and layd vpon the swol
len moder/ causeth it for to swage.

D Clowtes or towe wet in the sa
me water is good to be layd warme
vpon an enfl swollen part of man
thysse a daye. **E** In ounce and a
halfe/ or two ounces/ is good to be
dyne in the morninge & at nyght
for them that have the stone.

F The same wat an ounce therof dyne
at nyght causeth women to haue
her floures named menstruum.

G The same water an ounce and a
halfe therof dyne at none and/ at
nyght is good for the grauel in the
raynes/ and conducteth the dyne.

H A woman that dyne two or
the tymes of the same water at e
che tyme. a ounces dyne from her
the dede chylde. **I** This water dyne
sometyme at eche tyme an ounce & a
halfe is good for the secret gutt beid
*. The same water it is be oft dyne

at eche tyme an ounce anda halfe is
good for the coughe.

¶ Of Egrimony water. Ca. vii.

¶ Echmolia in latyn/ Egrimo
nye. The best tyme and parte
of his distyllacon is in the begyn
nyng of the somer. **¶** Agrymo
nye water yf it be drōke at moynyn
ge and at nyght at eche tyme an ou
nce is good for the cotogh. **¶** The
lymnes enoynted with the same
water is good for the droppe. **¶**

colicthe

droppe

steru
glauca

good blood

small blood

rotting

in the mouth

If it be drōke in the moynynge/ at
none/ and a nyght/ at eche tyme an
egge shelle full is good for the peo
we and dys. **¶** yf ye drynke the
same water a good season/ a drynke
myxed with the same maketh go
de blode. **¶** An ounce & a hal
fe of the same water drōke in the
moynynge and at nyght is good for
euyl stopped blode. **¶** The same
water is good for the rottinge and
stynge in the mouth/ yf it be oft ty

mes washed therewith. **¶** This
water causeth all maner of woemen
in the bodye to dye/ when a chyld
dryneth therof halfe an ounce fast
tyng/ a myddell age/ an ounce/ an
aged body an ounce anda halfe. **¶**
It is also good for them that haue
woymes in woundes/ when they be
warne washed therewith twyle a
day/ and also other sores with wo
ymes. **¶** This water is good to be
drōke in the moynynge & at nyght
for the ares. **¶** The same water
like warme drōke & gozgoled in
the throte/ in the moynynge/ with
drysseth the payne of the throte/ yf it
be done iii. or iiii. tymes in a day.

¶ Of colombyne water Ca. viii.

¶ Quilegia in latyn, Columby
ne otherwoyse. The parte & ty
me of his distyllacon is the herbe &
stele chopt to gyder whā it doth blof
some. **¶** Colombyne water at
eche tyme drōke an ounce & a half of
ii. ounces is good for impoysonig. **¶**

The same water is good to be drōk
in the moznig & at nyght at eche ty-
me an ounce is good for the pelowe
Jady in the stomake. **C** An ounce
of the same water is good to be drōn
ken in the moznig/at none/& at nyght
for impostumaciōs within the body.
D Two ounces of the same drōk
now & thā is good to the that be to
roslyfe. **E** An ounce & a halfe of
the same wat drōnk every day now
and than is good for shynkyng in
the body. **F** Columbyne water is
good to be drōnk for them that be ve-
ry far nte and haue no myghte nor
knowe not them selte what they a-
le he shal drōnk of this water in the
moznynge/at none/& at nyghte, at
eche tyme an ounce or an ounce and
a halfe/& myrred with theyr wyne
than they gette agayne theyr myght
& strength. Of endyue water. Ca. ix.

E Adumilatin. Endyue other
wyse. The best parte and sea-
sons of his distyllacyon is the leues.

stroped from the steeles/& chopped
so distyllled in the ende of the maye.
A Endyue water drōnk in the mo-
nyng and at nyght at eche tyme an
ounce is good for the that hath a nare
we breste. **B** Endyue water often
drōke of a woman beryng chylde at
eche tyme an ounce/cōforteth and streng-
theth her. **C** Water of Endyue drō-
ke in the forstmaner/causeth a go-
de bzapne. **D** Water of Endyue
drōnk is for hit that hath the pestilence
at eche tyme an ounce or an ounce &
a halfe. **E** Endyue water drōke in the
moznynge & at nyghte/at eche tyme
an ounce and a halfe is good for the
pelow Jady. **F** Drōnk of the
same water/at eche tyme .ii. ounces or
.ii. ounces & a halfe is good for the in-
ordinate thyrste whā it happeneth
in the tyme of the pestilence/and in
the sharpe & hote acres of febers. **G**
A plaster made of hempen towne/a
quarter of brede/& well wet in the
water of endyue/& a lytell wyng
out agayne/and so layd wet on the
right syde/flaketh all the hete of the
lyuer/ys it be in hote acres/or of he-
te fehenes/whā the plaster is ofte
wet in the same water. **H** At eche
tyme drōnke of the same water an
ounce & a halfe is very good agaynst
paynfull styches/& specially for the
stitches of the harte/whether it be of
supfluytes of blode/or of hote moist-
nes/or ys a body had fallen.
I Of cokow pynell water. ca. x.
A Iron in laryn. The best par-
te & tyme of his distyllacyon
is the rote & the herbe chopt togydr.

and dyspylled in the ende of the may
A The water of Aaron dronke in
the moornyng and at nyght/at eche
tyme an ounce and a halfe/ is good
for them that is rent. **B** Woth the
the greete byndene woundes in the
moornyng and at nyghte washed
same water is very good and holso-
me. **C** The same water dron-

ken the hotores before brekefast in
the moornyng/ almost an ounce and
a halfe through cuttyh and deunderh
olde and harde symy mattres lay-
nyng in the stomake.

¶ Of Mandrake water. Ca. xi.

A Andragora in latyn. The
beste parte and season of his
dyspyllacyon is the herbe & the rotes
stamped and dyspylled in the ende of
the maye. **A** The forhebe and the
temples enoynted with the water of
mandrake/ or dronken a lytell of
the same catowseth a body well to sle-

pe. **B** The hede/ the forhed/ and the
temples/ enoynted with the same
water/ in the moornyng & at nyght/
two or thre dayes dryng is good
agaynst the payne in the hede comyn-
ge of hete. **C** Water of Mandrake
slaketh all hete/ whan clowtes be
wet therein and layde vpon the body
of a person two or thre days at eche
tyme wet agayn two or thre tymes
in a daye. **D** Two or thre doto-
ble cloutes wette in the same water
and wryng out agayne a lytell/ &
layd vpon a paynefull place/ it sla-
keth therewith because it is stupefac-
tyfe/ that is it taketh away the feyn-
ge of the member/ and therfore out
of his owne and proper nature and
condrecon it slaketh all woofull pay-
nes.

Water of angelica water. ca. xii.

C The beste parte and tyme of
his dyspyllacyon is/ the rote
in the ende of the seconde yere in the
herueste/ chopped/ stamped/ and dys-
pylled/ **A** Water of Angelica is the
moste worthiest water that may be
founde agaynst the pesty lere/ if ther-
of be dronken halfe an ounce euery
moornyng fastyng. And whan any
body is taken with the pestilence/ he
shal take of the same water two oun-
ces/ **C**iriaca genest one dragma/
pouder of the rote of angelica halfe
a dragma/ bynegre a quarter of an
ounce. These shalbe murced eche amo-
ge other/ and that shal be gyven to

the seke body / or ever he slepe / but
 fyrste he shall be well lette blode in
 the place that is moste necessarye.
 And whan he hath dronke that soz
 named dynt / than he shal be layd
 downe / a wel couered that he may
 sweete / for that is to hym a great hel
 pe. **B** That same water is good
 for them that haue pain in the brest
 whether it be of straitnes or lymne /
 & openeth it / if therot be dronk an ou
 ce in the moornyng & at vyght. **C**
 The same water vlyd i the same ma
 ner. xii. or. xiii. dayes / is verye good
 for an ouerioden stomake that hath
 no dygestion. **D** The same wa
 ter euery moornyng vlyd an ounce
 therot strengthenth all the partes
 of the body / and is good also for the
 goutte.

C Of the deuils byte water. ca. xiii

A Alcea nigra vel morsus diabo
 li in latyn. The best parte and

tyme of his distillation is the bet
 te / the floures / the stalkes / and the
 rotes / chopped all to gydder & stam
 ped / and then distyled in the tyme
 whā it bereth floures. **A** Dronke
 of the same tyme tymes in a daye
 at ech tyme two ounces / is good for
 them that be shoten / cast / or fallen
 that theyre blode stoppeth / is con to
 gyder. **B** This water dronk in
 the moornyng and at vyght / at ech
 tyme two ounces / is good agaynst
 impostumacions within the body.

C The same water dronke
 foure tymes in a daye / at ech tyme
 two ounces / is good agaynst lypthes
 within the body / & in the syde.

D The same water dronke the
 tymes in a day / at ech tyme an ou
 ce and a half / is good agaynst im
 postumacions about the harte / the ly
 uer / & about the breste. **E** Euery
 moornyng dronk of this water an
 ounce saltyn / is good for the pesti
 lence.

C Of pyres water. ca. xiiii

D Ica in latyn. The best parte
 & tyme of theyr distillation
 is / whā they be hatched or they can
 flye out of theyr nest / and worow
 them & choppe them with all theyr
 substaunce & distyle them in cleere
 glasses. **A** Water of pyres is good
 for hym that is distyled with saint
 anthons fyre / & that is good both
 & remedy / cloutes wet therin. & ii.
 or thre tymes layd thereon in a daye
 & at ech tyme let it drye by hym self.

B. i.

two of the days cōtinuyng tyll it
slaketh. **W**ater of ponge pyes
is very good for the webbe & skyn
of the yew. And is also very good
for the eyen whan the water is put
in the eyen an houre before nyghte.
The whyche an olde mayster at
Straetborow had proued by expe-
rience on many pōs & specially aga-
ynst the redeness of the eyen.

Duckes blode water. carb.

Sanguis anetys i latyn. And
the blode of the wyld duck-
ys is the best. The best yte & tyme
is the blode of the wyld duckes in
the last moneth of the heruest & dy-
stilled in balneo marie. **W**ater
of blode of duckys is good agaynst
the stone whan it is drōke. **xxx. of. xl.**
days cōtinuyng at ech tyme an ou-
nce. **W** The same water drōke. **x.**
of. xli. days i the maner afore sayde
is good agaynst the stone in the lym-
mes & bladder for it purifyeth the
raynes / the lymmes and the bladder
of all theyr vncleues.

Water of bozage

carb.

Bozago in latyn. The best pte
of his distillacion is the ro-
tes and the herbe chopped with al
his substance & stamped & so distil-
led. **W**ater of bozage is very
good whan a person is stunged of a
spynner / or of bees / a double cloute
wetted in the same water & vpo the
stunged place layd / withdurneth the
payn & healeth the wounde. **W**
Water of bozage drōnk in the mor-
ning & at nyght / at ech tyme an ou-
nce / or an ounce and a half / withdurneth
the stikig i the bely. **W** This
water drōnk amonge a certayn day-
es at ech tyme an ounce / or an ounce
& a halfe withdurneth the greuous
swellng in the bely. **W** Drōnke
of the same water in the morning
at none / & at nyght / at ech tyme an
ounce / or an ounce & a half / is very
good for the bloody flyte named diste-
teria. **W** An ounce / or an ounce & a
halfe drōnk amonge in the morning
& at nyght / is good for the that
be streight on the brest & narrow na-
med asina in latyn. **W** A rede
clout of sylk wet i the same water
& a lytel wozonge out agayn and so
layd vpo the dark yē a hole nyght
durynge / continuing som days / thā
the yē becom clere agayn. **W** A
clout wet in the same water & layd
on the eares & on the necke is good
for the that haue the ppyng in the
eares / and taketh awaye the payne
of it. **W** Drōnke in the morning

ge & at night of the same water whiche is distilled wth al his subtiltie conforteth the harte maruelously
I The same water dronke in the maner before said conforteth the braynes and maketh good memo^{ry} and remembraunce and w^{ry}tte. **R**
 The same water dronke in the maner before sayd is good against madnes or frenesye and melancolpe/named mania in latyn **L** In the forsayd maner dronk it is good for the tremblinge of the hart **D** This water dronk in the same maner maketh the harte mery

Of the water of bozage floures
 Capitulo xvii.

I Los bozagini^s in latyn. The bozage floures other wyle.
 The best part and tyme of his distyllacyon is whā the herbe bereth floures & the fyrst lyrel stalke to here as the floures hangeth on shal beto gyder plucked of/chopped and distilled in balneo marie. The water of the floures is not so strong as the water that is distyllid and dzennyd of the herbes but it is moze gentylper/and therfore serueth to the subtyll persons which be gentyl & noble of complexion. **I** An ounce dronk in the moynynge and at night/at eche tyme. **xxi.** or. **x.** dayes contynuyng causeth good and cleue blode **B**
 Of the same water dronke thze or foure weekes causeth mery hart & greate reioyng and withd^{ry}ueth the heuynes and frenesy. **Ther**

fore it is one of the moste woorthye water agaynst the melancolpe/

C The same water drōke two ounces or two ounces and a halfe in the moynnge/at none and at nyght. **ii.** or. **iii.** dayes durynge is good agaynst styches about the harte **D** The same water dronke an ounce at euery daye p^{er}serueth the body from leprousnes **F** Drōke of the same at nyght. **ii.** or. foure tymes in a weeke is good agaynst paralytis **F**
 The same water dronke an ounce at euery nyght is good agaynst all flosdes couynge of the hede **G** Against hote arces or hote sekeneis is good to be dronke of the same water. **iii.** tymes in a daye at eche tyme an ounce or an ounce and a half **H** The same water dronke. **x.** or. **xii.** dayes contynuyng/ in the moynnge/at none & at night/at eche tyme an ounce or an ounce and a half/ is good agaynst the yelow Jandys/named Ictericia in latyn. **I** Thre dayes contynuyng dronke of the same water. **iii.** tymes in a daye/at eche tyme an ounce and a halfe slaketh all hete of the lyuer. **R** The same water dronke is good for persons that neuer be bled to let blod/because it purifyeth and clefeth the body of the noughty and destroyed blode. **L** Drōke of the same water openeth the veynes and all the membres.

The water of Benquale ca. xviii.

I *Uliquiamus* i latin/ *Hengua*
 other wyse. this herbe is of
 two maners/ the one bereth whyte
 sedes/ and the other blacke sedes/ &
 the black sedes be vled in medycyns
 The best part & tyme of his dystylla
 cyon is the herbe/ rotes and floures
 all to gydye chopped/ stamped/ & dy
 styllled aboute saynt Iohn's daye at
 mydde somer. **A** The same wa
 ter is good for them that haue vna
 turally reste inwardely or outwar
 dely of their bodye/ or hede/ the tem
 ples often tymes amonge enoynted
 therewith & cloutes wet in the water
 & laid vpon the temples/ than cometh
 the persō to his naturall & cōueniēt
 reste. **B** The same water with
 dryueth all payne of the hede comig
 of hete/ the hede therewith rubbed &
 vled as befoze is sayde **C** the sa
 me water causeth wel to slepe/ whā
 the fore hede and the sleppng vayne
 is enoynted therewith **D** The sa

me water withdryueth al hete/ whā
 the or foure double cloutes be wette
 in the same water & layd ther vpon

E The same water loseth al pay
 nes of the membez/ cloutes wet in
 it & often tymes layd there vpon.

F The same water occulteth
 & hideth the pynples and reddenes of
 the leppy in the face/ and the face beco
 meth clere/ whan it is oftē washeth
 therewith **G** It is also good agāst
 an hote membe/ the membe often
 rubbed with the same water/ & thā
 it softeneth & slaketh all vnnaturall
 hete.

ge against swellynge/at eche tyme
an ounce & a halfe/ **O**r for him that
is swollen/a linnen clotote wet there
in and wronge out agayn somwhat
and layd on the swellynge **E** Lu
ke warme dronke of the same in the
mornynge/at none/and at night.iii.
or foure dayes contynuyng/at eche
tyme an ounce & a halfe/or two oun
ces is good agayn chynkyng in the
bely and the gobote in the guttyes.

F The same water healeth all wound
des whan they be wasshed therwyt
in the mornynge and at nyght and
clototes wet in the same water and
layde there vpon **G** the same wa
ter healeth the canker in the same ma
ner wasshed & wet cloutes layd ther
on **H** Also the same water he
leth that eyll soze/named noly me
lagere wasshed therwyt in the mor
nyng and at nyght/and cloutes wet
in the same and layd vpon it.

I It is good dronke in the mornynge
and at nyght/at eche tyme an ounce
and a halfe agayn the hote flode in
in the tymmes whiche be scabby **K**
the same water is good agayn all
etyng and bytyng sozes/specially on
the womens brestes/ruery day i the
mornynge and at night wasshed ther
wyt and lynn cloutes wet in the sa
me layd ther vpon.

Of the water of the rote of floure
deluce purple,

Ca xx.

R Adices Iris in latyn/ the
best parte and tyme of his dy
stilacyon is/the rotes small chopped
& dreyed in the marche aboute the
day of saynt Gertrudis **A** Cloutes
wet in the same water in the mornig
and at nyght is good agaynste all
swellyng whan it is layd there
vpon **B** In the mornynge/
at none and at nyght dronke of the
same water at eche tyme halfe an
ouce and a quarter of an ouce/war
meth/ dreyeth/weketh/ and causeth
the breste to be temperate/ **C**

Et purifyeth the longues whan it is
drunken in the maner befoze sayde.
D It is also good dronk for to cor
sume the yll and grosse humours **E**
It clenseth the vncleane sozes and im
postumes in the mornynge & at nyght
wasshed therwyt **F** **O**f the same
water dronke in the mornig/at none
& at nyght is good for the chynkyng
i the bely **G** the sam lasketh the wo
be/dryth at eche tyme.iii.or.iiii. ouce

The same water dronke thre tymes in a daye, at eche tyme an ounce and a halfe is good agaynste the dropsey & causeth to lose the yelowe water. **I**t is good for bytynge of bettys/washed therewith in the mornynge and at nyght/and also dronke. **T**he same water dronke in this maner/ is good for the mylt. **I**t is also good to dronke agaynste apres or febrs. **T**hre tymes dronke of the same water in a daye at eche tyme an ounce & a halfe prouoketh the floutes in women. **T**he same water dronke as before is sayde & stowed ouer the brythe of the same water /is good agaynste the payne of the moder or martyre/and agaynste the stoppyng of her mouth. **T**he same water is good agaynste the payne Impegnis/ spottys and vncleines of the skynne washed therewith thre tymes in a daye. **T**his water put in the eye taketh away the spottis & scelles of the eye. **T**he hede washed with the same water causeth to growe the here. **T**he same water a longe tyme holden i the mouth is good for unpossumyng and payne in the gommes. **A**lso the same water pulleth out broke bones and other thynges hyden in the body of a person whan cloutes be wet in the same & be layd ther vpon. **I**t is also good cloutes wet & layde on the syde for payn in the syde. **T**he water layd in the same maner before is good for payn in the hyppes named Sciatica in latyn & the same water dronke, iiii, tymes in a day

is good for the strangury or dropell yssle named stranguria.

Water of the sedes of floure deluce purple ca. xxi.

Semen Iris, the sedes of floure deluce purple shall be distilled onely in balneo marie. **T**he same water is good dronke oft tymes for hym that hath lost his speche for it causyth it to come agayne. **W**ater of byrtche leues ca. xxii.

Iber in latyn, the best part is a tyme of hys distillacyon is the yongest leues chopped sliced and distilled. **W**ater of the same water dronke in the mornynge & at nyght at euery tyme two ounces is good agaynste grauel in the lymmes and raynes. **T**he same water is good agaynste all hote places and dysseases in the membrs.

And specially for the verbe of the man/whan cloutes be made white

In the same and last poult two of
the partes in a daye

¶ Of the byrtche Juice water.
Capitulum.

In the mape shall be perced
an hole in a byrtche tre/ and
is there under a glasse or an
other vessel/ & there out wyl com so
water/ and that water ye shall dy-
stiller. **¶** The water of byrtche Juice/ is good to all
woundes washed therwith/ & clou-
tes wette therein and so layd upon
the woundes. **¶** The same water
dyeth al open sores washed ther-
with/ & cloutes wette therein & layd
ther upon.

¶ The water of Scrofularia
Capitulum.

¶ Scrofularia in latyn. The
best parte & tyme of his dy-
styllacyon is/ the roote wal-
shed/ and the leues stroged fro the
stalkes and so togder distilled.
¶ Sores & pyles on the sodamer
lyke brattes washē with the same
water and in the mornyng and at
night at er the tyme dronke an ounce
of the same water is very good for
it. **¶** It is also good that the faces
which loke as they were leprous.
were washed with the same water.

¶ Of the water of portelapne
Capitulum.

¶ Scrofularia in latyn. The best
parte and tyme of his distyl-
lacyō is the herbes/ and the
stalkes chopped togder & distyl-
led in the ende of may. **¶** Water
of portelapne dronke in the mornyng
and at nyght thre or four days con-
synnyng/ at eche tyme an ounce/ or
an ounce and a half is good for a per-
son that spitteth blode or hath the blo-
dy fluxe. **¶** The same water bled
in the foresaid maner stoppeth al ma-
ner of lastyng & to moche goyng
to the stole. **¶** The same water of
ten tymes dronke an ounce/ or an
ounce & a halfe wyl hdyueth the
hote & drye cough. **¶** Distilled
of the same wat & the temples enoynt
therwith causeth well to slepe

Thesame water is good agayn
the hete i the lyuer/whan it is drōk
in the moynge/ at none and at
nyght/and hempen to wet there
in & without layd on the lyuer

It is good to be drōke wth the
ponge chyldren in the moynge
and at nyght/ at eche tyme an ounce
for the hete & for the woundes.

Porcysen water drōnk in the
moynge/ at none/ & at nyght/ at
eche time an ounce taketh the hete
And in the same maner it is good al
so agayn the pestilence.

In
an ounce of porcysen water wet
a nyght long ten geynes of barley
wreht the sedes of pillie/ and thā a
spoge wet theri/ and therewith tou
ched and scrybe upon the tongue. iii.
or four tymes in a day/ helpeth the
twell/ whiche the tongue is become
blacke in hote sykenes.

The
same water is good for to cole hote
blode/whan it is drōke/ and myr
ced in the drynk/ And withdryueth
also the payn in the bladder.

It drōnk among withdryueth the
dry cough comyng of hote seknes.

Of the water of burnet. ca. cxi.

Pipinella in laryn is of two
maners. The one hath a small stalk
about a cubyte of length with a
small whyte flour/ and a rote shar
pe of taste. The other is named the
great pympinella or burnet. The
best tyme & parte of the dystylla
cion is the smal burnet or pipinella
whose rote is sharp of tast/ the herb
& the rote with her substance chop
ped togyder and flaped and so dy
stilled and specially they that grove
in drye places/ or on hilles and mo
tayns. **T**he same water is good
to be drōnk agaynst the stone/ in the
moynge and at nyght/ at eche ty
me an ounce and a half or two oun
ces. **W**hen it is drōnk i the
forsaid maner it is good agayn the
stone and gravel in the lymnes/ or
in the bladder and clefeth the rayns
in the back and lymnes. **T**he
face ofrē washed therewith and the
hades scryme also in the moynge

and at nyght/ and let it dye agayn
by hym self/ causeth the face and han
des to be fayr. **D** Dronke of the
same euery mornynge and at nyght
is good for the pestilence. **E** Water
distilled of the gelysted pumptneilla
or burnet/ and dronke of it. xiiij. day
es contynuyng ones in a daye at
eche tyme thre or foure ounces/ is
very good to be p̄serued of the pesti
lence/ and the more the apte be infec
te the oftener ye shall drynke/ **F**
The water of burnet or pumptneilla
rotes is good to be dronke for womē
which haue to colde a mother in the
mornynge and at nyght/ at eche tyme
an ounce or an ounce and a halie/

G The same water soden with
Castoreum/ and so dronke. it. dayes
contynuyng/ euery daye an ounce
withdrueth the gout. **H** It is
good to be dronke for women/ for it
prouoketh theyre floure/ **I** Who
so drynketh two ounces fastynge of
the same water is p̄serued the same
daye from all vnnaturall sekenesse/
bycause it taketh away all yls & im
postumacions from the harte **J**
Of this water dronke among/ with
drueth all euill moystour out of the
body/ and caueth well to pyffe/ and
withdrueth all the moystoure out
with the bryne. **K** Water of the
same onely distilled of the rotes/ is
good to be dronke for venym and im
poisonynge.

L Of the water of wyld perunyke
Ca. xxvii.

P Erutina agrestis in latyn.
The best parte and tyme of
his distyllacyon is/ the leues stroped
from the brāiches wher he groweth
in the same yere in the ende of the ma
ye/ **A** water of the same is good
for the swellynge of a mānys perde
whan the same is made warme &
cloutes wet therin and so wrapped
about the perde/ or spouted therin tyl
it be hole **B** The same water he
leth holes and ytychynge of the perde
whā it is dōk in the mornig/ at no
ne/ & at nyght be washed therewith/ **C**
The same water heleth the holes
& sores on the secrete of womē whā
they be oftē times washed therewith/ **D**
The same water is good agāst
etyngge sores/ and all other sores in
the mouth washed therewith. **E**
Perunyke water heleth the syllule
whan he is kylled before/ two or thre
tymes in a day washed therewith.

M Of the water of the flours of wy
de perunyke. Ca. xxviii.

F Los perutina agrestis in la
tin. The best part and tyme of
his distyllacyon is/ in the begyn
nyng of octobre **A** The same wa
ter is good to be dronke agāst the
dye cough/ and for helthe of the lon
gues **B** The same water heleth
woundes/ byles/ and euill holes or
sores/ whan they in the mornynge
& at nyght be washed therewith **C**
It heleth also the canker/ whan it is
washed therewith/ and than cloutes

wet in the same and layde vpon it
And tohan ther be put in a pounde
of the same water halfe an ounce
powder of allume resolved than it
heleth euyl blaynes tohan they wyl
rotte. **C** It is also good agaynst
the etynge sores in the mouth and
on the secreete of women. **I** It is
also good agaynst the foule gommies
washed often therewith

the payne in the hede comynge of col
de / take a foure folde clothe wet there
in and a lytell wzonge oute agayne
and ſo layde rounde aboute the hede
ſo often tyll it be gone / B A
body drynkyng an ounce & a halfe in
the moynynge ſhall get nothyll the
ſame daye. C water of the ſame

C. iii.

is good to be drōke for thē that haue
the hote arces/ & a cloute wet therin
& layd ouer the brest whan the hete
is comyng/ for it coleteth all the quar-
tayue arces **D** Drōnke of the sa-
me two times in a day/ at eche tyme
an ounce & a halfe withdrineth the pay-
ne i the hede **C** Of the same put
in the eye an hour before the nyght
causeth thē to be clere. **F** It is a ve-
ry cosely water for to hele yll sores
whā they be washed therewith i the
mornynge & at nyght/ & cloutes wet
in it and layd therbpō **G** It stop-
peth the teares & rōnyng of the eye
whā the same water is put at night
in the eye **H** Luke warme drop-
ped of the same in the eares softeth
the payn of thē/ **I** In the mor-
nyng/ at none/ & at nyght drōke of
the same water at eche tyme an ou-
nce & a halfe/ is good for thē that pyl-
seth with payn/ for it prouoketh the
bryne **K** This water drōnk i the
same maner is good for the stone in
the bladder. **L** It openeth the
stoppynge of the lyuer whā it is drō-
ke in the maner aforseyd **M** Two
ounces drōke at eche tyme in the mor-
nyng/ at none/ & at nyght is good
agaynst dypsy **N** Whan it is drō-
ke i the mornynge fastyng/ & at nyght
goynge to bedde helet h woundes out-
wardly & inwardly/ to yonge & olde
pstone/ & it couereth oute thurgh the
woundes. **O** Drōk of the same.
iii. oz. iii. weekes euery day i the mor-
nyng/ & at nyght/ at eche tyme an
ounce & a halfe/ oz. ii. ounces causeth
to get a fayr colour myrred with so

me redenes whiche was pale before.
P It is also good drōnk in the ma-
ner before/ for thē that haue moche
moistnes i their body/ & withdrineth
many payns fro the stomake/ by cau-
se it cōforteth the stomake & causeth
good dygestyon **Q** Drōnk of the
same in the mornynge/ and at night
taketh away the walmig & sperryng
& vncleues i the mouth **R** In the
forseyd maner drōnk of the same wa-
ter softeneth & clenseth the brest & the
lōgues. **S** Drōnk of the same
in the maner aforseyd is good for a
moyst myle/ for it clenseth the myle
T In the mornynge & at night drō-
ke of the same at eche tyme an ounce &
a halfe/ is good for thē that to hette &
crasseleth with the tēthe **V** In the
forseyd maner drōk the same is good
for the olde coughe/ and narrow brest
& coughyng **X** In such maner drō-
ke of the same is good for the yelow
Jaundis named ictericia in latyn.
Y Drōk of the same in the mornynge
& at nyght at eche tyme. ii. ounces clen-
seth & prouoketh the floure i the wo-
mē. **Z** viii. or. x. dayes drōnk of the

and cloutes wet ther in & layd vpo
the bytyng. EE The same dron
ke in the mornynge fastynge at eche
tymetwo ounces softene the brest
FF in the mornynge and at nyght
dronke of the same at eche tyme an
ounce is good for the payne in the
hyppes / raynes / and in the bladder
GG Drouke of the same in the mor
nynge and at nyght / at euery tyme
an ounce and a halfe is good for spe
tyng blode and water / compng of
the brest and longues. HH Kepeth
the same in the mouthe it helpeth a
gaynst the payne in the tethe. II
The same bled is good for the gutte
in the fete named podagra / whan
it ys ofte rubbed therwith and clou
tes wet therin / and layde ther vpon
KK Drouke of the same water
thrice in a day at eche tyme an ounce
and a halfe is good agaynst bytyng
of a madde dogge and cloutes wette
in the same and layd thereon / and al
so it pulleth out broken bones.

Water of echen leues. Ca. xlii.

¶ Oua alnuu latyn. The beste
tyme of his dystyllacyn is in
the end of may. A The same wa
ter is good agaynst the partnets /
whan the here is shauen and ther
with washed and lette drye agay
ne by hym selfe / than they dye and

fall of.

Water of braba hircina.
Capitulum.

clii.

Raba hircina in latyn. The
beste tyme of his dystyllacyn
is / the herbe with the stalkes
& rotes chopped to gydder & dystyl
led whan it bereth floures & that
is in the month of June. A The
same water dronke in the mornyn
ge and at nyght at eche tyme two
ounces is good for the stitches in the
syde.

Water of blacke beryes. Ca. xliii.

¶ Ora bacci in latyn. The best
tyme of hys dystyllacyn is /
whan the beryes be fully ripe but
not softe / than they shall be plucked
of and washed and the water drop
ped of agayne and so dystilled. A
The same water dronke in the mor
nynge and at nyght at eche tyme an
ounce is good agaynst the stone in
pöge chyliden. B The same also
is good agaynst the stone in the lym
mes and in the bladder. In the for
sayde maner bled. C It is also
good to be gorgwoled agaynst bus
la that is the spene in the throte. D
The same is good also four or fyue
tymes in a day agaynst the imposu
myng / and other dysleases in the
throte.

Water of poley.

Ca. xlv.

Pallegium in latyn. The best
tyme of hys dystyllacyn is

all the herbe chopped whā it bereth
floures/and so dysllyled. **A** The
same water dronke in the moznynge
and at nyght/at eche tyme an oun-
ce is good for women whiche haue
to colde a moder. **B** Dronke of
the same two or thze dais/two times
in a day it prouoketh the floures in
women/ys it be in the tyme conue-
nyent and comyng of the floure. **I**t
shal beknowē that i womē shall not
be prouoked the floures but in the
ryght ozdre and tyme that they were
wont to haue it. Therfore all waters/
serupuge to the same shall be dronk
whan the woman weneth that she
shall haue her floure/oz whan it be-
gynneth somwhat to aspere. **C** It
is good dronk two tymes in a day at
eche tyme an ounce for them that spit-
terh blode/ pylleth blode/oz shyterh
blode. **D** The same is good put in
the eye agaynst tering eye/ & is good
agaist al dysseas of the eye/ a cloute
wet in the same & layd vpo the. **E**
Thys water purifyeth the eye/ it co-

forteth the syght/ & taketh away the
hete & the payne/ whā it is put ther
in an howre befoze oz ye go to bedde
for to rest/ & in the moznynge dronke
an ounce & a halfe/ & thertwoth the eye
enointed rounde about & cloutes wet
in the same & laid ther vpo. **F** Thre
ounces drōke of the same is good for
women to hyche be myscaryed of the
mydwyfe in the byrthe of her chyld
& the after berthe that is the secundy
na is ynough departed from her as
it therto belogeth. **G. ii.** offices dron-
ke in the moznynge & at nyght heleth
the rente whiche shortly is come/ na-
med ruptura. **H** Of the same wa-
ter dronke lytel oz moth/ is hinderful
to the womē that bereth chyld for it
causeth the chyld to be bozne befoze
the tyme ozdred/ & thys haue I wry-
ten that euery good & honest women
shall take hede for hiderannce of the
same. **I** Drōke of the same water
falsyng & at nyght goynge to bedde
causeth to be thine the thycke slimy
water in the brest. **K** The same wa-
ter dronkin the maner befoze said is
good for the that waloweth & pbra-
keth/ & cloutes wet therin & a lytell
wroge out agai and layd vpo the sto-
make. **L** Drōke of the same in the
same maner wythdryueth the blacke
colera/ that is melacolye and takyng
thought/ & heuenes at the harte not
knowig wherof. **M** Dronke of the
same in the moznynge & at nyght at
eche tyme an ounce & a halfe/ oz two
ounces wythdryueth the serpyng
in the bely. **N** In the same maner
dronk of it wythdryueth the venym

the same water every daye. R. oz. iij.
 ounces & shall be layde thereon also at
 every day thowse thā it shall be heled
 ¶ Two ounces Dronk at eche tyme
 of the same salpynge in the morning
 & at nyght is good for stragury. R
 Twyse in a daye washed with the
 same taketh away the pteche. R
 Of the same water shall be gyue to
 a womā labouryng of chylde for it is
 good for the woos of her & causeth
 the byrthe to be soner & lyghter. R
 It is also good for the colde flode in
 the hede oz in the nose Dronk in the
 morning and at nyght at eche tyme
 an ounce and a half & twyse in a day
 the hede enoynted therewith. C It
 bled in the same maner with daisyeth
 the olde skenes in the hede. R For
 the colde moynoure in the eares the
 water is good to be put therein. R
 It softeth the goute podagen in the
 fete therewith rubbed and lard therō
 ¶ A cloute wet in the same & layde
 vpon the nose stoppeth the bledyng at
 the nose. R A Whyte clout wet in
 the same is good for the inward gout
 te oz paralisis / whā the members &
 swellynge be wapped aboute woth
 the same clout & whā it is drye thā
 it must be wet agayn. B The fa
 ce washed often therewith causeth to
 be fayre. CC The same water ta
 keth away the frounces in the face
 whā it is rubbed therewith.
 Of the blew vpsflowres. Ca. l. i. b. i.
 I. Loxes frumenti vel flozes si
 liginis in laryn. The best tyme
 of theyr dysyllacpon is in the ende
 of June. A Kede wē with the im.

podumynge shoulde be washed with
 the water of the same / thā they beco
 me hole & fayre agayn. B Of the
 same water put in the eyen at nyght
 an houre or ye getteth bedded with the
 spottes oz lymme vpon the eyen &
 maketh them clein. C It is good
 for to washe the fistules with the sa
 me water twyse in a day & cloutes
 wet therein & layd vnder the fistule. B
 The canker washed with the same
 twyse in day / and cloutes wet in the
 same water and there vpon maye
 causeth it to be le.
 Water of blew vpolettys. Ca. l. i. b. i.
 U. Jola in laryn. The best tyme
 of theyr dysyllacpon is / the flou
 res onely and nat the herbe dysyllid
 per alidich but i mathe. p. p. de be re
 to dysyll the herbe dysyll it thynge
 an helme in the maye.
 A water of the same blew vpolettys
 is good to be dronke & the dysyll maye
 ed therewith agaynste the helte of the
 pestilence. B Cloutes wet in the
 same and wapped aboute the pda

grato hā they be dryethā wet agayne
and layd rounde aboute so often till
it is flaked & the payngone. **C** Of
the same water drōke in the mornig
at none & at nyght / at eche tyme an
ounce & a half softenerh the body / &
causeth the bely to be weke. **D** In the
same maner drōke coleteth the hart. **E**
The same water put in the ype / and
enoynted therewith taketh away the
payne in the ype / & stoppeth the flode
comynge of hete. **F** Dronke of the
same in the mornynge / at none & at
night / at eche tyme an ounce & a half
& cloutes wet in the same & layd out
warde on the lyuer coleteth the lyuer.
G The same water drōke in the ma
ner before said purifieth & clēseth the
moder / & wythdryueth the impossu
mynge of her. **H** Of the same wat
drōke thre in a daye cōtynuyng the
tyme of ii. monethys & the hede enoi
nted therewith & let drye by hym selfe
again is good for the that haue lost
theyr wytt thugh ouer moch thyngkis
& fume. **I** It heleteth the piles in the

fondamēt to hā they be washed ther
with thre in a daye & cloutes wette
in the same & layd there vpon. **K**
Drōke of the same i the mornig & at
night at eche tyme ii. ounces is good for
the hote dry cough. **L** The same wa
ter washeth some the pyles on the fū
damēt / to hā cloutes wet theri be lay
de vpon the same. **M** In the mornig
& at nyght drōke of the same at eche
tyme an ounce is good for the payn of
the mylke. **N** The same water drō
ke heleteth the thirst & is good for the
hote stomake. **O** Cloutes wet in
the same water & laid vpon the eres
wythdryueth the piping in the eares.

nes and wozettes of the foundamēt
in the mornynge and at nyght refres
hyd/is good for it/ And it is to be
knowen that the blainnes & the wozet
tes be consumed in fourte dayes yf
they be not to olde/ but yf they be
withyn the foundament that they cā
not become by/than the water must
be spouted therein/and the payente
shall be layde two or thre dayes in
such maner that the wat may abyde
withi/ & he that hath the same with
i his body shal drinke the same water.
Of moder woxt water. ca. clxlii.

A *Artemisia mater herbarum*
in latyn. The beste parte and
tyme of his dystyllacyon is. The le
ues stroped of the rede. *Artemisia* &
dystilled in the ende of maye. **B**
Dronke of the same water in the
mornynge/ & at nyght/ at eche tyme
ii. ounces prouoketh the floures i wo
mē. It helpeth whā the body is enoi

therwith se the nauell downwarde

B In the same maner dronke
purifyeth & cleseth the moder **C**
When a woman laborynge of chyl
de dryneth an ounce of this she shall
the soner be deliuered **D** A wo-
man haupnge a dede chylde by her
drynkynge an ounce and a halfe / or
two ounces of the same water shall
anon be deliuered of the same dede
chylde. **E** The same water heleth
and withdryueth all the dysleases of
the secretes of women / if it be swel-
lige or of other dysleases whā they be
wasshed therwith / **F** Dronke of
the same at eche tyme an ounce and
a halfe easeeth the coughe / **G** It
is good to be dronke for them which
pylle with payn **H** At euery day
dronke / thyrse in a daye at euery ty-
me an ounce and a halfe. **xxx.** or four
ty dayes cōtynuing / is good against
the stone / **I** The water dronke
in the same maner also sayd .viij. or .x.
dayes cōtynuing is good agaynst
the pelotwe Jandys **K** .viij. or .x.
dayes dronke of the same in the mo-
nyng and at nyght / at eche tyme an
ounce and a half / or two ounces war-
meth the moder in the women / whā
she hath taken colde. **L** Foure ty-
mes in a daye / dronke of the same at
euery tyme an ounce and a halfe / or
two ounces / foure or syx dayes cō-
tynuing is good agaynst benygn.
M yf a body can not slepe and had
loste his restethan he shall be rubbed
wyth the same water on the baynes
of the temple / therwith he shal beco-
me sleppenge **N** Dronke of the sa-

me in the moynyng and at nyght at
eche tyme an ounce and a halfe / or
two ounces is good agaynst dropse
O The here often washed with
the same water is good for the wo-
mes in the heres **P** When the fa-
ce is washed with the same wat it
causeth the herde to growe **Q** An
ounce and a halfe / or two ounces of
the same water drōke in the moynyng
and at nyght conforteth the breste /
and the colde stomake. **R** Two or
thre tymes rubbed the wery mēbers
and let drye agayne by hym selfe / is
good for him that is wery of goyn-
ge.

C Great plantayn water / Ca. xlii.

P Letago maior in latyn. The
best tyme and parte of hys dy-
styllacyon / is the rote and the herbe
with all hys substaunce chopped and

dyttilled in the ende of the maye.

I Great playntayn water dronke in the moynynge & at nyght/at eche tyme two ounces. xij. dayes cōtinuyng is good agaynst droppe.

B Dronke of the same water four spoones full at nyght/is good agaynst the hote cough.

C Cloutes wet in the same & layde on swellynge cōmyng of hete is very good.

D In the moynynge and at nyght drinke of the same water healeth the blaynes cōmyng of hete/oz where hete is about.

E It healeth the brennynge on the body/whan cloutes wetted therein be layde vpon it.

F Dronke of the same in the moynynge and at nyght/at eche tyme two ounces is good for the bloody fluxe and for other fluxynge oz dysenteria/ but pyncypally for the rebe fluxe/whan an ounce of the same water is myxed with Solo Armeno and with lapide ematris of erbe a dragma/ and dronke in the mawe before speyfyed.

G The same water dronke in the forsayde maner stoppeth the whete laches/ named Alerteria/ and stoppeth also grosse and ouer moche humours and moystoures in the body.

H The same water healeth all maner of impostumacyng/ wether they be beten/oz come othertwys/whan there be layde on cloutes wetted in the same water/oz the water be spownd therein.

I The water taken and kepte in the mowthe healeth all woundes and sores in the mouth/ and healeth also the gommies.

K Thys in a day dron

ke of the same water/at eche tyme two ounces. xij. dayes cōtinuyng/ healeth the fluxe that is a herte cōmyng of the lunges.

L And euey day the greule wot shed in the same water and put therein/ cōsisteth to be hote.

M The same water healeth the paine in the eares/ wether the paine of the

N The same water healeth the wynde fluxe/whan cloutes be layde thereon wet in the same.

O The same water of it put in the eye/ with dryneth the wechynge of the eye.

P Whan the same water is kepte a long tyme in the mowthe/ it loryth dryneth all swellynge and other diseases of the gomme.

Q Often gargoled with the same water and taken in/ healeth all diseases in the throte.

R Thys in a day was shed the fluxynge of a leprose oz of a woman/ and cloutes layde there on stayed in the same healeth it wryth out harme.

S Therfore dronke of the same at eche tyme an ounce and a halfe oz two ounces is good agaynst berem.

T Dronke of the same water in the moynynge & at nyght/ at eche tyme an ounce. xij. dayes cōtinuyng/ healeth surely the fallynge schenes.

U It is good dronke for them that hath care. oz hath in his body any wechacyon.

they shal dronke the tyme in a daye of the same water/ at eche tyme an ounce and a halfe four oz five dayes cōtinuyng/ after that they shal take a stronge purgacion.

V It is also good agaynst the scabfull meat

II Two or thre ounces dronke of the same canker so sweete. **II** Wet mosty woundes washed with the same water in the morninge & at nyght and cloutes layd thereon wet in the same healeth the woundes. **II** Agaynst the payne in the mylke is good in the morninge and at nyght at eche tyme to be dronke an ounce of the same water. **II** Cotton wet in the same and layd upon a bleeding wounde stoppeth the blood. **II** Whan a body is bten of a rabbe dogge that is good the wounde to be washed with the same water & cloutes wet in the same & layd thereon in the morninge and at nyght. **II** Agaynst the dykeales of the bladder and raines is the same water good to be dronke at morninge and at nyght at eche tyme an ounce and a halfe. **II** .x. dapes continuinge. **CC** Of the same water dronke in the morninge fastyng at eche tyme an ounce and a halfe is good for the woyme in the body named the spole woyme. **DD** It is good to be dronke for the acres in the morninge fastyng two ounces or the acres be continuinge because it easeth & withstandeth al acres and febres principally whan it is dronke the dapes continuinge fastyng. **EE** An ounce of the same water myxed with holo Armenio and lapide Cinatilis and so dronke in the morninge at none and at nyght stoppeth the flode in women. **II** Dronke of the same helpeth and provoketh to the moder. **GG** Dronke

of the same water two ounces. **II** .ii. ounces and a halfe dyeth the after byrthe named secundina. **II** The same water is good agaynst the unnatural continuinge here cloutes wet therein and layd upon it. **II** Great plantayn water dronke and cloutes wet in the same & layd upon the pylle on the right syde and it of ten tymes bled causeth to banyshe the pestilence. **II** Two or thre folde of cloutes wet in the same water and layd on the plaster of a wounde or boder two or thre fingers than the plaster is and it bled two or thre tymes in a dape two or thre dapes continuinge preserveth the wounde from swellinge / impostumacions and of all other euill accidents. **II** Whan with the same be washed any sores in the morninge and at nyght taketh awaye the eatyng round about the sores. **II** The same water easeth the wolfe comynge in the thigh of the legges. And is also agaynst the eatyng & gnawynge or corrotyng of the same whan it is washed & cloutes wet in the same water thereupon with the ryght stuffe whan theri is lober. **II** Balsame nutis / cipresse / Silie / robalisam / Carpopallam / Alumine / iuccurinum of eche a quart of an ounce / Caster a dragma and of the waite a pounce. **II** The same water is good agaynst all the eatyng & gnawynge sores & causeth to growe fleshe in the fistules and other lyke as impostumes and other corroyue sores be wherem as nedeth to growe fleshe

whā the sores in the moynynge & at
 nyght be washed therewith. **Q**
 washed the syllule in the fondamēt
 with the same catoweth hym to hele.
pp Othe times take the same and
 hepte in the mouthe heleth all the im
 postumacions and blaynes in the
 mouthe. **Q** The same water
 dronke in the moynynge & at nyght
 at eche tyme an ounce & a halfe oz. ii.
 ounce & woth a spout oz. dysster spou
 ted in the fondamēt easeth the consu
 myng gutte. **R** The same is good
 agaynst the shode & bledynge of the
 golden bayne / and the euyl wozartes
 in the sōdamēt / whā they be bledynge
 than shalbe layd thereon cottō wet in
 the water two oz. thre times in a day

ss Thre in a daye lay
 be the same water on the euyl blay
 nes / easeth them. **tt** Impostuma
 rions washed in the moynynge & at
 nyght with the same water / & clou
 tes wet therein & layd vpon the same
 heleth the impostumacions.

Great platayn sedes water. Ca. l.

S Emē plātaginis maioris in
 latyn. The best tyme of hys
 dysstylacyon is / in the tyme as the se
 des be rypp & dysstylled with the stal
 kes. **A** The same water stoppeth
 the blode in woundes / and at the no
 se / at eche tyme dronke two oz. thre
 ounces & cloutes wet in the same & lay
 de on the woundes / & a wyke oz. ten
 te of cottō wet therein & put in the no
 se / & cloutes wet in the same & layd
 vpon the forehede.

Water of great plantayn floures.

Capitulum.

li.

Capitulum lviii

A monilla in latyn. The best tyme of hys distyllacyon is/

the herbe and floures chopped to gyder and distyllid in June. **A** Of the same dronke in the moynge fastynge/ and at nyght goynge to bedde/ at the tyme anounce or two eal/ eth the payne in the wombe. **B** The same dronke as before is sayde fyre or viii. dayes contynynge/ is good agaynste the goute in the guttes. **C** It is used in the same maner is good agaynste the chynkynge in the hely. **D** The hede/ the brayne/ and the temples of the hede/ annoynted with the same/ and layde agayne by hym selfe/ comforteth the hede and the brayne. **E** Water of Camomell warmeth the colde hede he is naturally/ when the hede is rubbed therewith/ and draweth out the same an ounce in a daye sogeth the payne in the hede. **F** Water of camomell ii. or. viii. dayes dronke an ounce/ or an ounce/ and a halfe is good agaynste the pelowe/ and is named Jactitia. **G** Dronke of the same two or thre tymes in a daye & rubbed therewith the werry members/ & let dysse by hym selfe is very good. **H** Dronke of the same two tymes in a daye at eche tyme two ounces/ is good for them that pisse with payne. **I** Every day in the moynge & at night droke at eche tyme an ounce & a half. or. x. dayes contynynge breaketh the stone in the raynes & bladder. **K** Two tymes dronke of the same in a daye at eche tyme an ounce & a halfe is good for a short bre the named asma. **L** The same dronke as afore/ purgeth the floure/ & wound

Every daye dronke an ounce a
a half. but. dayes contynynge day
ueth oute frome the moder the dede
chylde. **A** Two tymes dronke
in a daye of the same water at eche
tyme an ounce and a halfe/and the
backe enoynted therewith is good
agaynste the arces **D** Dronke

an ounce/two tymes in a daye ope-
neth the stoppyng of the luer & mple
te **D** Of the same dronke as be-
fore is sayd withdyueth and consu-
meth the stony water of the moder

D It dronke in the same ma-
ner withdyueth the payn of the mo-
der in women **B** The same wa-
ter is good agaynst the sores on the
secrete membyres of men & women
two tymes washed there with in a
daye **S** Dronke of the same two

tymes in a daye eyght or ten dayes
contynynge conforteth the stoma-
ke/and stoppeth the swellng of the
same stomake. **C** The same wa-
ter is good for men and for women
whiche haue sores vnder the armes
or on the legges a cloure wet in the
same water/and layde on the sore
breause it slaketh the hete/ it softe-
neth the payn/and it dryeth & healeth

A The tymes in a daye dron-
ke of the same water/at eche tyme
stoppeth the whyte laske/named lie-
teria **r** Dronke of the same wa-
ter in the same maner before sayde is
good agaynste the impostumng of
the loyngnes **y** The same dronke
as before helpeth them which com-
playneth of the luer **z** The same
water healeth the byrtnge of a let-

pent / dronke in the maner before
sayd/and two tymes in a day layde
vpon it doth eswet in the same/

A In ounce dronke of the same
water every morninge/ healeth the
leppe **B** Strykyng woundes
washen with the same water/den-
seth them and wythdriurth the euyl
smellynge **C** The same water

is very good to conforte the stoma-
ke **D** Dwyth dronke of the sa-
me water in a daye/at eche tyme an
ounce/warmeth naturally the colde
stomake **E** The same wa-
ter is good for them that getteth col-
de in the bones and mary the leg-
ges and armes often rubbed there-
with/ and let dye agayne by thyn
selfe/

water of Cardo benedictus. Ca. 11

A rdo benedictus in latyn.
The beste parte and tyme of

his distillacion is the leues chop-
ped and distilled in the ende of the
Maye. **A** The same water drinke
in the moynynge & at nyght/at eche
tyme an ounce. **r** or **xl** dayes con-
tynynge/ causeth the payn in the hede
B The same water drinke in
thesame mesure is good against the
payn comynge in the hede aboute the
eye/ named Epitranus/ that is wha
a bodye dyeth that a mayle is be-
ten thynge his hede. **C** The
same water drinke in the moynynge
fastynge/ and at nyght/ at eche tyme
an ounce & a halfe/ two or thre mo-
nethes contynynge/ causeth good
memory/ and conforteth the remem-
braunce. **D** The same water
drinke in þe same maner taketh away
the swoynynge of the hede. **E** The
water drinke in the maner aforesayd
conforteth & strengtheneth the bray-
nes. **F** It is good for the tyeen wat-
shed therewith ones in a day/ & in the
moynynge & at nyght drinke at eche
tyme an ounce withdrueth the rede-
nes of the eyen/ & so used withdru-
eth the bytynge & yche of the tyeen.
G Drinke of the same water i the
moynynge & at nyght/ at eche tyme
an ounce/ washeth & consumeth all
evill humours in the bodye/ and ke-
peth the good moulfour. **H** Thesame
water strengtheneth the weake mem-
bres rubbed therewith two tymes in
a day/ & let dye by hym selfe. **I**
Drinke of thesame water every day
two tymes/ at eche tyme an ounce/
two or thre weekes contynynge/ is
good for them that falleth away at-

ter they be amended of cruenes.

A In the moynynge and at nyght
bled/ at every tyme an ounce and a
halfe. **xx** or **xl** dayes contynynge
maketh the stone. **L** The same wa-
ter heileth al diseases that burneth/
cloutes wet therin/ and in the mo-
ynynge and at nyght layd therupon.

M Two ounces dronk of the same
water of a persone and than laid to
bed/ and well covered/ causeth well
to sweete. **N** If any person of a

Scorpion/ or serpente/ or hyrnen/
were byted or synged shall drinke
of the same water an ounce and a
halfe/ & washe the wounded place
therewith twyse in a daye/ than shall
be layd there vpon in the moynynge
& at nyght cloutes wet in the same
and than it shall become hole.

O The same water preserveth
a man of the pestilence/ whan ther
of he drynketh an ounce and a halfe
or two ounces. **P** Drinke of the
same water in the moynynge fastynge
an ounce and a halfe or two ounces
ten or twelue dayes contynynge is
very good agaynste the acres on the
fourth day/ named febris quartana.

Q Thesame water is good
for the yll soze flolt me tager/ wha
it is washed therewith/ and the her-
be poudred and strawed in the same.

R Two or thre dragmas of
this water was ones dronk of a pe-
tell wenche whiche had styen benen
with an apple/ wherof she was soze
swollen/ & anone swaged the wel-
lynge/ whiche the tryacle coude not
do/ nor non other medecyne. **S** It

happened vpon a tyme that a man
was slepyng vnder a tre / & a snake
of an ellonge was crept in his throt
& to hym was gūe fūe oꝝ fye drop
pes of the same water / and anon the
snake came out agayn & dyed / But
I counsel the same water to be dronke
v oꝝ vii. dragma / & if the change
be pite / than the parson must be
fastyng two dayes / & than drynke
an ounce & a halfe / oꝝ two ounces /
& than he shal be hole. C. The same
water is good agaynst the canker in
the lyer / whā it is washed therwith
and the powder of the herbe strewed
therin / and a cleue clout layde thereon
that the powder fall nat of / and do it
so often tyll it be hole.

Water of Ruba. Ca. li.

Ruba bel Ruba in Latyn.

The best parte / and tyme of
his distyllacyon is the herbe / the stalke
and flowres chopped togeder and
distilled in the ende of Maye. I
Cōsele in a daye dronke of the same
water at eche tyme two ounces stop
peth the laske in the bely. B.
Dronke of the same in the mornynge
and at nyght / at eche tyme two ounces
is very good agaynst the pelowe
Jaundys. And is one of the pryncypall
medicynes for the same.

Water of Pennywoorte. Ca. lvi.

Capitulum celle in latyn. The
best parte / and tyme of his
distyllacyon is the herbe / the stalkes
and the flowres chopped togeder &
distilled in June. I. The same wa
ter dronke at the mornynge and at
nyght / at eche tyme an ounce and
a halfe is good agaynst the pelowe
Jaundys. B. Dronke of the same
in the mornynge and at nyght at e
che tyme two ounces is good for the
that be dysceated in the lyer / & clou
tes of hempe towe wetts in the same
& layd on the place of the lyer out
warde. C. In the mornynge &
at nyght at eche tyme an ounce / oꝝ
an ounce and a halfe conforteth the
harte & body. D. Two ounces
dronke fastyng in the mornynge is
good agaynst yll woymes in the bely.

Water of Iprell byennynge netles Capitulo lvi.

Silva ferens in latyn. The best part and tyme of his dysyllacon is the herbe without the rote chopped and dysyllid. The same water is good agaynste wyantes on the sodamēt in the mornynge & at nyght therwith washed. But if any body had the same with in the body than he shall dysynke of the same in the mornynge & at nyght at eche tyme an ounce. **D** water of lytle brennyng nettles dysyllid about the day of saynt John baptyste and xiiii. dayes set in the sonne and therwith washed hande & fete and other membris preseruet a body in the wynter from frost & colde as lōge as it is not washed of with other water.

Water of whyte betes. Ca. lxi.

Beta alba in latyn. The best parte and tyme of his dysyll-

lacyon is the leues stroped fro the stalkes and dysyllid in the ende of June. A water of the same dronke in the mornynge and at nyght at eche tyme two ounces is good for the stone for it melteth and consumeth it. **D** Dronke of the same in the maner aforesayde is good agaynste the gravell in the lymmes. **C** The water dronke in the same maner clenseth the lymmes and raynes. **D** The same water is good agaynste all woo in the membris clouts wet in the same and layde on the woofull place & whan the clouts be drye thā wet agayne tyll the payne is eased.

Water of Centory. Ca. lxi.

Centaurea in latyn. The best parte and tyme of his dysyllacyon is the leues the stalkes and the floures chopped to gyder and

Ca.

distilled in the ende of June.

Dronke of thesame water at nyght and in the mornynge at eche tyme an ounce & a halfe or two ounces is good for them that haue an yll colde and vndegetyng stomake / for it war-meth the stomake / & consumeth all euyl beinge therein.

An ounce dronke of thesame of a chyld and ii. ounces of an olde body i the mornynge fastyng withdryueth the woanes in the bely.

In the mornynge fastyng & at nyght dronke of the same water at eche tyme ii. ounces is very good agaynst the febres & aces.

If frethe woundes washed with thesame wat in the mornynge & at nyght / clouts wet in thesame & layd thereon helth them.

The markes of euyl fauored spottys of olde woundes often washd therewith causeth it to banyshe.

Twyse or thryse drōk of thesame at eche tyme two ounces withdryueth the dede chyld from the moder.

Whan one hath broken a bone in his body than he shall drynke of thesame water luke warme in the mornynge & at nyght at eche tyme an ounce for it heleth & consolydeth toged agayn.

Agaynst the stopped stomake drynke of thesame wat luke warme in the mornynge fastyng / & at nyght goyng to bed at eche tyme ii. ounces / & it causeth apetyte.

Thesame water is warmynge and dryenge with a styptike / it openeth & stoppyngs / it cutteth & departeth / & maketh tender the grosse humours / and clenseth and dryueth them out / and if a body be clysterd therewith /

that haue the podagra withdryueth the grosse colerike & siegmattyke humours in the mornynge & at nyght drōke at eche tyme an ounce & a halfe and the podagra w^{ch} clysterd therewith.

Drinke thryse of thesame in a day / at eche tyme an ounce or an ounce & a halfe / is very good agaynst the hardnes of the mylke of the lyuer.

Dronke of the same at mornynge and at nyght at eche tyme an ounce & a halfe / is good agaynst the goute in the bowels.

The same water dronke twyse or thryse in a day is good for the shynynge in the wombe.

Water of sumptore. Calch.

Vinus terre in latyn. The best parte and tyme of

distyllacyon is / the herbe / the salbe /
 with all his substance chopped to
 gybber and distyllid in the ende of
 May. **A** Dronke of the same wa-
 ter in the moynynge & at nyght at
 eche tyme an ounce & a halfe or two
 ounces / is good agaynst perbaky-
 nge. **B** Dronke of the same in the mo-
 ynynge & at nyght at eche tyme two
 ounces / four or fyve times cōnyng-
 ge is good for euill fauoured faces
 & maketh them faye & pale of colour.
C The same bled in the maner a-
 forsayd / is good for the that be fea-
 rig the leproy for his vertue is cōs-
 pynge. **D** The same dreyeth & easeth
 all scabbes / pynceppally whan ther
 is taken a lytell tryacle in a good
 draught of the same water that shall
 be swete out all euyl & benymous
 moistnes in a bath / but a body that
 not be washed / nor be made wette
 tyll the tyme that he hath well swe-
 ted / for it withdryueth all scalde &
 scabbes of the body whan therewith
 a body is washed and rubbed. **E**
 Of the same water in the moynynge
 & at nyght drōke / at eche tyme an ou-
 nce and a halfe / or two ounces is good
 agaynst ourward & inward imposu-
 mynge of the body. **F** Of the same
 water drōke in the moynynge sa-
 ltyng / is very good agaynst the pe-
 styence / sprecyally whan it is distyl-
 led per Alembicum. **G** Four ounces
 drōke of the same about eyght
 the cloke causeth laske. **H** The
 same water is good agaynst etyng
 of the mouth / whan it is often was-
 shed euerwith. **I** It is also good

agaynst the droppe & flode of the fa-
 ce twyse washed in a day. **K**

The same water is good agaynst
 swellynge / whan it is rubbed there
 with in the moynynge and at nyght.
L Dronke twyse in a day at eue-
 ry tyme two ounces / is good agayn-
 ste olde congeled blode / and agaynste
 hurtynge / castynge / or fallynge. **M**
 Of the same water drōke twyse in
 a day / at eche tyme two ounces cō-
 seth the floure in women / whan it
 is bled in tyme of theyr floures.

N It causeth a body to be fayne
 which dryneth oftē of the same wa-
 ter and often therewith washed and
 let dye by hym selfe agayne. **O**
 It conforteth the stomake whan it
 is drōke twyse in a day / at eche ty-
 me an ounce / or an ounce and a hal-
 fe. **P** The same drōke in the for-
 sayde maner is good agaynst all ma-
 ner of scabbes / for it resoluth colera
 and sanguinem / and denseth them
 from the drynyng mater.

Cal.

Ca. lxxvi.

M Arcinella oz valeriana/ herba benedicta/ oz amantilla/ oz valentia/ oz serpillum maus in latyn/ The beste tyme and parte of this distillacyon is the rote/ the herbe/ and the stalke chopped to gyder and distylled in the ende of the maye.

A Water of valerian drōke in the moornyng & at nyght/ at eche tyme two ounces is good for impostumynge and swellynge which be wofull and cloutes wette therein and layde there vpon/ **B** the same water distilled betwene bothe our lady dayes drōke in the moornyng a sponse full is good for yonge chyldere agaynste the wormes in the bely.

C Twyse in a day drōke of the same cloutes wette therein & layde vpon the sycke watres on the fondament healeth them **D** A cloute wette in the same water and layd on the eye whan a body hath bathed/ it claresyth the eyen of the hete and fume of the bathe **E** It is also good agaynste the sycke blaynes on the fondament whiche be floyng and teryng/ whan thereon be layde cloutes wette in the same it dothe vanysh the bothe the floyde and teryng/ **F** In the moornyng & at nyght drōke of the same at eche tyme ii. ounces and a halfe/ oz thre ounces/ easeth the that haue broken a bone oz legge.

G Drōke of it in the same maner before sayde healeth them that is rent called ruptura **H** two ounces drōke of the same fastynge/ oz a person goth out of his house/ is good agayn

ste the pestylence **I** Drōke of the same is good agaynste benyng two ounces & a halfe oz thre ounces **K** Drōke of the same in the moornyng and at nyght and rubbed therewith the members which haue gotten colde causeth them to be warme agayne/ **L** Two ounces drōke fastynge of the same water healeth fressh & olde woundes/ & fullseeth the woundes. **M** Drōke of the same an ounce and a halfe/ oz ii. ounces fastynge with dryeth all impostumacions wythin the body and dryeth them outwarde **N** In the moornyng and at nyght drōke of the same water an ounce and a halfe/ with dryeth the payne in the lymmes. **O** A man and a wyfe married to gyder and can not well agree to gyde/ them shall be gyuen to drynke of the same out of one vessel oz pot and they shall agree. **P** The same water put in vnclere wyne causeth it to be clere/ **Q** It wyrcedworth wyne & so drōke with dryeth & healeth moche woo & sekenes in the yen/ for it is the pryncypall medecyne for the yen/ wot an it is also put therein **R** Twyse in a day drōke of the same at eche tyme an ounce and a halfe causeth to swete **S** In the moornyng & at nyght the same water is good for the payn in the lymmes comyng of colde/ whan they be rubbed therewith and let drye by them lisse **T** It is good agaynste sycke blaynes whan cloutes be wette therein & layd vpon it **U** An ounce drōke of the same in

the moynynge of a body goth out of
his house / is good agaynst all euyl
ayre of the pestilence /

Water of valerian rotes. ca. lxxvii.

Adices valeriane in latyn.

BThe best tyme of hys distilla
cyon is betwene both our lady
days. **A** Two ounces dronke of the
same is good agaynst venym.

B The same is good agaynst by
tynges of venymous bestes / whan
the hole of the hart / or the mouth of
the manne is enoynted with the sa
me. **C** Dronke of the same thre
ounces / is good agaynst the daily
arces or leches / whan it is dronke
before the tyme of the arces comyn
ge on. **D** It is also good for the
payn in the lyde / clowtes wet therin
a layde vpon the lyde.

Water of Dylle.

Capitulo

lxxviii.

A Return in latyn. The beste
parte & tyme of hys distyl
lacyon is / the herbe in the ende of
the may distylled. **A** Of the same
water dronke / the temples and the
nose therewith enoynted causeth sle
pe. **B** In the moynynge and at
nyght dronke of the same at eche ty
me two ounces causeth moche mylk
in womens brestes. **C** Twoflem
a daye dronke of the same at eche ty
me an ounce and a halfe / thre dayes
continuyng / wythdriue the yll
wynde out of the stomake / and re
strengtheneth the ruptumyng of golpice.
D the same water longe tyme hol
den in the mouth / is good agaynst
the euyl moystnes in the tethe. **E**
It wythdriue also the crampe dro
ke in the moynynge & at nyght / at
eche tyme an ounce / and the men
bres rubbed therewith. **F** A per
son whiche soze pbraketh and walo
weth / take & drynke an ounce of the
same water in a day / it shall amede
therewith. **G** Dronke of the same
is good for them whiche neseeth wyth
payne / whan of the same water is
dronke an ounce and a halfe in the

Iotanum in latyn. And is
of two maners whyte and
blacke. The best tyme of the di
styllacyō of the whyte is betwene bo
the our lady days **A** Drok of the
same in the moornyng & at nyght at
eche tyme an ounce & a halfe is good
agaynst the pestilēce **B** Dronke of
the same, iii. ounces is good for venim

Dronke of the same in the mo-
nyng fastyng/ at none / & at nyght
at eche tyme an ounce and a halfe is
good agaynst the stone.

Water of Cariola **Capitulum.**

S Cariola in latyn. The best
parte and tyme of his distilla-
cion is the leues and the stawe chop-
ped to gyder & distilled in the ende
of Maye. **Dronke** amonge/ at every daye an
ounce and a halfe/ or two ounces is
good agaynst all acces or febrs
whether they be hote or colde. **B**
The same water so dronke as before
consorteth the lyuer. **C** It dronke
in the same maner easeth the dysen-
tes of the mylte. **D** The same wa-
ter withdryueth the dayly the thyr-
day/ and the fourth day acces/ whā
it is dronke two or thre tymes in a
day/ at eche tyme an ounce & a half/
and the dysen myxed with the same
and ourward layd vpon with a ly-
nen cloute.

The water dronke in the same ma-
ner taketh away the herte of the blod
F Dronke of the same two or thre
tymes in a day/ at eche tyme an ounce
& a halfe/ & the dysen myxed ther-
with/ is good agaynst the fourth day
acces/ named febris quartana.

Water of strabo berres.
Capitulum. **lxix.**

In the mo-nyng in latyn. They shall be
distilled tohan they be hole
type/ but nat softe/ and they that
growe on hie erthe be the best. **B**
The same is good to be dronk in the
mornyng & at nyght for yll swete
in the body. **B** It is good to be
dronke & the dysen myxed therewith
for the that haue euill hotenes/ & it
slaketh thurst. **C** In the mo-
nyng and at nyght dronke of the
same/ at eche tyme two ounces/ is
good agaynst leproy/ and it purpeth
the blode whan it is dronke with
wyne/ or eaten with hyde.
D Of the same dronke in the mo-
nyng & at nyght/ at eche tyme an
ounce and a halfe/ is good for them
that haue vnclene scabbes. **C**
The same water dronke/ is good for
the ratyng in the mouth & in the
throte. **F** The mouth often was-
shed with the same water/ is good
agaynst a synkyng mouthe.

S It is good agaynst impollumig
in the throte. **D** Dyonke of th
same in the mornynge and at nyght
at eche tyme an ounce and a halfe/
and the dyonke unprced therewith/ is
good for the lyuer/ and for the yelow
Jandys. **I** Of this water drunk
in the maner aforesayd is good for to
makethe breste large.

It is good therewith to be norny
ted about the hede. A Of thesame
water dronke in the moznyng/at no
ne and at nyght confozeth the harte

A In the moꝝnyng & at nyght
Dꝛonke at eche tyme two ounces pu
rifyeth the menſtruū in the women.

¶ The same Dronk in the morninge
 & at nyght is good for them that ha-
 the broken a bone or a legge.

D The same water healeth all manner of pill leggs whan they be washed therewith and cloutes wet therein & layde there vpon. **D** The

woundes walshed therwith is very good / & whan that it is dronke of a wounded person / than it cōneth out thzugh the woundes & heleth them very well  It is good for

them whose nature mounteth vp
warde in the face and the face beco-
meth red/yf the face be washed ther
with/it vanyssheth awaye. 13

To make water of straberys with
fyre or without fyre/ Take strabe-
ryes and meddle them with salte
and dysyll them thurgh an helmet
thesame water claryfyeth very well
the eye and colet them. Euer ye
maye make water of straberyes/
Take salte and straberyes/ & put it

in a glasse and stop it well, and let it
in a moyste seller tyll it become all
to water, than putte the water in
basyn and let it stande therein tyll it
becometh a fayze grene eyen water
and it must alwayes be kept in the
seller. **S** Whaitron dronke certain
dayes durynge, clenseth and purify
eth the blode. **T** The same dronke
in the moornyng & at nyght at eche
tyme an ounce, and the dyspke m-
ced therewith is good agaynst scabbe
and skaldenes. **¶** Of the same
dronke in the moornyng and at nyght
at eche tyme an ounce and a half, is
good agaynst the stone.

**The water of the strawberries
herbe. Calximi.**

Derba frage in latyn. The best
tyme of his distyllacion is in
the myddest of Maye. **I** Thesame
water in the mornynge & at nyght
dronke at eche tyme two ounces is
good agaynst the yelowe Jaundes.
II Thesame water dronke in the
forsaide maner maketh the brest large
& denseth the tongues. **C**
Thesame water is good to be put in
in the yren for it healeth them.

Aquicus in latyn. When tree
other wyse, the best part and
tyme of dystyllacion is in the May
the yonge leues enclpned somwhat
to rednes / & growe not downward
vppon yonge trees / nat farre frome
the crthe. **I** Water of the same is
good for them that haue moche red-
nes vnder the eyen / & small blaynes
wasshed with the same. **B** The
handes wasshed with the same wa-
ter / and let dye by hym selfe agayn
causeth the to be whyte. **C** Droke
of the same water in the moynnge
and at nyght / at eche tyme .ii. ounces
is good agaynst congeled blod / whā
a body is pushed oz beten / oz fal-
len / that the blode wyll comne with-
in / than the same water dyspueth it
out. **D** The same water is good

Drönke in the moynnge & at nyght
at eche tyme thre ounces oz greie in
meat for them that haue the whyte
lache oz laskynge / for it stoppeth the
same laskynge. **E** The water of
ponge oke leues is good to be drönke
for an vnclede huer / & alythe clout
doeth therein and lapyde the re-cure / &
is best aboue all other thynges / and
is good agaynst the rotyng of the
lyuer. **F** Drönke of the same
water in the moynnge & at nyght at
eche tyme .ii. ounces is good agaynst
them that haue dysleas on the lyuer
& agaynst the rotyng of the lon-
gues. **G** The same water drönke
in the forsaide mesure / is good agaynst
the dysches in the syde. **H** The yarde of a man whyche is
both holes wasshed with the same
water in the moynnge / and cloutes
wet therein & layd vppon it / is good
for it coyleth well all soze holes. **I**
The same water bled in the maner
aforesayde / and layd there vppon he-
leth olde sores on the legges for it
drysseth them. **K** The tynes in
a day drönke of the same water at
eche tyme thre ounces is good for wo-
men that haue to moche of her flou-
res named menstrui / for it stoppeth it.
L Drönke of the same in the
moynnge / at none / and at nyght
at eche tyme .iii. ounces / stoppeth the
blode whan a body is wounded and
bledeth. **M** Drönke of the
same water in the moynnge / at
none / & at nyght / at eche tyme an
ounce and a half / oz two ounces / is
good for a body that ysleth blode.

convent

Dronke in the folowynge maner
is good for a body that is wounded
and bledeth sore. **D** Thesame wa-
ter is good agaynste the herte & red-
nes of the legges and the blake blay-
nes/clowtes of hempen towe wet in
thesam/ water and layde ther vpon
twyse or thyrse in a daye / tyll it be
slaked. **D** Thesame water dronke
in the moornyng fastynge / and at
nyght goynge to bedde / at echetyne
an ounce & a halfe is good agaynst
the brenyng stone and the grauell in
the lymmes / than shall the vryne be
kept in a glasse / and in the bothom
ye shall fynde a maner of sande and
ye shall se howe the stone departeth
from the body. **D** Thesame
water dronke thre tymes in a daye
at echetyne an ounce healeth the gut
in the fundamēt whan he is trauay-
led after a great laske.

Water of polypody.

Ca. lxxvi.

Dithpodium in latyn or falca/
or fillis the best tyme of his di-
stillacion is the tyme of them whiche
groweth on an oken tre / chopped
withoute the berbe / and distilled be-
twene both our lady dayes. **D** Of
thesame dronke in the moornyng & at
nyght is very good for the coughes.
D Thesame dronke in the folowynge
maner is good agaynste madde wy-
tes and melancolye. **D** Thesame
water dronke in the folowynge maner is
good agaynst thought & heynnes of
the harte. **D** In a daye two or thre
tymes dronke of thesame / at echety-
me an ounce & a halfe / or two oun-
ces maketh a large breste / & softeth
the hely. **D** Dronke of thesame at
nyght goynge to bedde / at echetyne
an ounce & a halfe / is good for heyn
dremys. **D** Dronke of the same in
the moornyng and at nyght at echety-
me an ounce / is good for euill co-
lour because it clenseth and purify-
eth the blode.

Water of fungus

Ca. lxxvii.

I Angus in latyn. The beste parte and tyme be the whyte tode stokes or muscheres / whan they be full ripe / and than a htel layd abrode in the oyle / a tha chopped small and dystyled per alembicum in balneo marie. **I** The same water is good against the colde paralisis or gotte. The membre shall be made warme by a fyre / and the colde membre shall be rubbed wth the water / and that shall be done often tymes contynuyng / in the moynge / and at nyght tyll it be amended.

Wild Rose

Water of Astronum Calixt.

Astronum in latyn. The beste parte and tyme of his dystyl lacyn is / the rotes dystyled in the

Maye. **I** whan a person hath in his body cogeled blode / cloutes wet therin and layde vpon the hyle and wounded place / than the blode vanysshed. **B** The same water is very hote / therfore it must be taken hede that it touche not the eyen. **C**

Dronke of the same water in the moynge and at nyght at eche tyme an ounce / is good for the synnyng in the bely. **D** In the sayd maner dronke of the same water fastyng / is good against pwoozmes in the bely. **E** Dronke of the same water in the moynge is at nyght / at eche tyme an ounce. **iii.** of .b. dayes contynuyng / is good agynste the grauell in the kyndes / in the raynes / and in the bladder.

F The same water dronke in the moynge and at nyght / at eche tyme an ounce / consumeth the scathefull moynnes in the stomake.

Water of Cronica calixt.

Cronica in latyn. The beste parte & tyme of his dystyl lacyn is / in the begynnyng of June / chopped and dystyled with all his substance / but it were very good & moche better that it were steeped fyrst and layde in good wyne a daye and a nyght / and than dystyled in Balneo Marie. **I** In the moynge fastyng dronke of

f.i.

the same water an ounce/and a lytell pece of a sponge wette therein/ and put in a wooden bore with holes/borne/ & often smelled thereon it is a good preseruatyf agaynst the pestylence in the tyme of the same/ & the handes and the hede all aboute therewith enoynted.

B The same water borne in the manner also sayd in a lytell bore/ & therewith enoynted as before/ is very good agaynst all euyl smellynges/ & euyl brythes/ lykewyse in the chyches and other places also/ and specially for women berynge chyld whych can not suffre well all the brythes of the people/ and defende the chyld that it getteth not the leppy/ nor other heuy sickenesses of the euyl smellynges or ayres.

C The same water is also good agaynst the pestylence/ for it causeth well to swete/ whan the persone is lette blode anone/ whan it cometh vpon hym/ than shall ye gyue the persone to drynke of the same water an ounce and a halfe myrred with a dragma and a halfe of the powder of the same herbe.

D The same water healeth very well all fressh woundes where they be hewen or styched/ whan it is drōke twyse in a daye of the wounded persone/ at eche tyme two ounces/ than it sweateth out of the wounde in lykewyse as oyle of olyue/ and the woundes washed therewith/ and in the moynynge & at nyghte a linnen cloute wet therein and layde on the wounde/ healeth them fayre without

remaynyng of any token and marke.

E This water healeth also euyl holes and sores in the face/ sayde manner washed/ and clotures wet layd ther vpon.

F Halfe an ounce of bytroll wherof the ynke is made/ resolued in a pounde of the same water/ healeth & withdryueth all sores with matter/ all euyl scabbes/ all scaldenes/ all blaynes whych be full of euyl moystnes and how the water is older/ it is the more better.

G The same water is good agaynst styngynge of a spynner/ whan it is dropped therein and rubbed therewith/ and washed/ and cloutes layd there vpon healeth it/ and is good agaynst all bytynge of the venymous bestes/ and swelleth not therof.

H The same water drōke and goyng to bed in the morning and at nyghte/ at eche tyme an ounce whan it is done in tyme/ withdryueth the swellynge in the throte anon/ and all the payne of the necke comynge of the blaynes.

I Quarter of an ounce of alome resolued in a pounde of the same water/ and made luke warme withdryueth the spottes in linnen cloutes/ whan they be wet therein.

K It is good for to drynke of the same in the moynynge and at nyghte/ at eche tyme an ounce/ for they that haue moche euyl blode/ or ouer moche blode in the body/ for it cleaseth & consumeth & wasteth. **L** It is good to be dronke for the sypenge sore/ for it openeth the swete holes.

Dronke in the moynynge and at nyght of the same water at eche tyme an ounce or an ounce & a half or .ii. ounces purifyeth so moche the blode / yf a body were leproous and dronke of the same water fastynge in the forsayd maner / neuer mayster sholde knowe the blode / so moche it clenseth. **I**n the moynynge fastynge dronke two ounces of the same water .v. or .vi. weekes continuynge / causeth a body to become lene of fleshe / therfore it conforteth and strengtheth the stomake consuming the ouer moche moylour growynge of the fleshe. **I**n the moynynge & at nyghte dronke of the same water / at eche tyme an ounce is good agaynst þe dasynge in the hede. **I**n the forsayd maner dronke of the same water is pryncypally good aboue all waters for the me-moynge and remembraunce / whan the hede is enopnted therewith outwarde / and let dye by hym selfe agayne bycause it conforteth the hede and braynes / and lyghteth the tongue / and clenseth the blode. **D**ronke of the same water in the moynynge fastynge / with a dragma of the powder made of the myddest rynde of a stalke named Amara dulcis in latyn causeth the breste to be large / and causeth to spytte and put oute the flegmacyke matter / and it helpeth moche / for it is the nature of the water. **I**n the moynynge and at nyght easeth strongly the lo-gue whan it is rotted in the body of a man and styketh in the throte

also yf it were as lytell as a nutte / it wyl become hole and well amen-ded. **S** dronke of the same wa-ter in the moynynge and at nyghte an ounce is good agaynst the dyslea-ses of the longue / for it putteth the harte with yll blowynge or wynde And what man whyche becometh sone angry and swellth for anger lyke the noughty wyues / he shall drynke of the same water twyse in a daye / at eche tyme an ounce myxed with a dragma of powder of þe same herbe Veronica / Bycause all anger taketh hys ogygnall and cometh from the mylte / whyche is next vnto the longue / wherfore the longue swellth for anger of the mylte. And lyke wyse as is defendyd with a spone full of colde water that a pottle sedynge runne not ouer. In lyke wyse synketh the great anger & yll blowynge of the longue / whan a dragma of the powder of the same dye herbe Veronica is myxed with the same water of the Veronica / and so dronke / bycause of no mem-bre cometh so moche payn and woo as from the longue / for whan the mem-bres be in rest and quyet / than the longue is euer rysynge by and labourynge / whether a person be slepyng or watchynge / euer is the longue labourynge with blowynge and ynclenes / as with fystynge and styrynge. The wyndes come all ogygnally from the longues. Ther-fore it is a very wyse man whyche that can restryne the tongue and the longue. **C** In the

moynynge and at nyght dronke of the same myrred with a dragma & a halfe of the powder of þ same dryed herbe of Veronica/withdryueth the pelow Jandys in a man. ¶

The same water dronke cauſeth well to pſſe. x The same water with the powder dronke in the maner afoſayd is good for women that be fatte and wolde fayne bere chylde & be lene/þreaſe ſhe myght the better conceiue/for it dyſpoſeth the women to conceiue. And lyke wyſe as fyre purgeth the golde/ſo purifyeth the ſame water the womē for to conceiue chylde. y It is reſede of a lytel venymous womē ſmaller than a Scorpyon/whyche kylleth the ponges of the Lyon with his venymous ſpynges. And whan the Lyon perceiueth it/than he choſteth of the ſame herbe/and layth it vpon the venymous ſwellynge of his ponges/than it ſhal be no harme to the but they ſhall become hole/agayne/

3 Alſo it is redde of a bere/whā he is to fatte/thā he eateth of þ ſame herbe/whā he can get it/ & therewith he becometh lene and well dyſpoſed and bolde/lyke wyſe the bere whan he hath ſene great orcen/than he deſyeth to haue and to eate the fatteſt of them/ but yet he is aſtayed. But as ſone as he hath eaten of the ſame herbe/than he becometh bolde and taketh the fatteſt ore without feare/ ¶ It is redde of the bere/whan he is ſeke than he eateth pyſner/ & thā he becometh hole and reſed/and after that he eateth ſo moche of them

that he can not dygeſt them in his nature/than he falleth ſomtyme in ſwoone and fayntnes. Than he eaſeth of the herbe Veronica/ & therof he getteth the lakke/ & therof he become agayn hole. It is redde that the garye water ſnakes engendreth them with the eale/ & ſylſhe called Anguilla in latyn. And whan the eale hath conceiued/thā ſhe becometh ſo colde of the venymous nature of the ſnape that ſhe can not ſuffre the water no longer/and than ſhe crepeth often out of the water and ſeketh the ſame herbe/and eateth it/ & than the ponges muſt nedes departe from her/and dye before oꝝ they be warped. And yf it be that the eale can not fynde the ſame herbe/than the ponges kyll her oꝝ they be warped. ¶ ¶ Of the ſame water drōke two ounces at ones cauſeth a body to ſwete whan it nedeth. ¶ ¶ The ſame water dyſtilled in the foꝝ ſayde maner with wyne/may be kepte ten yeres in his vertue. And the powder of the ſame ſhall be made thus. Gather the herbe in the begynnyng of June/and hange it in the ayre for to drye/and/than powder it.

¶ Of the water of Anyſ Capitulum.

lxxx.

A *Alum* in latyn. The beste parte and tyme of his distyllacyon is/ the toppe whan it hath fiores / and the sedes begynne to rypp. the crowne with the sedes plucked of and distyllid. **A** Of the same dronke in the mornynge/ at none/ and at nyght/ at eche tyme an ounce/ or an ounce and a halfe/ taketh awaye the heuy bolkyng out of the stomake / and warmeth the stomake. **B** Thre tymes dronke in a daye of the same water/ at eche tyme an ounce and a halfe / or two ounces is good for the wyndes in the bely/

¶ Of the water of *Apium*. *lxxi.*

Apium

A *Apium domesticum* / vel *Apium ortuum* in latyn. The best tyme of his distyllacyon is the rote/ and the herbe with all his substantia ce chopped and distyllid in the ende of the Maye. **A** Cloutes wet in the same water/ and layd vpon hote thynges healeth them. **B** The hede & the temple enoynted with the same water and let drye agayne by hym selfe causeth rest and sleepe.

C In the mornynge/ at none/ & at nyght/ dronke of the same water/ at eche tyme an ounce and a halfe/ causeth well to presse and make moche dryne. viii. oz. .i. dayes continuinge/ it withdryueth the grauell out of the membrs and bladder. **D** woundes washed therewith in the mornynge and at nyght and cloutes wette therwi and layd ther vpon is very good.

Water of pue.

ca. lxxvii.

E Dera arbozea in latyn. The best tyme and parte of his dysyllacyon is the same whyche groweth on the oken trees/with the leues and beryes/dystyled in the myddest of Apryll. **A** The same water is good agaynst the payne in the hede/the hede often enoynted therewith and let drye by hym selfe. **B** Dronke of the same water an ounce/oz an ounce & a halfe in the mornynge fastynge/and at nyght gorne to bedde. vi. oz. vii. dayes contynuyng. **C** The same water dronke in the mornynge and at nyghte at eche tyme an ounce and a halfe/contynuyng some dayes/ is good agaynst the stone in the bladder/ & lymmes/and dryueth them out. **D** In the same maner dronke of the same water causeth well to pylle. **E** In the mornynge and at nyght dronke of the same water at eche tyme an ounce and myxed in the drynke clenseth the bladder/ but it is nat good for women.

Water of the blode of an asse.
Capitulum.

ca. lxxviii.

S Anguis asini in latyn. The dysyllacyon of the same blode is/as is lerned before. **A** In the mornynge fastynge dronke of the same water dronke at eche tyme an

ounce and a halfe. xxx. oz. xl. dayes contynuyng is good agaynst the stone.

B In the mornynge and at nyght dronke of the same water at eche tyme an ounce. x. oz. xii. dayes contynuyng/ is good agaynst the grauell in the lymmes/ also it causeth a fayre face.

Water of Centum morbia.
Capitulum.

lxxviii.

C Centum morbia in latyn. The best tyme of his dysyllacyon is in the ende of maye. **A** Thysle dronke of the same in a daye at eche tyme an ounce & a halfe is good agaynst congeled blode/ yf it become of betynge/ pusshynge/ or fallynge. **B** The same water dronke in the forsayd maner is good agaynst the great laske. **C** The same water healeth woundes whan they be washed therewith.

Water of pylmets or pylmets egges.

ca. lxxv.

F Dumica in latyn. The best parte and tyme of theyr dysyllacyon is/ the lytell pylmets in the tyme whan they haue egges. Than sette a pot in the erthe where as they dwell/ in suche maner that in the pot come no vncleines/ but couer hym well with leues of trees/ than they shall bere theyr egges in the holowe pot/ and whan ye thynke that ye haue ynowgh/ than puke them in a bagge togyder/ and shake

like as mele is bulkyd/ than they
be dasyd & there no more as yf they
were starke dede/ than put them in
a glasse and dystille them per Alembicum. **A** Thre droppes of the sa-
me water put in the ypen goynge to
beddetaketh awaye the skynne and
the spots frome the ypen. The pyl-
mers be contyue taken in this ma-
ner / ye shall thruste a stycke in the
erthe than they come hywarde on
the stycke / and than ye shall pulle
out the stycke and stycke of the pyl-
mers in a baryn / and than dystill as
before is sayd / and a hath the vertue
is before is sayd.

Of pylmer egges. Calxxvi.

O Wa formice in latyn. The
best maner to gader the eg-
ges is / ye shall set dysthes of tre in
thre or foure hepes toher as the pyl-
mers dwelleth / & the dysthes shalbe
well couered with leues of trees / tha
they bere theyr egges in the dysthes.
And whan ye wyll take the egges
awaye / than vncouer the dysthes &
take a tryll stycke and knocke vpon
the dysthes / than the merpysses shal
ronne oute for feare and leue theyr
egges behynde them. Thos egges
dystille per Alembicum in balneo
marie. **A** Thre or

foure droppes of þ same water put
in dese eares and therein leste / cau-
seth heryng agayn. And is good al-
so for the ppyng in the eares.

Of the whyte of an egge. lxxvii.
Capitulum.

A Albumen ou in latyn. Rosted
egges of hennes harde / and
put awaye the yolke / and dystilled
the whyte of the same as I haue let-
ned in the. xiii. chapyter in the fynde
boke / in þ chapyter of balneum ma-
rie. In the same maner that the wa-
ter be no hotter than ye maye suffre
poure synger in the same water. And
in the dystillinge shall the helmet
or glasse be well stopp'd / or other-
wyse the water sholde synke / and yf
it become synkyng for his lōge dy-
stillinge / than shall it be dystilled
agayne in a newe glasse. It may
also be dystilled in a comon helmet
or Alembike / where as roses be dy-
stilled in.

A The same wa-
ter putte in the eyen some dayes / is
good for them that haue or growe
shelles or a skynne vpon the eyen /
that haue had euyl ypen lōge tyme.

B The same water causeth a
fayre & a clere face / whan it is was-
shed therewith. **C** The same wa-
ter causeth whyte handes and with
dryueth the markes or tokens aby-
dyng of woundes or sores whan
they be often washed therewith and
let drye by hym selfe.

Water of the yolkes of egges.
Capitulum. lxxviii.

A Itellium out in latyn. The best parte & tyme of theyr distyllacyon is / the egges & hennes roasted and not soden / and the whyte put from the yolkes / and the yolkes distyllled in an helmet of erthe not all stopped / tyll the euill sanour or taste / or swellynge be the lesser. And ye must take hede that ye brenne noz distylle that to moche / for there sholde come out oyle. But I desyred in yerres past to brenne Aleum bisellozum after the lettre and wyssynge of Mesue & Ruysena / but it became so moche synkyng that it neuer myght be occupied for / his synkyng / for all that his vertue is very stronge & great. **A** With the same water washed vnder the eyen whan a body is goynge out of the bathynge and is drye agayn / with dryueth the spottes and masses out of the face.

Water of Gentian. ca. lxxxi.

G Entiana in latyn. The best parte and tyme of his distyllacyon is / the rote with the herbe chopped and distyllled in the ende of May. And yet better the rote alone well small chopped and distyllled in the ende of the canyculer dayes.

A Of the same water dronke

amonge in the mozynge fastynge at eche tyme an ounce and a halfe lengtheth a body his lyfe. And Gentiana is as the herbe verbenia / and Symptnesia resoluyng and consuming the stympe matter in the stomake. **B** In the mozynge and at nyght dronke of the same water at eche tyme an ounce and a halfe / or two ounces in the tyme whā the women sholde haue her flowres or menstruum prouoketh it & catwleth it to come. **C** Thysle or thysle drōbe of þ same water at eche tyme ii. ounces with dryueth the venym þ is come of the floures of women.

D In the mozynge / at none / and at nyght dronke of the same at eche tyme an ounce / or an ounce and a halfe / is good for them that haue no appetyte to eat meate / and for them that haue an euill colde & viciene stomake / and pryncypally whan in an ounce of the same water is myx-

ted a dragma of calamus w ell poto
died/ & a dragma of sugre/ It shall
so be dronke fastynge thre or foure
dayes contynnyng/ and at eche tyme
after the drynke ye must take ii.
or thre houres/ and so ye shall gette
good adpetyte for to eat.

Cheleues of the aspen tree

I Ratius in latyn/ The best
parte and tyme of this dysphyl
lacion is the budde of the tre styed
in bynegre syue or fyre dayes long
in the myddell of the may/ and so dy
styled.

I The same water withdrueth the eyll &
bndene spottes named morphea.
cloutes wette therin and layd vpon
the spottes in the mornynge and at
nyght. iii. or iiii. dayes contynnyng/ or
as it nedeth.

B The same water
heleth dyse caides/ in the mornynge
and at nyght often washed
and rubbed therwith. **C** In the
mornynge and at nyght washed
with the same water soze legges/ &
cloutes wet in the same water and
layd ther vpon heleth them.

D Cloutes wet in the same water and
layde vpon the blaynes whiche be
broken thurgh the catweth them to be
hole.

C of fenell herbe water. Ca. xxi

I Enculus in latyn/ There is
founde many names/ but I
will wyte of the same fenell and of
none other. The best parte and sea
son of the fenell herbe/ is in the ende
of the Maye/ but the rotes in the en
de of the caryuler dayes.

I The same water claryfith the
darke yen/ and is good agaynst all
dyscaies of the eyen/ be it of colde or
of hete/ when it is droppd i the eyen
and therwith rubbed the dayes of
the temples/ than it pulleth out the col
de and the hete of the eyen.

B The same water put in the yen in
the mornynge/ and an houre before
goynge to bedde. ix. or x. dayes contyn
nyng/ sharpeth the syght & doth
drueth the impossynge the flode
& rednes of the ye. **C** In the mornynge
& at night whā a body goeth
to bedde/ at eche tyme dronke of the
same water an ounce and a halfe

cleareth the harte. **D** An ounce
dronke of the same water/and the
hede enoynted therewith & let dye
by hym selfe/it conforteth the bray-
nes. **E** At nyghte and in the mo-
rnyng dronke of the same water/at
eche tyme an ounce or an ounce and
a halfe causeth a large breste. **F**

The same water dronke in the for-
sayd maner causeth a good voyce in
a man. **G** The same water

dronke in the mornynge & at nyght
at eche tyme an ounce and a halfe.

or two ounces. **H** or. **I**l. dayes con-
tynuyng purgeth and cleareth the
longue. And it is good agaynste
imposumpnge of the longue. **I**

In such maner dronke the same wa-
ter cleareth the stomake/and slaketh
the hete. **J** It cleareth also the

lyuer/whan it is dronke in the for-
sayd maner. **K**

In the mornynge & at nyghte dronke of
the same water at eche tyme an ounce
or an ounce and a halfe. **L** or. **I**l. day-
es contynuyng/ is good agaynste
the grauel in the bladder/ & for them
that be dysseased in the bladder. **M**

Of the same water dronke
amonge/at eche tyme an ounce/ &
the drinke myxed there with wyth-
drueth and taketh away the lecherie

N Dronke of the
same water/and the face ther wyth
enoynted causeth good colour.
and it clareth the face.

O Dronke an ounce or an
ounce and a halfe of the same water
somtyme is good agaynste venym

P The same water dron-

ped in the eyes, killeth the wormes
that be therein. **Q**

Some dayes dronke of the sa-
me water causeth the woome in the belly.

R The same wa-
ter myxed with wyne/and so dron-
ke/at eche tyme an ounce or an ounce
and a halfe wythdrueth the drop-
sy. **S**

Clowtes wet in the sa-
me water and layd vpon the secreete
place healeth it. **T**

In the mornynge and at nyghte dronke
of the same water at eche tyme an
ounce and a halfe/or two ounces. **U**l.
or. **I**l. dayes contynuyng wythdrueth
the pelowe & sandys.

V At nyghte and in the mo-
rnyng at eche tyme dronke of the same
water an ounce/openeth the stoppin-
g of the myke. **W**

A clout
wette in the same water and layd
on the place of the lyuer/taketh a-
waye all the hete of the lyuer.

X Dronke of the same wa-
ter at eche tyme an ounce causeth
them well to pylle that coloude not
pylle. or that pylle not but with pay-
ne/for it cleareth the vyne/the blad-
der and the raynes. And it is good
agaynste al maner of dysseases of the
raynes. **Y**

Water of the same in the mornyn-
ge layd vpon the synges of the sna-
kes and therewith washed/causeth
them to hele. **Z**

The same water is good to be dron-
ke agaynste all maner dysseases of
the hede/and the hede wette there
with and lette dye agayne by hym
selfe.

33 Fenell water dronke in the
mornynge fastynge & at nyght / three
or foure dayes contynuyng dyueth
out the flowres of women **B B**

In the mornynge & at nyght dronke
of the same fenell water at eche ty-
me an ounce & a halfe .x. or .xii. dayes
contynuyng causeth moche mylke /
to the noryles and women in theyr
bryllys **C C**

In the mornyn-
g and at nyght dronke of the same fe-
nell water an ounce and a halfe /
or two ounces myxed with wyne
two or three dayes contynuyng /
wathdyueth the waimelinge that is
to han a bodye thynketh alwayes to
perozake **D D**

Fenell water
put in the eyen which wyll become
slyll blinde / and dronke day helpeth
them **E E**

water of fenell
dronke in the mornynge and nyght
at eche tyme an ounce and a halfe /
causeth the grosse humours in the
hely to become subtyll **F F**

Dronke in the mornynge causeth mo-
che sperma **G G** Dronke in the
same maner is good agaynst the
pynge sekene named Arthragid.

The water of our lady thestell.

Capitulum.

xxi.

C Ardo Marie / vel labrum be-
nerts in latyn. The best par-
te and tyme of his distyllacon is /
the tyme broken of from the stalkes /
and so distyllid in the ende of May

A Our lady thestell water
dronke in the mornynge / at none /
and at nyght / at eche tyme two un-
ces / or two ounces & a halfe / is be-
st good agaynst the styches in the
body / and pynceppally for the pynge
chyliden **B**

In the mor-
nyng and at nyght dronke of the
same halfe an ounce and a quarter
is good for pynge chyliden. And
myxed with the wyne is good for
the pynge woman / or agaynst the vn-
naturall hete named syngles ou-
the body. **C** Of the same dronke

Gii.

ke in the moynynge at none and also
at nyght at eche tyme an ounce and
a halfe / is good agaynst the conned
or congeled blode in a parson / wher
ther it be of fallynge or betynge.

D In the moynynge and at nyght
at eche tyme dronke of thesame wa-
ter an ounce myxed with the drynke
causeth a body to be large about the
the breste and the harte. **C**

*For the
mills*
**The same water dronke in the ma-
ner a forsayde is mercuriously good
for the longues and the mylte. **I****

Of thesame water dronk in the mo-
ynnge / at none / and also at nyght /
at eche tyme the ouces is very good
for the inflamed lyuer / and for other
hete a thre dowble lynen cloute wet
in thesame water and layd thereupon

S Our lady thestell water dron-
ke in thesame maner afor sayde sla-
keth the thyrs.

Water of red Saffrage. Capitulum.

I *Fl pendula* in latyn. The
best parte and tyme of hardy-
nyllayon is / take the herbe and the
roote chopped togyder in the ende of
the Maye. **I** In the moynynge
and at euynge dronke of thesame
water at eche tyme an ounce and a
halfe is good agaynst the pelysences.
B Two or thre ounces dronke of
thesame water is very good agaynst
benyume / yf a body had eaten or drun-
ke any.

The water of parea

Capitulum.

Flora

P *Aera del herba clauellata*
in latyn. the best tyme and
parte of his dryllayon is the herbe
with the stalkes whiche growe in
gardeyns dryllid tohan it bereth
flowers. **I** The same water is
good to the ponge chyllen / tohan
them ouercometh the vn naturall
hete / and maketh them lesse / than
shall to them be giuen for to drynke
at eche tyme an ounce and an halfe
and the? drynke myxed with the
same water.

dronke some dayes in the moynynge
and at nyght / at eche tyme an ounce
is good for them that hath impossu-
mynge or swellynge on the breste
on the harte. **D****

**Drinke of the same water in the
maner afor sayde is good for them
that hath the impossuynge on the lon-
gues.**

**Water of Cynkeforke.
Capitulum.**

arb.

A King folium in latyn. The best parte and tyme of his distyllacyon is the herbe the stalk and the rote with all his substance chopped and distyllid in the myddest of the May. **I** Of the same water dronke in the moynynge and at nyght at eche tyme an ounce and a halfe. xii. oz. xvi. days continuinge is good agaynst the stone. **B** The same water dronke in the forsayd maner is good agaynst the grauell and clenseth the raynes. **C** The fore hede rubbed with the same water and a foure folde clothe wet in the same water and layde on the fore hede stopperth the bledynge of the nose. **D** The same water is good agaynst the tremblynge of the membres and handes when they be often rubbed and enoynted therewith and lette drye agayne by themselves. And it is proued by a golde Smyth at Straet bogotwe.

E It healeth olde and frellhe wounds when they be in the moynynge and at nyght washed therewith and clothes wet in the same and layd thereupon. **F** Of the same water dronke and clothes wet therein and layd upon the impostumes and swellynge causeth them to banysshe and withdryeth all swellynge. **G** The same water causeth very good laske and compelleth all meynes to be resolued when it is dronke in the moynynge and at nyght and with clothes wet layde there upon.

Water of frogges.

Ca. xxi.

Rana in latyn. There be many maner of frogges. But I wyte here of the frogges whiche be founde vpon the felde. And the best parte and tyme of theyr distyllacyon is on Maye John Baptistes daye and distyllid as I haue lerned before of the whete of the egges and yf the water of the sayde distyllacyon becometh nere ynoughe than shall it be distyllid agayne in the Alembike. **I** The same water is the moost worthiest and the best water whiche maye be founde agaynst the goute paralisis where so euer the goute paralisis be and in what place or membre rubbe the place therewith and let drye agayne by hym selfe and clothes wet in the same water and layde there upon than banyssheth the payne.

G.iii.

Water of Testiculus sacerdotis.
Capitulum. xxvii.

Testiculus sacerdotis in latyn. The best parte and tyme of his dysstallacyon / is the leys / the rote with all his substance dysstilled in the mydest of the Maye. **A** Thesame water is a principall water ageynst the fyke wraites witten the fundamētō without whan it is dronke in the moynynge & at nyght at eche tyme two ounces / and clouts wet therein / & layd there vpon two or thre tymes in a day.

Water of lingua auis. Ca. xxviii.

Lingua auis in latyn / that groweth on a linden tree. The best part and tyme of his dysstallacyon is in the ende of Maye. **A** Dronke of thesame water twyse a day / at eche tyme an ounce & halfe cawseth one well to pylle. **B** In the forsayde maner and mesure dronke / thesame multiplyeth sperma. **C** Of the same dronke as is before sayde is good agaynst a ferfull harte.

Water of the herbe Robert.
Capitulum. xxx.

Herba Roberti bel acis unscata in latyn. The best tyme and parte of his dysstallacyon is / the leys / the stalke with all his substance chopped togeder / and dysstilled in the ende of the Maye / or in the begynnyng of the moneth of June. **A** Thesame water is very good agaynst the eatynge sores on the payntes of women. **B** Thesame water is good for them that haue fallen or betyn blew byles / thre or foure tymes layde there vpon / than it vanyfsheth the congyled blode vnder the skynne inwardly / and it becōmeth whyte & hole. **C** Thesame water is good ageynst fywraites in the fundamēt / moynynge & nyght wasshed therwith / clouts wet therein & layd ther vpon. **D** Thesame water is good ageynst paralisis in the backe / or in the legs or other places / rubbed with thesame / & clouts layde ther vpon. **E** It is also good to be layde twyse or thre in a day vpon a womans brests / whan they be swollen & redde and haue payne in the brests. **F** Thesame water is good for them that hath clemmyd hym selfe or an other / twyse or thre in a day clowtes wet in thesame & layd there vpon.

Water of gores myk.
Capitulum. L.

A *Al Caprum* in latyn. The best parte and tyme of his dystyllacyon is the mylke of Gotes dwellinge on hygh montaynes/ after that mylke of Gotes goynge in good pastures and feldeys where as many maner of floures growe/ and the same mylke tobych is molken in the moornyng in the myddest of the Daye shalbe dystyllled.

I In the moornyng & at nyght dronke of the same water/ at eche tyme.ii. ounces/ is good agaynst the petylence. **B** With the same water the face enoynted and let drye agayn by hym selfe/ is good agaynst the rosome in the face.

C Of the same water dronke in the moornyng/ at none/ and at nyghte/ at eche tyme thre ounces/ foure oz. v. days contynuyng/ is good agaynst the shynkyng in the bely.

D Of the same dystyllled water dronke in the moornyng and at nyghte/ at eche tyme an ounce and a halfe/ oz

two ounces/ is good for the whyte rode in women named menstruum album in latyn.

Water of Barley. *Ca. i.*

O *rdum* in latyn. The best tyme of his dystyllacion is in the ende of the Maye. **I** The water dystyllled of the herbe barley is good to be put in the yen agaynst all euyl dysteases of the yen/ for it clenseth them and dyeth them.

Water of Furcula muris/ named gagell. *Ca. iiii.*

I *furcula muris* in latyn.

The herbe bereth small rede flowres. The best parte and tyme of his dystyllacyon is whā it bereth flowres/ the herbe and the flowres dystyllled togyder. **I** Thre ounces dronke of the same/ & than layd downe/ and well warme couered that a body may swete is very good agaynst the pestylence. And the male of the herbe serueth for the mē and the female for the womē. **B** Ones oz twyse dronke of the same water in a daye/ at eche tyme two ounces/ and the woundes in the moornyng and at nyght wasshed therewith causeth the to be hole/ where euer they be/ olde oz fresh.

Water of Consolida media. *may be*
Capitulo. *c. iiii.*

C Onsolida media vel penseda
 num/vel Amarulca in latyn.
 The best parte and tyme of his dy-
 stillacyon is the herbe/the floures/
 & the stalk with all his substaunce
 distilled in the myddest of the May.
A The same water is good
 agaynste payne and sherp hote/oz
 brennyng guttes/dronken of the
 same in the moynynge/at none/and
 at nyght goynge to bedde/at eche
 tyme an ounce and a halfe. **B**
 The same water is good for wery
 membres and synewes / somtyme
 rubbed therwith & let drye agayne
 by hym selfe. **C** Of the same
 water dronke every day in the moyn-
 nyng fastynge/and at nyght go-
 ynge to bedde at eche tyme an ounce
 viii.oz.x.days contynuyng/is good
 agaynste thynkynge and all paynes
 in the body. **D** Every daye
 woundes washed with the same wa-
 ter in the moynynge and at nyghte
 and cloutes wet in it/and layd ther-
 on causeth them to hele. **E** Of
 the same water dronke two ounces
 oz two ounces & a halfe/is good for
 cogeled blode in the body whether it
 be of pusshynge/betryng/oz fallynge/
 downe. **F** The same water is be-
 ry good agaynste eatynge sores in
 the mouth/whā the mouth is well
 censed and washed with the same
 water in the moynynge/at none/&
 at nyght. **G** In the moynynge/at
 none/and at nyghte dronke of the
 same water/at eche tyme two ounces
 and the drynke mixed therwith
 is good agaynste the stiches in the

body. **H** The same water
 dronke in the maner befoze sayde/is
 good agaynste swellynge tohan out-
 ward it is layd thereon. **I** A per-
 sone that falleth of the palsey / and
 hath lost his speche/& can nat speke/
 to hym shall be geuyn of the same
 water to drynke / and than he shall
 speke ageyne by & by. **K**
 Taken of perfectly sedys/a smache as
 x. barley graynes be hely / steeped a
 nyght in an ounce of the same water
 and a lytell sponge taken and wet in
 the same water and with a feather la-
 ued & layd vpon the tongue thre oz
 foure tymes in a daye / is good for
 them whose tongue is become blacke
 thzough great and hote sekenesses.

Water of Cresses. ca.ciiii.

D Mucedu in latyn. The best parte & tyme of his dysyllacyon is/the herbe with the steles dysyllied in the ende of may. **A** The same water withdyneth the payne in the tethe whan the tethe be ofte wasshed
H.I.

swell
therewith and rubbed **B** In the
mornynge & at nyght dronke of the
same / is good agaynst swellynge / &
the swellynge rubbed therewith. **C**

Macm
Two ounces dronke of the same wa-
ter in the mornynge fastynge is good
for the wormes in the body. **D**

clayn
Hony myxed with the same water
& a clothe wet therein and fourefolde
of thynges layd vpon fressh blay-
nes / & whan the clothe is drye than
wet them agayne / and that draweth
the redde spottys away. And yf there
be blayues on the legs / tha let blode
on the anclew / & drynke in the mornynge
& at nyght of the same water
with water of strauberyes / and take
hede of all hote meat that cometh
hete in the body of man.

Water of Linaria Cap. c. xiii.

In latyn Linaria. The best
parte and tyme of his dysylla-
cyon is the herbe and steles chopped
to gyder / and dysyllid in the ende
of the maye. **A** The same water
is the moste be st water for rede yen
whan it in the mornynge & at nyght
is put in the yen. And there can nat
better water be foude agaynst rede
yen than the same. **B** Gyuen
thre or foure ounces of the same water
to a man whiche is dysleasid with
the droply / and eaten of the myddest
rynde of the rote of Ebul to moche
as the quantyte of an hasell nut / it
wyl cause to make a mesure or two

mesures of his bryne / the one after
the other / and do it so oftyn tyll the
body be hole.

Water of the myddel rynde of Elder
Capitulo. c. xv.

The best tyme and parte of
his dysyllacyon is ye shall
cut of the grosse and hyppermost rynde
/ than take the other grene rynde
and dysstyle in balneo Marie / in the
begynnyng of Maye **A** The sa-
me water dronke twyse or thryse in
a day / at eche tyme an ounce & a halfe
is good agaynst the droply **B**

causeth laske incontinent withoute
harne well fauerdly.

Water of Elder. Ca. c. xvi.

Sambucus in latyn. The best
parte and tyme of his dysyl-
lacyon is / thuppermoste toppes with
her budd / and leuys / chopped & dy-
style in the myddest of maye **A**
The same water is good for eyll he-
led bonys or legges that hathe bene
broken / oftyn walshed with the wa-
ter & let drye agayn by hym selfe.

Water of floures of elder. Ca. cxvii.

I Lozes Sabua in latyn. The best tyme of theyr dysyllacyon is the floures stroged from the stalkes/whā they be fully tyme/ & thā dysyllid. **I** In the moynynge & at nyght drōke of the same/ at eche tyme an ounce togeth the best. **I** It is good in the same maner vsed for swellynge/ rubbed therewith. **E** The same water put in the yf flaketh the hete of the. **I** In the moynynge & at nyght drōke of the same/ at eche tyme ii. ounces is good for drypse. **E** The same is good for olde holes & sores whiche be colde/ therewith washed. **I** The same drōke is good for leppre. **E** The same is good for treblyng of the hādes wet therewith in the moynynge & at nyght / & let drye alone agayn. **I** In the moynynge & at nyght drōke of the same at eche tyme an ounce & a halfe. vii. oz. r. days continuing/ cōforteth the stomake. **I** In the moynynge & at nyght the face washed therewith & let drye agayn by hym selfe with the same is good

for the dyconynge pryncples of the face. **I** With the same rubbed the necke betwixt/ & cloutes wet therein & layd upon it/ is good for the payn in the hede. **I** In the moynynge & at nyght drōke of the same/ at eche tyme an ounce/ or an ounce & a halfe openeth the stoppage of the lyuer/ wryte/ & tynes/ tootynynge some dayes. **I** The same drōke in the forelāpynge with drōketh the aces of the thyrde day named febris tertiana/ & purifyeth al blode coming of melescolpe. **I** Two or thre ounces drōke of the same purifyeth the vely frō benethe without payne. **I** In the moynynge & at nyght put in the eyen/ causeth the departynge of the humors from the eyen.

I Water of dogges toone. ca. c. xviij.

I Inguia canis in lati/ Chino/ glia in greco. The best pte of his dysyllacpon is the herbe/ leues/ stalkes/ & rotes/ with all his substance/ chopped and dysyllid in the ende of June.

Ili

capit. **A** Thesame is good for the factorat-
res on the fundament; whether they
be inwarde or outwarde. yf they be
inwarde than ye shall drynke of the-
same in the mornig/at eche tyme an
ounce & a halfe tyl they be banysshed
And yf they be outwarde/thā walshē
them with thesame water/& cloutes
wet therin & layd thereon tyl they be
washed. **B** It is good for all wou-
des in the mornynge & at nyght was-
shed therewith. **C** Thesame is good
for olde sores & holes whan they be
washed therewith/& clouts wet ther-
in/& layd thereon.

Water of hempe

Ca. c. xix.

C anapus in latyn. The best
part & tyme of his distillaciō
is in tyme of his yowth & whā he is
grene chopped & distilled **A** That
is principally good for payne in all
partes of the hede/ rubbed & enoynt-
ed therewith **B** Hempen water is
good for all maner hete whet so euer
it be/clouts wet therin & layd thereo
iii. tymes a day in somer/& ii. i. winter.

Water of heris tongue. Ca. c. xx.

S colopendua or lingua cerui
in latyn. The best parte of his
distillacyon is the lese in Maye **A**
of thesame / is good for stoppynge of
the hart / for it cōfōrteth it very well.
B Mornynge & nyght dronke of the
same at eche tyme an ounce / is good
for the myle what payn so euer it ha-
ue yf it be used. i. dayes durynge.

C Mornige & nyght dronke of the
same at eche tyme an ounce & a halfe
is good for the stopped lyuer. **D**

sayd is good for the presynge/named
singulus in latyn. **E** In the mor-
nynge & at nyght dronke of thesame
at eche tyme ii. ounces / is good for the
acres on the fourth day named febr-
quartana **F** In the mornynge & at
nyght dronke of thesame at eche tyme
an ounce & a halfe/ breketh the stone
in þe lymmes/& in the bladder surely.
G Thesame is good for the hete in
all membe/clouts wet therin & layd
thereon/and dronke of thesame
H Thesame myrced with water
of roses is very good for the hore ly-
uer/whan it is layd thereon with hem-
pen towne/& thesame used thre or. iii.
tymes in a daye tyl the lyuer is fla-
ked **I** The canker washed with

the same & cloutes bet therein & layd
there vpon causeth them to hele. **¶**
Two ounces of the same drōke in the
mornynge & at nyght is very good
agaynst swellynge. **¶** The same
water gorgoled is good agaynst the
soze throte/ or payn in the throte/ or
whā the spene cometh in the throte/
for it wasteth it anone. **¶** Then
drōke of the same an ounce & a halfe/
is good agaynst heuy & horryble dze
mes/ which happe often of the euill
mylte. **¶** It is also good agaynst
heurnes in the harte which cometh
also from the mylte & from the meli-
colpe/ whan it is drōnke in the mor-
nyng & at nyght at eche tyme an ou-
nce & a halfe/ pryncypally whan it is
well myxted with the water of Cha-
mariscus/ for they be pryncypally
good for all dysleases of the mylte. **¶**
Drōke of the same in the mor-
nyng & at nyght/ at eche tyme ii. ou-
nces/ withdryneth the congeled blode
fro the harte that layth stopped there
about/ comynge fro fallynge/ withynge/
or pusshynge/ In the moneth of may
drōnke at euery nyght an ounce & a
halfe purgeth the euill from the
body/ & the good abydeyth within the
body/ & the yll is consumed & withdye-
uen out. **¶** Drōke of the same iii. or
iiii. tymes/ at eche tyme an ounce &
a halfe is good for the droppynge of
the Braynes. **¶** Ffth drōke of the
same is very good for heuy & horry-
ble dze mes comynge of the euyness
of the mylte. **¶** Drōke of the same
in the mornynge & at nyght/ at eche
tyme an ounce & a halfe is good for

the pelowe Pandys.

¶ Of Hony water.

Ca. i. xli.

¶ In latyn. The best hony of
bees is that that is whyte/ &
of the bees dwellyng farre fro sea
& fro vnclene places/ & whā ye wyll
dystyll hony myxe it with clene &
whyte washed lade to whā is dyed
agayne in the maner as yf it were
past/ & the fyre must be very softe in
the begynning. **¶** The hede of a wasp
thāt is ridded therewith causeth to
grow fayre & lōge heres. **¶** The
melis good put in the eyes. **¶** The
same cleareth all vnclene woundes/ &
all olde sores and holes/ ones or
twyse washed therewith. **¶** Often
washed with the same woundes/ &
cloutes whā & layd there vpon causeth
flesch to grow in the woundes. **¶** The
same heleth dreynynge/ cloutes wō-
lath theron. **¶** Now I wyll lerne you
an other maner for to dystille hony
water. Put as moche hony as ye
wyll in a croked glasse named retor-
tum/ and stoppe it woth fast/ and let
forty dayes in horse donge/ but the
donge must euery senyght be rene-
wed. Then put the glasse in a
wynde curn/ & dystyll it per Ale-
mbicum/ and whan it wyll droppe to
fast/ yder it softer/ The fyrt water
is whyte and clere/ but that put
awaye. The seconde is yelowe/ and
that shall ye kepe. **¶**
Whan the pellyence cometh on one
thā take of the same water an ounce
& alopecurū/ tubea tinctorū/ murre/

for

yeu

wash of

woundes

posible

Dryent saffron / of eche .xx. barly cor-
nes of weyght / & a lefe of fyne be-
tyn golde / bray all these together well
tempered / than geue it the seke body
to drynke / for it is specially good for
that and for many other dyskaies.

¶ Of howseleke water Ca. c. xxi.

B Arba Jouts in latyn. The best
parte of his distillation is the
small leuys chopped and distilled in
the ende of May. **A** The same dy-
stilled slaketh all hete where eue it
be / and in what place / clowtes wet
in the same and layd ther vpon / and
the same water is to moche colde of
his nature / therfore it is nat good
to be dronke / without it be myrred
with other waters. **B** The same

water is good for the syuer when it
is myrred with a lytell water of ro-
ses / and hempen to be wet with the
same and layd vpon the place of the
syuer. **C** The same is good agaynst
the hete of the prestence in the fore-
sayde maner layde there vpon / & the
membres rubbed therewith. **D**
The same water soden with oyle oly-
ue and put in the eares causeth he-
ringe. **E** It is very good agaynst
the growte principally for men /
Thee or foure folde clowtes wet ther-
in / and a lytell toonge out agayne
and wapped thereon. **F** The same
water is good for them whose yem-
be bakyn together of matter / or of
other vncleane humours that they
can nat well oppen them / than the
yemlyddes be half opened & enoyr-
ted with the same water. **G** A
clowte wet in the same water / & tha
toonge out agayne somewhat / with
dryeth the swellinge / yf it be layde
theron in the mornynge & at nyght.
H It slaketh the brennyng and all
hote diseases / yf clowtes be wet ther-
in and layd there vpon. And when a
boby hath feare for hete / or swelling
than clowtes beynge wet in the same
layd there vpon / pulleth out the same
hete or swellinge. **I** The same
water is very colynge & lytell dry-
enge / & is as wagyng in all thynges
and is good agaynst the sore named
Erysipila / and other hote imposu-
ries whiche be etynge aboute and
remoue from the one place vnto the
other / to be wet therein and layd there
vpon with clowtes.

A The same water layd vpon the
hote podagra flaketh them. **A**
It heleth the brennyng of fyre whā
it is myrred with oyle of roses/and
layd thereon. **B** The hede enoy-
ted with the water & let drye agayn
by hym selfe/is good agaynst the
payn comyng of hete. **A** Clothes
wet in the water/& ofte layd vpon
the hede & wrapped therein/is good
agaynst the fode of the braynes. **D**
Wine myrred with the same water
& dronke therof thysle in a daye/at
eche tyme an ounce or an ounce and
a halfe/stoppeth a great laske.

Water of Alnus.

ca.c.xviii.

A Lnus in latyn. The best
parte & tyme of his dy-
styllacon is/the yonge leues/in the
begynnyng of the Maye. **A** The

Water of *Trica* in latyn. The best par-
te and tyme of his distilla-
cyon is the leues the herbe and the
flowres stropped frome the stalkes
in the moynynge before the ryng
of the sonne chopped and distilled in
the tyme whā is bereth fully his flou-
res. **T**he same water
is maruelously good for seke and fe-
ble pēn/whan in the moynynge and
at nyght/two or thre droppes of the
same be put therein/ and enoynted
therewith rounde aboute. And in the
somer to lōke vpon the grene felde
and places conforteth also the eyn.

Water of *Amertwoxe*, Ca. c. xix.

Rhologos longa in latyn.
The best parte and tyme of
his distillacon is the rote the her-
be with all his substance chopped
and distilled in the myddest of the
maye. **T**he handes in the
moynynge and at nyghte often was-
shed with the same water/ and lette
dye agayne by hym selfe/ is good a-
gaynst tremblynge of the handes.

The same water is good
for all woundes and causethe them
to be quicklye hole/ whan they be
washed in the moynynge/ or at nyght
with the same water.

In the moynynge/ and at nyghte
dronke of the same water/ wyth-
neth the backe of the mynde.
The same water dronke in the mo-
ynynge and at nyghte/ at eche tyme a
ounce boith dryeth the paine in the
sydes/ and the same water washed the mem-
bers in the moynynge and at nyght/ is good
agaynst the crampe/ whan it dyeth
agayne by hym selfe.

In the moynynge and at nyghte dronke
of the same water/ at eche tyme an
ounce slaketh the thirst in a body.
The same water dronke in the mo-
ynynge and at nyghte at eche tyme two
ounces causeth moche of sperma.

Of the same water
dronke in the moynynge/ and at nyghte
and the members rubbed therewith
easeth podagra.

and at nyghte at eche tyme an ounce
or an ounce and a halfe/ or two oun-
ces is very good agaynst the fallyn

ge feketes named epilecia. ¶ The
same water dronke in the folowynge
maner is good for the payne in the
belly.

Water of Heron. Cap. c. xxi.

¶ *Opia minor* in latyn. The
best parte and tyme of his dys-
tillacion is althe herbe distilled in
the ende of the maye. ¶ The
same water is good agaynst the hete
of the lyuer/whyle in a day layd ther
vpon with towte of hempe wette
therin. ¶ The same water is
good agaynst hote swellynge/wet
therin a linnen cloute & a lytell wron-
ge oute agayne/and layde theron/&
is often bled. ¶ The same water
is good for woundes in the mornyn-
ge washed there with/and clowtes
wet therin and layd ther vpon. ¶
Whan a body is seke it is good to gy-
ue hym to drynke of the same water
bycause that no goute come vpon
hym/ys he hath the goute and dryn-
keth of the same water/than the gou-
te shall leue hym and com not vpon
hym/agayne. ¶ Of the same wa-
ter dronke thysle in a daye/at eche
tyme an ounce and a halfe/is very
good for them that longe tyme haue
ben seke/therwith they shall become
quycke agayne.

Water of hennes. Cap. c. xxi.

¶ *Allina* in latyn. And shall be
distilled in the same maner
wozote a good blacke henne/why-
che is two or thre yere of age/ and

plucke the same well close without
wettynge of warme water. Then put
of all feders/ grece & entrayles and
choppe that in smal peces/and distil
the same in an helmet. After that
put the water in a glasse and distill
it per balneum marie. ¶ Water
of hennes shall be gyven to drynke
to them whych haue ben so longe se-
ke/that he is hole consumed and is
hole feble and faynte, it is good abo-
uemeasure for such one/for it gyueth
hym so moche vertue & strengitheth
hym so moche, that al the medecyns
haue meruayll of the same.

Water of hartes horne. Cap. c. xxii.

¶ *Orni Cerui* in latyn. The
best tyme of his distillacion
is whan a myddell aged harte had
cast of his hornes/& there ben other
newe hornes growynge vpon a quar-
ter and a halfe of a yerde longe/and
in the tyme that they be soft & ten-
der lyke a cartylago that is a gyfte
than they shall be chopped and distil-
led. ¶ The same water dronke an
ounce/ or an ounce & a halfe stoppeth
the flood of the floures in women/
whych is sure and truly founde.

Water of the herbe of hoppes.

Capitulum

Capitulum

A Alkakengi in latyn. The be
ste parte and tyme of hys dy
styllacyon is/the berres in the secon
de moneth of heruest/wohan they be
fully ripe. **A** In the moynynge
at none/and at nyght dronke of the
same water at eche tyme for an olde
man/ an ounce and a halfe/or two

ounces and for a yonge chyld hal
fe an ounce / is one of the best waters
agaynste the stone that can be gorten

B The same water
bled in the forsayde maner is good
agaynste the grauell in the hymen
and to the bladder / bycause it hath
a wonderfull vertue and nature to
thensyng of the raynes and bladder

C The same water is good for
them that can not pisse to be dronke
twyse in a daye for it conuerteth the
bryne to hys naturall condytesy
and causeth wold to pisse / and it is
trewe.

D The same water bled
in the forsayde maner / is very good
agaynste the impostumynge in the ray
nes and in the bladder / for it purgeth
ethem.

E In the moynynge
at none / and at nyght dronke of the
same water / is very good for them
that pisseth blode. The herbe of them
maye be dystilled in June / but it is
not so good / nor so myghty as the
water dystilled frome the betyes.

F In the moynynge and at nyghte
drake of the same water is good for
the parallis.

Water of plope **Ca. lxxix.**

I Sopus in latyn. The best ty
me and parte of his dystilla
cion is / onely the leues stroped from
the stalkes dystilled in the tyme
whan it bereth blew flowers / that
is in Auguste. **A** In the moynyn
ge and at nyghte dronke of the same

is good for them that haue a hoarse
voyce to make cleare. **B** In the
moynynge and at nyght / at eche ty
me dronke two ounces / is very good
for them that haue great coughe co
myng of moistnes / and can not boye
de it / causeth the same coughe and all
the dysleales of the longues / and su
eth the lyke.

C The same dronke in
the forsayde maner is good agaynste
all dysleales of the longue comynge
of the slymy and the slegmatyke ma
ter bycause it warmeth and dryeth
the longues / and is specially good
agaynste the impostumynge of the lo
gues / or other dysleales of the loques

D The same wa
ter dronke in the forsayde maner / we
keneth the tough slymy slegmatyke
mater of the brylle.

ter is good agaynst lyce and causeth
them to fall of. **f** It is also good
to all freshe woundes, in the mo-
rynge and at nyght washed there
wth **G** It is good agaynst swell-
ynge of the woundes, to han a clou-
te is wette therin and layde on the
wounde **H** Of the same water
dronke an ounce and a halfe mixed
with as moch wyne stoppeth the blo-
dy fluxe named differencia **I**
Dronke of the same thre or foure ty-
mes in the moynge and at nyghte
dryueth out the after byrthe named
Secundina. **k** An ounce and a
halfe, or two ounces mixed wth
wyne is good to be dronke for them
that pylse blode **L** The same dō
ke in the forsayd maner is good and
cleaseth the bladder.

M In the moynge and at nyght dō
ke of the same water, at eche tyme
an ounce, is good for the that haue a
colde stomake

N Two or thre tymes in a daye dron-
ke of the same water, at eche tyme
an ounce is good for them that haue
a shorte heuy brythe bycause it ta-
keth away the hycke.

O The same water maketh impossibi-
les and other harde thynges we-
ke, and causeth warne thynges to
chaunge, for it is colde and moyst.

P Twyse in a daye
dronke of the same water at eche ty-
me an ounce or an ounce and a hal-
fe prouoketh the floures in women.

Q The same water is
colde and moyst of nature, therfo-

re it worketh in the bely, to han it is
dronke thre tymes in a daye, at eche
tyme an ounce and a halfe, or two
ounces.

R water of the herbe peruyrike.

Capitulum

c. xli.

R Cruinea in latyn. The best
parte and tyme of hys dystyl-
lacpon is, the herbe growynge by
hym selfe dystylled in the may.

S In the moynge and at
nyght dronke of the same water, at
eche tyme an ounce and a halfe, is
good for women whiche haue a col-
de moder.

T Two tymes in a day

for them that haue a colde stomake
and a clotwe wette in the same and
layde thereon causeth it naturally to
warne.

U water of Cardus **Ca. xlii.**

U Irga passours in latyn. The
beste parte and tyme of hys

dystyllacyon is the leues stroped fro
the stalkes and dystylled in the myd
dest of the Maye. ¶ The same wa
ter is good agaynst the corrosyng and
eatynge sores in the mouth / it often
wasshed therewith. ¶ The same
water is good agaynst the soze na
med the thoyne / whan a man layeth
doubt / or thze folde cloutes wet the
rein / and somtowhat wyonge out &
so bypon the sozes often renewed.

¶ The same water is good for
the paralisis often rubbed therewith
and let drye agayn by hym selfe.

¶ The same water is very colde
inclynnyng to a draught / and is sty p
tica / therfore it is good agaynst all ho
te impostumes / erisipila / and flegma
ppyncypally whan in the begynnyn
ge cloutes be wette in the same and
layd thereon ¶ The same is good for
the hete & for the brennyng of the sto
make and lyer / cloutes wet theru
& laid outward thereon / & also som
what droke therof. ¶ In the forsay
de maner vsed the same is good for

the brennyng ¶ The same water is
good for impostumes whiche comie
of mattery humours / & impostours
whā it is layd thereon with cloutes
¶ It heleth & cureth also woundes
¶ The same water is good agaynst
payn in the eares / whan it is put in
the eares. ¶ Of the same droke at
eche time an ounce is good for impo
stumynge in the guttes. It is also
good for ourmoche flode of the flou
res in womē & for other flodes whe
re so ever they come of. ¶ Whan in
thesame often cloutes wet & towe &
layd vpon the forcheade / yketyrpe an
Epithima / it preserueth the bzaynes
madnes & frenely / that they can not
gette place in the bzaynes ¶ The
same is for woundes whiche begyn
to matter / washed with the same &
heleth the.

¶ Of the water which is dystylled
of the water standyng in the cardes
Capitulum c. xlii

¶ Qua cardonū in latyn. The
best tyme for to gadder this
water is in the maye whā it can not
be goitē / thā put it in a glas & set it
xl. days in the sonne / & than dystyll
it per fyltrū. ¶ The same is better
for the eatynge & corrosyng in the mou
the / thā the wat dystylled & brenned
of the leues of cardes ¶ The same
is good for the wrattes in the fonda
ment ¶ The same is good for blay
nes on the handes / fete / & toes whā
they be tusk sōw bat with a needle let
out / & powder brenned of puzoy stre
wed therein / & at eche tyme with the
same water wasshed of.

D The same water is very good agaynst the yelow spots in the face/whych be come of lechen. When the face is washed therewith/and at every thre dayes goynge in the hote howse. **E** The same water is a very good connyuge for to make the face clere and sayre/and healeth all dysleases of the face/whā it is in the moynge and at nyghte enoynted therewith.

Water of palacum and nat of Cefifolium sedes. **Ca. c. xlii.**

Four castoll

Palacum in latyn. **A** The same water is good for them that haue an in dyed nature and by stroyed/whyle oz thyrte dionke of the same in a daye than the persone shall amende and the nature shall be recouered and come agayne. And yf a person weneth that his nature wyll fall betwene the fleshe and the skynne/wherof he myghte become vncleane and scabby/ than he shall dionke of the same as before is said and it shall not be so. **B** water of the same dionke in the forsayd manner/ prouoketh the flouze in womē

C The same water is good for a woman berynge chylde/ and sucketh another chylde/whā she dionketh an ounce and a halfe/ oz two ounces of the same water/ than it shall not be scathefull to the chylde that she bereth/ nor to the same that

she sucketh. **D** In morn and a halfe oz two ounces dronke in a day enoynteth the womans howse/ and cauleth them to be met in thyr myndes.

Water of Cheruell.

Ca.

C Cefifolium in latyn. The best parte and tyme of his distyllacyon is/ the herbe/ the stalk/ the rote/ with all his substance chopped and distyllid in the myddest of the maye. **A** The same dionke in the moynge and at nyghte at eche tyme two ounces/ is good for them that beren/ and for them that haue had a sore fall/ that the blood cometh to gyder/ and yf it were congeled it cauleth it to departe agayne. **B** The same myxted with other conyng water/ and so dionke at eche tyme two ounces is good agayne the stone in the raynes. **C** The oz four ounces dionke of the same water at ones cauleth the laibe.

Distillacyon of hyssop. And at nyght
 droppe of hyssop water at eche tyme
 an ounce and a halfe/causeth a good
 stomack. **I**tem. **D**rinke of
 the same in the folowynge maner streng-
 theneth and conforteth the harte. **I**
 In the mornynge and at nyght drin-
 ke of the same water at eche tyme. ii.
 ounces wythdryueth the agues or fe-
 ures. **E** The hede enoynted
 wyth the same water/ and lettedrye
 agayne by hym selfe is good for the
 hede and conforteth the wyttes. **I**
 In the mornynge/ at none/ and at
 nyght drinke of the same water/ at
 eche tyme an ounce and a halfe/ wyth-
 dryueth the greates styches/ and pay-
 nes in the sides. **I** The sa-
 me water drinke in the folowynge ma-
 ner/ at eche tyme an ounce/ or an
 ounce and a halfe/ is very good for
 the lunges/ and for all theyre dys-
 eases.

Water of Carleke. Cap. c. lvi.

Rum in latyn. The best por-
 tion of hyssop water at eche tyme
 is the rote stamped and dyslled in
 the cantuler doyes. **I**tem. The
 same water drinke at eche tyme an
 ounce/ is good for the that be smol-
 len in the necke and a clowte twete
 in the same water a wapped about
 the necke/ and so often doneit shall
 be hole. **B** Two or thre
 ounces drinke of the same water is
 good agaynst the grauell/ and cau-
 seth well to pisse. **C** In the
 mornynge and at nyght drinke/ at
 eche tyme an ounce and a halfe/ is
 good agaynst the colic/ and hel-
 peth them that be of an heuy brette.
D The same drinke in the folow-
 ynge maner/ is good for the that can
 nat go to stoe/ and wolde sayne/ it
 helpeth to the same very well. **E**
 Of the same water drinke in the
 mornynge fastynge/ an ounce of a
 chyld/ of an olde persone an ounce
 & a halfe is good agaynst the spoul
 wome in the bodye. **I** In
 the mornynge/ at none/ & at nyght
 drinke at eche tyme an ounce and a
 halfe is good agaynst the droppe
 pisse named straunguria.

Water of trayfles. Cap. c. lvii.

Risolum in latyn. The best parte and tyme of this distillacio is the leues and the floures brened/ or distilled in the myddest of the maye/

In the morninge and at nyght dronke of the same water at eche tyme an ounce. and a halfe is good for the euill stomake.

In the foresayde manner dronke of the same water is good for the euill and synkyng brythe.

Dronke of the same water in the foresayde manner/ at eche tyme an ounce/ or an ounce and a halfe stoppeth the whete in women named mēstruum album.

Water of quynce ca. c. lviij.

Quina citonizum in latyn. The beste parte and tyme of

theire distillaciō is/ when they be fully ripe/ or they begynne to be soft/ for the harder the better/ chopped stamped/ & distilled/

Two ounces of the same water mixed with an ounce of rede wyne whiche is sipticum/ and in the morninge/ at none/ and at nyght/ dronke so moche is very good for the euill to the stomake/ by cause it strengetheneth and comforteth the stomake/ & causeth it to kepe the meate/ and is good agaynste waloptyng and parbrayng/ named nauſea in latyn.

It stoppeth also all maner of lasche/

Water of the floures of Quynce Capitulum.

Quina citonizum in latyn.

The best tyme of theire distillation is/ when they be fully ripe/

In the morninge and at nyght dronke of the same water at eche tyme an ounce/ myxt with in women theyre floures/ when they haue to moche of them.

The same water dronke in the foresayd manner comforteth the harte

A Loꝝes papaueris rubri in latyn/ the beste parte and tyme of theyre dysyllacyons/ is the leuys of the floures dysstylled in the byngnyng of Iune. **A** In the moꝝnyng and at nyghte dronke of the same water at eche tyme an ounce is very good agaynst all maner of inward sekenes compynge of here.

I Lozes papaueris rubei in lati.

The best part & tyme of the dys-
sillacyon is/ the leues and floures
distilled in the begynnyng of June
In the moornyng and at nyghte
dronke of the same water/at eche ti-
me an ounce/is good agaynst all in-
warde sekeneys comyng of hete.

B The same water is specially
good for the lyuer/to han it is full of
unnaturall hete/& the water dronk
in the foresayde maner/and cloutes
wet in it and layd on the lyuer out-
warde/

C In the moornyng/at
none/and at nyghte/dronke of the
same water/at eche tyme an ounce &
a halfe is good agaynst the wyld
fyre

D In the moornyng and at
nyghte dronke of the same water at
eche tyme an ounce & a halfe/is good
for saynt Anthonsys plage or fyre/ys
the drynke be myrred therewith/and
clothes or towne wet & layd vpon it

E The same water dronk two oun-
ces/and clothes wette therin & layd
betwene the brestes of a womā/stop-
peth the flode of her floures ys the
hatheto moche of them

F In the
same water wet clothes and layde
betwene the brestes/and on the nose
thylles/ stoppeth the blode at the
nose.

G The same water is good
agaynst all vncleue etyngge sores/&
agaynst scabbes & sores aboute the
mouthe/often washeth therewith/it
heleth the same/

H Put seven or
viii. kernels of quinces in an ounce
of the same water/& rubbe therewith
the tongue/or do it without the ker-
nelles/and scrape the tongue with

a small knyfe of woode of a byme/or
of a quince tree/it wylle hele the ton-
gue to which was blacke thurgh the se-
kenes/

I The same water is
good agaynst all spottes of leppe
washeth therewith/& cloutes wet ther-
in & layd vpon it

K The same wa-
ter is good agaynst the dysleases na-
med the rede flysshe/wet therin a ty-
nen clothe and layd there vpon

L It is also good for eatyngge and cor-
rosyngge sores/scabbes/and blaines
on the secrete place of womē/in the
moornyng & at nyght washeth ther-
with/and clothes wet therin & lay-
de vpon it.

M The same water
is good agaynst the swollen mānys
yarde and holes/clothes wette ther-
in & wapped rounde about the yar-
de twyse in a day.

N It is good for sores & holes in the
mānys yarde/cloutes wet therin &
often wapped thereon

O It is also good agaynst the unnatu-
rall hete/as the thorn/cloures wet
therin & layde thereon/

P It dryueth awaye the payne in the
hede comyng of hete/to han the fore-
hede/the temples/and the necke enoi-
red is therewith/

Q A clothe wet
in the same water and layde aboute
the eyen dryueth awaye the payne of
the eyen/and pulleth out the hete of
them.

R The same water is
good to be dronke agaynst feblenes
and sayntenes of the harte

Water of woyses.

Ca. c. li.

D Lus in latyn. The beste parte
and tyme of his dystyllacyon
is the leues henned and dystilled in
the begynnyng of June. **A** In
the moornyng and at nyght dronke
of the same water/at eche tyme an
ounce and a halfe/ stoppeth the flode
of the floures in women. + **B** In
the same maner dronke of the water
is good for them that ysse with pai
ne named strangury. **C** The sa
me water is yll for women berynge
chylde/ because yf a woman dronke
it/ the chylde shold dye/ and she shold
laboure before her ryght tyme/ and she
her selfe in daunger of her lyfe/
Nevertheless though it be not com
mende for me to wyte of the same/
for all that it must be knowen for the
great scarre that therof myght com
and that every woman sholde take
hede for the same **D**

A cloute wet in the same
and holden before the nose of a wo

Relpeth yf dronke

man laborynge of chylde/ resulteth to
her a lyghter byrthe. Et docuit expe
riencia. **C** In the moornyng
at none/ & at nyght dronke of the sa
atechetyme an ounce and a halfe sto
peth the lastyngre.

*Proprio
cap*

Water of Capones.

C. c. i. r.

C Apo in latyn. The best parte
and tyme of hys dystyllacyon
is. ye shall take a blacke capon foure
or fyve yere olde/ and wrynne and
pluck hym without twenty dayes of wa
ter/ thereafter cutt hym in four quart
ters and put away all the grace fro
m hym and washe well and make cle
ne the entrayles/ and than choppe
hym in small peeces/ and dystill hym
than per Alembicum/ or in a helmet
of the other waters. But it is good
that the water whiche is dystilled
thruge the helmet be put in a glass
and dystilled agayn per Alembicum.
A The same water dronke
in the moornyng/ at none/ and at nyght
at eche tyme an ounce and a halfe/ &
his drynkynge wyne myxed with
the same water/ is very good for a
man that hath ben so long wyke that
the humidum radicale is all moiste
gone/ and is lene and hole consumed
for it coloryeth and strengtheneth the
nature of the body/ & the humidum
radicale/ and reioyseth the spryde/

B Cople in a daye dronke of the same water catoweth appetyte to eate meate/ and conforteth the nature and the body and wythdryueth all dysseases frome the harte & strengetheth a persone so much that it is seene on hys body. **B** In the moornyng and at nyght the face washed wyth the same water and lette drye agayne by hym selfe causeth the face to be fayre and cleane

Water of Lettys. Capit. lxi.

L Actica Domestica in latyn. The best parte and tyme of hys dryllacyon is/ onely the herbe drylled in the myddest of the May. **A** In the moornyng & at nyght dronke of the same water at eche tyme an ounce colety and conforteth naturally the leuer,

The same water dronke in the foresayde measure and maner colety the hote and inflamed blode. **C**

Often dronke of the same water at eche tyme an ounce or more stoppeth the bloody flyte named Dissenteria/ and other laskes/ whan of them it is to moche. **D**

with the throte and largely the brest
A In the morninge & at nyght
 drinke/at eche tyme an ounce and
 a halfe/openeth the barnes of the li-
 gue **B** Thre oz. iii. tymes drinke
 of the same water/at eche tyme an
 ounce and a halfe/withdraweth the
 thyrst/and tempereth the hett of the
 liver. **C** Drinke of the

same in the foresayde maner & me-
 sure/tempereth the hett of the stomake
 the raynes/and of the bladder.

D Thre ounces drinke of the same
 water/& clothes wet therin & layde
 vpon the hely/causeth lashe.

Water of Louage. Cap. lxx.

L Eustacium in latyn. The best
 parte and tyme of his distyl-
 lacyon is/the leues and stalkes to-
 gyder chopped and distylled in the
 myddest of Maye **A** Clothes wet
 in the same water/and layd vpon the
 hede/is good agaynst the wellenge
 of the hede **B** In the morninge
 and at nyght drinke at eche tyme an
 ounce/oz an ounce & a halfe/is good
 agaynst the syches in the syde/oz a-
 bout the brest **C** The face washe
 with the same water/causeth it to
 be fayre/whyte/& cleve. **D** In the
 morninge/at none/and at nyght/
 drinke of y same water/at eche tyme
 an ounce & a halfe/is good agaynst
 the stone/& gravell i the lymmes/&
 in the bladder. **E** The same wa-
 ter drinke in the foresayd maner/as
 good agaynst hopenes

F The same water goodlyd is
 good agaynst the dyscolouring is the
 throte **G** The same water is good
 for the that haue claymes on the leg-
 ges/and the legges be red and sore
 than clothes wet in the same water
 & layd thereon/shal shew the bote.

H The same water heltheth the
 tauter in the mouth/and it be wat-
 shed therewith/and at eche tyme
 washeth therin of the rage named Ger-
 sail oz berlyon.

I The same
 water heltheth all sores and puer in
 the secote of women/theye of thyrst
 washed therewith in a day/and clo-
 thes wet therin & layde there vpon.

Water of y blossom of Lynde. Capitulo. lxxi.

Lores Tilt in latyn. The best
 parte a tyme of his dyschalla-
 ge is onely the bloode whā it is ful-
 ly yssed. **A** In the mornynge &
 at nyght drōke of the same water at
 eche tyme an ounce is good for the
 that hath the fallinge sekeneſſe. **B**

stomake
M In the moꝝnyng/at no
ne and at nyght/dronke of the same/
at eche tyme an ounce and a halfe /
mixed with thre ounces of good wyht
wyne conforteth the colde stomacks/
and warmeth it agayne.

Water of the herbe of poppe.
Capitulo. c.lxxiii

Papauer in latyn. The best
parte of his distyllacyō is the
herbe of the whyte poppe sedes/and
ther after/ of the whyte graye poppe
sedes/ chopped and distyllled in the
begynnyng of the moneth of Iune.

A The same water is good for the
red spots in the face/twoyle in a day
the face wasshed therwith **B**

The handes often wasshed with the
same and let dry by themselves/caw-
seth whyte handes. **C**

Two ounces dronke of the same go-
ynge to bed and the temples and the
betynge baynes rubbed therwith/
causeth well to slepe/& to kepe good
rest **D**

The hede enoy-
ted with the same water twoyle in a
daye/& let drye agayn by hym selfe/
softeneth the payne in the hede.

E The same water flaketh
all hete/cloutes wet in the same and
laid ther vpon thre tymes in a daye.

F The same it good for them
that be brenned of the sone.iii.tymes
in a day/clouts wet therin and laid
there vpon.

**Water of Lyntydehoe / oz duckes
meat. Capitulo.lxxv.**

Lenticula aque/bel lentigo
in latyn. The best parte and
tyme of his dysyllacyō is /they shal
clene be washed and a spell dyed
agayne /and dyspylled in June. **A**
In the mornynge /at none /and at
nyght /dronke of the same water /at
eche tyme an ounce /helpeth a persō
all were he brenned and inflamed
inwarde in the body /and yf it be out
warde /than shal hempe to be wet
in the same /and layd thereon thre ty
mes in a daye /and at nyght.

Water of the maye dewe
Ca. clxxvi.

13 Os Mait in latyn. The best
pte & tyme of his dysyllacyō /
is ye shall i the myddell of may whā
the mone is encreasyng and almost
full /go in a sayze clere mornynge /
before the rysynge of the sonne /and
that whā in the euenyng noz in the
nyght before it had not rayned /thā
draw a great linnen clothe ouer a pa
sture oz felde /where as grow many
floures /and the pasture shadeth farre
fro watery places / & the nygher it be
to the montaynes /the better it is. Af
ter that wrynge the dewe out of the
lyne clothe in a glasse / & do it so of
ten tyll ye haue ynoughe of the same
dewe /than strayne the dewe thurgh
a sayze linnen cloute /and put it in a
glasse /and dyspyll it per Alembicum
in balneo marie /after that set hym
xxx. dayes in the sonne. **A**

The same is good whan a body hath
an vnclene hed / & spottes in the face
than shal it be washed in the mor
nyng and at nyght with the same
water /and let it dye agayn by hym
selke /than it wyll go awaye. **B**
The same water withdryueth Cut
tan roseam / which cometh fro hete
oz fro hote blode / and fro the lyuer /
whych becometh so hote in the face /
that therof becometh and appere rede
spottes in the face / lyke as yf a body
were leprouse / in the mornynge and
at nyght washed with the same
water /and let dye agayne by hym
selke. **C** In the mornynge and at
nyght longe tyme the face washed
with the same / withdryueth the frou
res of the face /and causeth a sayze &
clere face.

Water of Coloslop. Ca. clxxvii.

Saponaria bel herba hullonū
in latyn. The best parte and
tyme of his dysyllacyō is / the herbe
and the rote chopped to gyder & drye
ned oz dyspylled in the begynnynge
of June. **A** Thre ounces dronke
of the same water is good agaynst
the pestilence. **B** In the mor
nyng & at nyght dronke of the same
water at eche tyme two ounces / is
good agaynst impostumes / & agaynst
streynes about the brest.

Water of mannes blood.

¶ ii.

Sanguis humanus in latyn. The best parte and tyme of his distyllacyon is the blode of a mā of xxx. yerres / sangwyne of cōplexion warne and moyste of nature reioy syuge of mynde / sayr / clene / and hol- some from all sekens / whiche be let blode throughe the moche superfluyte of blode brenned or distylled in the myddest of the Maye / or about the Maye. **A** The same water is good agaynst a consumed membze / the mē bze well and soze rubbed therewith / thez or four tymes in a day / than cō meth the mēbze agayne to his ryght condycyon. **B** In the moynynge and at nyght / the same water is good to be dronke / at eche tyme an ounce for the ptylis and etilis / and for the consumynge sekens of the longues / & also agaynst the consumynge of the longues / and agaynst the consumynge of the body. **C** With the same water the hede rubbed causeth the here to grow. **D** The fistules washed with y same water / & drop ped therin / heleth them.

Water of manes tozde. Ca. c.lxxix.

Imus humanus in latyn. It is distylled in this maner. Distylle mannes tozde in an Alembike / and take hede that there come no water to it / and that he be a lytle

drye / whan ye distylle it and take hede for his smellynge / and distylle them secundarely in a netwe glasse in balneo marie / in lyke wyse do with the blode. **A** The same water is costlier than golde to many maner of dysleases / and specially for the bzē nyng / yf a body were bzennyd / he shall be enoynted with the same water in the moynynge and at nyght & he shall be hole. **B** The same water put in the eyen / withdryueth the flode of the eyen / & bzeketh the skyn of the eyen / & putteth awaye the spot tys of the eyen. It is also good for many dysleases of the body / and some call it aqua vite / as they call the bzē nyd wyne. **C** Euery day rubbed and washed the balde place. iii. days contynuyng / causeth the here to grow.

D The same water heleth all ympossumyng comige on the legges / and the dysleas named malum mortuum / that be grear vn- clene spots & holys whiche be etige & corrosynge within / & also rounde about / they shall be washed with y same water / & after the waschyng shall be strewyd powder of mannys blode vpon it. **E** In thys maner ye may proue yf the same water be good and very well distylled / Make an yron glowynge hote and putte it in the same and make it with the same / it wyll become as harde as any stele / But yf the water be nat ryght well distylled / Than the yron shall nat become no harder / than it was before.

F The same water rubbed on the tem

ples of the hede withdrieth all fear
full and horryble dreames.

A body that hath a red face/lyke as
yf he were leprouse/shal washe his
face with the same water/than it
shall become fayre and whyte.

Set the same wa-
ter in any place in the sonne/and
theroute shall growe woymes. And
whan the woymes be greate/than
take them out of the feces/ & put the
in a smal croked glas/or in an other
small dystyllinge glasse/and dystille
it per Alembicum/with the same wa-
ter washe your face clene and fayre
and well dystosed of colour/vt ratū
inuentum est/et veritati consonum/
but the face must be fyrste washed
well with comon water.

Take water of mannes tozde
of eche lyke moche/and put them to
gyder vppon the feces of the man-
nes blode/and dystyll them secon-
darely. The same water is very good
for them that is fallen of the palsey
and can not speke/than shall ye put
them to gyder vppon the feces of a
lytell of the same water vpon his to-
gue/and the temples of the hede rub-
bed therewith/tha he shal becom hole.

In the same water put a glowyng
cole in a glasse/ & leue a wynde hole
as great as a strawe pype/the cole
abydeth glowyng hote as longe as
there is any water in the glasse.

Cotton wet in the same water
and lette drye by hym selfe/and do
it thre tymes/whan the cotton is
holde in the sonne/ & become warme

in the sonne/than the cotton beco-
meth brennyng, and kyndelet of
the hete of the sonne/And whan ye
wyl dystille those thre forsayd wa-
ters/than take hede of theyr smel-
lynge and synkyng/bycause it sholde
do you great harme.

Water of Scestrope.
Cap. c.lxxx.

Antum capita bel pringus in
latyn. The best parte of his dy-
styllacyon is/only the rote chopped
and dystilled in the ende of the may
and nat later.

In water of the same dronke in the mo-
nyng and at nyght at eche tyme an
ounce/or an ounce and a half/is ve-
ry good agaynst the dropping pylle
named Stranguria.

The same water is good/ & multi-
plyeth the sperma/and moueth and
prouoketh the worke of venus or le-
chery.

Water of mayden here. Ca. c.lxxx.

Apillis veneris / or Coradru
putei / or capillus purcinus in
latyn / The best parte and tyme of
his distyllacyō is / the herbe with all
his substaunce distyllled in the myd-
dest of the Maye / or betwene bothe
our lady dayes. **A** In the mornynge
and at nyght dzonke of thesame / at
eche tyme an ounce and an halfe is
good agaynst the inflamed lyuer /
and colet thesame. **B**

The same water is good agaynst the
rottyng lyuer / whan it is dzonke
in the mornynge as forsayd. **C**
In the forsayd maner dzonke of the
same water is very good for them þ
haue tomoche occupied the playnge
of venus / or the worke of generacyō
that his lyuer wyll be destroyed.

Water of butter flobores.
Capitulo. c.lxxxii.

The best parte & tyme of his
distyllacyon is only the flou-
res whan they be well ripe distyllled.
A The same water is good for
the ympossumynge of the ypen / in the
euening put an houre before nyght
in theym / & rounde about therewith
enoynted. viii. or .x. dayes continui-
nge onys in a day. It is good also
vsed for all dyseases of the ypen.

Water of rede docke. Ca. c.lxxxiii.

Apatium acutum in latyn.

The best parte and tyme of
his distyllacyon is the herbe / & the
rote chopped togeder / and distyllled
in the ende of June / But whan ye
wyll distyll only the herbe / it shalbe
distyllled in the ende of the may / and
the rote betwene the two saynt mary
dayes. **A**

Twyle or thysle
in a day dzonke of thesame water /
at eche tyme an ounce & a halfe / or
two ounces is good for scabbes / and
therewith washed outwardly / and
let dye by it selfe agayne.

B Thys water
is also very good agaynst the impet-
gines / euery day rubbed therewith
and let dye agayne by them selfe /
specially whan ther is put to it / sal
gemme / or comon salt with a ytell
bynegre.

Riosella vel auricula muris i
latyn/The best parte & tyme
of his distyllacyon is/the leues and
stalkes with all his substance bren
ned and distylled in the ende of may

In the mornynge
and at nyght dronke of thesame wa
ter/at eche tyme an ounce or an ounce
and a halfe/is good agaynst consu
myng of the body

Thre tymes in a daye dronke luke
warne of the same water/is good
agaynst the payn in the bely and bo
welles/at eche tyme an ounce and a
halfe.

Dronke of thesame water in the fol
lowyd maner is good agaynst the gou
te in the bowelles.

In the mornynge and at nyght/
drinke of thesame water/at eche time
an ounce and a halfe/and the hede
wet with the same water/a let drye
agayne by hym selfe/is very good
agaynst the dasynge in the hede

In the
mornynge/at none/and at nyght/
drinke of thesame water/at eche tyme
an ounce/or an ounce and a halfe
is very good for them that spyteth
blode/for it conforteth them.

Twope
or thyle in a daye the face washed
with thesame water/and let drye by
hym selfe/is good agaynst the spots
tes in the face.

Thre or
foure tymes dronke of the same wa
ter luke warme in a daye/at eche
tyme an ounce & a halfe/or two oin
ces/is very good for women whose
moder dothe runne bpwarde to the
harte/and for them also that have
shynkyng aboute the nauill

In the
mornynge fastynge dronke of thesame
at eche tyme two ounces/two or thre
dayes contynuyng/kyllith the spual
worme in the body

In the mor
nynge & at nyght dronke of the same
at eche tyme an ounce & a halfe at
or thre weekes contynuyng/is good
agaynst swellynge

Thesame
water is good agaynst the paralyse/
whā it with a clothe is wet thereon &
layd thereon/than it easeth the syt
ches/it is also good for p enphre
clowtes wet in the same water and
layd therupon.

A In ounce and halfe dronke
of thesame water twyse in a day is
good for the euill dyspe hote sekness
in the body for it laxeth it.

Water of flies

Ca. clxxv.

M Tisca in latyn. The same wa-
ter shalbe distylled of the co-
mon flies/and it wyl become com-
what blew. **A** The same
water put in the euenynge an hou-
re before nyght in the yen with dys-
ueth all spottes and skyn frome the
yen/contynewynge thre or four we-
kes every nyght. **B**

The same water catoweth sayre and
longe here to growe/whan the he-
res be wet with thesame every daye
two or thre tymes/thre or foure we-
kes contynewynge. And it shalbe dy-
stilled in this maner/drawe a cloth
streght ouer a panne or a balyne / or
ouer an other holowe dysche of erth
and lay the flies in a small bag vpon
the clothe / and than take an other
bacyn with fyre/and sette it vpon
the bagge with the flies/ and than
runneth the water thzugh the bagge
and clothe in the panne or bacyn /
Bycause yf ye sholde distyll it in an
helmet it sholde synke so sore / that
the helmet sholde be destroyed/and
nothyng worthe. And in this ma-
ner is destroyed but an erthen pane.

Water of Mulberys. Ca. clxxvi.

M Ora celi in latyn. The best
parte & tyme of his distyl-
lacyn is/whan the beryes be fully
rype/and nat nye by theyr fallynge
downe. **A**

Thre or foure tymes in a day dronke
of the same water/at eche tyme an
ounce and a halfe/and often gorgo-
led with dysueth the ympossomyge
of the throte/named Squinantia.

B In the moynynge / at
none/& at nyght/dronke of the same
water/at eche tyme two ounces for
or seuen dayes contynynge/wyth-
dysueth the ympossomyg in the brest
and in the body. **C**

In the forsayd maner dronke of the
same water is good for them that be
fallen/and haue congeled bloode in

the body / for it withdryneth away / & causeth to departe from them. **D** In the same forsayd maner dronke of the same wat is good agaynst the coughe / and causeth a large breest.

E The same softneth the senetwes / often washed therewith and let drye agayne by hym selfe.

F Water dystilled of the vnrype molberpes / is good for the eyen / whan the eye be enoynted therewith rounde about.

G The water of the vnrype molberpes is one of the pryncypallest for the spene i the throte named Quala / specially whan it is gorgwoled with of the eye in a daye / & dronke at eche tyme an ounce and a halfe / for it taketh awaye all scabbes / sores / and herte of the throte as I often haue proued.

H In the moynynge and at nyght dronke of the same / at eche time an ounce and a halfe or two ounces / & myrced in the drynk is good for impossu mes.

Water of beres Cap. lxxvii.

Bata bel blea in latyn. The best tyme of his dystyllacyō is / the herbe and rote chopped to gyder and dystylled in the ende of the Maye. **I** In the moynynge and at nyght dronke of the same water. at eche tyme an ounce and a half / is good agaynst the hote paynes in the

hede / and a linnen clothe wet in the same & bounde to the forehede / & on the temples of the hede.

B Dronke of the same water in the for same maner withdryeth the hoynes in the throte.

C In the moynynge fastynge smuffed bywarde in the nose often of the same water / pulleth out of the hede teuma and the stode of the hede.

Water of Bassanus. Cap. lxxviii.

De dist. ex. lxxx.

Bassanus minor in latyn. The best parte and tyme of his dystyllacyon is / the rote onely chopped brenned or dystilled in July whan the sonne is in Leone / and the moone in Ariete / than is his workynge meruaylous / outdryynge the superfluytes.

R.I.

Thesame water is good against the
browne blaynes/in the moynynge &
at nyght cloutes wet therein and layd
thervpon.

B Thesame water is good agaynst the
cankre/in the moynynge & at nyght
wasshed therewith/and cloutes wet
in the same layd thervpon.

C The same water vsed in the forsayd
maner is good agaynst the fystule.

D Thesame water
is good agaynst sores/which causeth
great itchyng and be not open/as
Impetiginestwse washed with the
same in a day.

E Thesame is good for sores causynge
yche and teares/as megera twyse
wasshed with the same in a daye &
wzapped in a cloute wet therein.

F In the moynynge & at night
dronke of the same/at eche tyme an
ounce or an ounce and a halfe is good
agaynst the goure in the guttes.

G Whan a body hath the venym
or other vncleane meat in the stoma-
ke/he shall drynke almoste thre oun-
ces of the same water than he shalbe
hole quickly/yf he hath eaten and
dronke. **H** Dronke of the same in
the moynynge and at nyght/thre or
foure verses contynnyng/at eche ty-
me for an olde persone two ounces/
for a yonge persone an ounce/for a
chylde halfe an ounce/is good for the
stone/whan it is dystylled in the ma-
ner aforseyde.

I In the forsayd maner dronke of the
same water causeth we to pue/and
cienfeth the rayns and also the blau-
der.

In the moynynge and at nyght dron-
ke of the same/at eche tyme an ounce
& a halfe/cienfeth the brest & is good
for the coughe. **L** Dronke in the
forsayd maner of the same/is good for
the impostumes of the lyuer/a coloz
teth the lyuer. **M** Of the same wa-
ter put in the eares/withdwyeth the
impostumynge of the eares.

N In the moynynge and at nyght dr-
ke of the same water at eche tyme an
ounce and a halfe/openeth the stop-
pyng of the lyuer.

O Of the sa-
me water somewhat salted & made
like warme/almooste two ounces
dronke fastynge/and halfe an houre
after that/ye shall take a fedder wet
in oyle and put in the throte causeth
to avoyde the olde colde moystours/
and the watery Colera wherof co-
meth the tertiana and quantana fe-
bus the which the same water wyth
dwyeth awaye. **P** In the moynyn-
ge and at nyght dronke of the same/
at eche tyme an ounce and a halfe/is
good agaynst dyslury and strangury.

Q Two ounces dr-
ke of the same fastynge purgeth the yll
stomake/and wythdwyeth all euyl
out of the stomake and the bodye.

R Thesame water wythdwyeth
the wolfe in the legges whan it is
wasshed therewith and cloutes wet
in the same and layd ther vpon.

Water of Melandye wozmes
Capitulum.

c. lxxix.

The best parte and tyme or sea-
son of thervre distyll acyon is/
they shall be gadered in the Maye/
before the sonne rysynge/

Thesame water is good
agaynst the rosseme. In the face thoy
se or thysse in a day the face washed
therwith.

Water of Gromell/ Ca. cc. r.

Illi solys. bel Grana solis
bel Cauda porcum i latin
Gromell in englyshe.

The best parte and tyme of his dys-
tyllacyon is/ the leues stopped frome
the stalkes/ and distyllled in the ende
of the monethe of the Maye

of a woyme/ones i a day dronke of
thesame water an ounce and a hal
fe & cloutres wet therein & layde there
vpon. **C**

Thesame water with dry
uethall benyng/for al that ys a body
had it taken a hole daye and nyghte
ys: Chal drynk of the same in the mo
rnyng fastyng/at eche tyme an ounce
& a halfe. **I**

In the ma
ner is good agaynst the paralisis **I**
Thesame bled as afoze is said with
dryueth the arces and the fourth bat
arces compynge of melancoly. **R**

Euery moynynge & at nyght dronke
of the same at eche tyme an ounce and
a halfe is good agaynst leproy. **A**

Thesame is good for weime which
haue spotrys in the face/abstynge of
theire chyldre beryng/twoyse or thise
the face enoynted with the same/and
let drye agayn by them selfe. **D**

The same twyse in a day put in the
eares killeth the woymes in the ea
res. **A** The same killeth the wo
mes without scathe/twoyse in a day
washed therwith and cloutres wet
therin & layd ther vpon. **D**

fastyn
ge dronke of the same an ounce and
a halfe/or two ounces/deneth the
cruyl humoures in the breste/and is
good for any narrow balt. **I** In
the moynynge and at nyght dronke
of the same at eche tyme an ounce and

a halfe warmeth the colde rones.

D But the same water in the eyen
an houre before nyghte strengteth
the syght. **R** In the moynynge &
at nyghte dronke of the same/at eche
tyme an ounce & a halfe strengteth
the stomake/and the members below
gynge to the stomake. **S** Dronk
of the same in the forsayde maner: is
good agaynst the febres on the thyr
de day. **T** In the forsayde maner
is good to be dronke of the same for
the dyscasses in the lyuer. **U** In
the moynynge and at nyght dronke
of the same water/at eche tyme an
ounce and a halfe is good agaynst a
dysleaked longue/with cloutres wet
therin and layd ther vpon outward.

The same water causeth a body
to be fayre of the face/twoyse in a day
it enoynted and rubbed with the sa
me water & let drye agayn by hem
selfe. **y** Twyse in a day dronke
of the same water at eche tyme an
ounce and a halfe is good for the that
haue payne in the lyuer.

The same water causeth a body
to be fayre of the face/twoyse in a day
it enoynted and rubbed with the sa
me water & let drye agayn by hem
selfe. **y** Twyse in a day dronke
of the same water at eche tyme an
ounce and a halfe is good for the that
haue payne in the lyuer.

The same water causeth a body
to be fayre of the face/twoyse in a day
it enoynted and rubbed with the sa
me water & let drye agayn by hem
selfe. **y** Twyse in a day dronke
of the same water at eche tyme an
ounce and a halfe is good for the that
haue payne in the lyuer.

Water of Nyghtshade Capitulum.

c. cxviii.

Slatrum bel bna bulpis in
latyn. The best parte and
tyme of his dysyllacyon is/whan he
bereth grene berpes/than the l. ues.
A. ii.

stroped from the stalkes & distilled.
A The same is good agaynste the
 hynder parte of the necke/clowtes
 wet in thesame and layd on the nec-
 ke/in the moynynge/at none/and at
 nyght everydaye contynuyng than
 it heleth **B** The same is good for
 payne in the hede comynge of here/
 whā the hede is often enoynted ther
 with/and lette drye agayne by hym
 selfe **C** Cloutes wet in the same
 water and layd vpon the goute and
 paralisis/in the moynynge/at none/
 & at nyght/two or thre dayes conty-
 nuyng ceaseth the payne **D** It
 vsed in the forsayde maner is good a-
 gaynste the soze named the shoyne
E The same water coleteth and sla-
 keth all yll here and sores/ It wyth
 dyueth all yll here of the bodye/in
 warde and outwarde/dronke of the
 same in the forsayd maner and clou-
 tes wet therin/and thre or foure ty-
 mes layd theron betwene daye and
 nyght **F** It is also good agaynst-

payn in the eares/whysse or thysse in
 a daye cloutes wette therin & layde
 thereon **G** It is pryncypally good
 for the hote ipocostumes/cloutes wet
 therin & layd ther vpon. **H** It is
 also good agaynste the payne in the
 breste/cloutes wette therin and lye
 warme layde ther vpon.

I The same is good agaynste the payne
 in the hyppes/cloutes wet therin &
 layd there vpon in the moynynge/at
 none and at nyght. **K** It is good
 for the throte/in the moynynge & at
 nyght gorgoled therwith/ and clou-
 tes wet therin layde ther vpon/heleth
 the throte **L** The same water is
 good agaynste all hote swellynge/
 Dronk of thesame in the moynynge
 at none/and at nyght/at eche tyme
 an ounce and a halfe/and clowtes
 wet ther n layde there vpon/slakerh
 the hete and swellynge/ **M** The
 same water coleteth & slakerh the he-
 re of the lyuer very well/whā clou-
 tes or hempe tow is wet therin and
 layde thereon/in the moynynge/at no-
 ne/ & at nyght. **N** It is al-
 so good for them that be rente/clou-
 tes wet therin & layde thereon/whysse
 or thysse in a daye. **O** Thre ty-
 mes in a daye dronke of the same/at
 eche tyme an ounce is good for the that
 do stert by nyght i therr slepe it doth
 not hurte nor hynder/ **P** In the
 moynynge & at nyght dronke of the
 same/at eche tyme an ounce & a half
 xiiij. days contynuyng is good for the
 stone **Q** A body whiche can not
 swete shal drynke of thesame water
 & of water of woynwode/ olerchep

be mixed to gide almost thze ounces, thā he shal sweete. R. whan the bzestes of womē be swollē/than cloutes wotte thesame layde warm ther vpon. it. qz thze dayes cōmynge & it shall amende. S. The same is good reperculsum/ for it wth day weth al hore matters & fodes which sholde become to an impostume/ cloutes wet therein and layde there vpon twyfein a daye.

Water of grene walnattes.
Capi.

c. xxi

Nucifraga in latin. The best parte and tyme of his distyllacyon is/ about saynt Johā baptist day/ so grene stamped and distyllied. S. The same water is good for a wounded persō/ twyfe qz thise dyon bein a day of the same/ to hā a woūde

is enflamed/ and cloutes wet therein layd ther vpon it helpeth very well.

B Two of thze tymes in a daye dronke of the same/ at eche tyme an ounce/ or an ounce & a halfe, is very good agaynst all here and cloutes wette in thesame and layde thereon.

It is good also for the blacke blaynes/ and for the blaynes named Antrax/ and they be the blaynes of the pestilence/ lyuen cloutes of wote wet in thesame water and layd ther vpon/ two or thze tymes in a day.

C Dronke of thesame water two ounces or two ounces and a halfe, is good agaynst the pestilence.

D Cloutes wet in the same water and layde vpon the blacke blaynes/ or vpon Antrax to here mer they be on the body/ withdryneth the here and the a ynge rounce about it/ so tinct, the payne & healeth them.

Water of the grene shales of walnattes.
C. s. xxb.

Iris coper nuda exterior in latyn/ The best parte and tyme of his distyllacyon is/ the outwarde shelles of the walnattes/ but yf they be blacke it is no harme/ as farre as they be rotyng/ and to bzē ned & distyllied in the fyrst moneth of the heruest,

Agaynst
all fevers

pestilence
blaynes

Agaynst
the pestilence
nec

Dronke of the same water with the thyrde parte of bynegre is pryncally good for them to whom the hete cometh on, and had lette blode before the crua houres / *repertum est veritati consimile esse* / is trewe be found agaynst the pestylence / **B** The same water is good agaynst the pyppryge and syngyng in the eares. And a body whiche hereth nat / than shall be censed with a lyrell spone the eares / and put at eche tyme ther in of the same water than he becometh to heare agayn.

It is also good gorgtooled for the impostuming of the throte / named Squinancia / ye may also brynne or dystyle the shelles / whan the nuttes be ripe wha the shelles departe lyghtly from the nuttes.

Water of walnut leues.
Capitulum. c. xxi.

Folia nuci in latyn. The best parte and tyme of his dystyllacyonis / the leues stroped from the fyrst braunches of the nut tre / chopped and dystilled in the ende of the Maye. **T**he same is a pryncypall water for to dye sores and holes / whan they be no deper but curen through the skynne for it caweth the skynne growe thereon / in the moornyng and at nyght washed therwith & cloutes wet therein & layde thereon.

Water of rotes of nettles.

Capitulum.

c. xxi.

Boices vertice in latyn. The best parte and tyme of the dystyllacyonis is / the rotes gadered of the grate nettles in the ende of the canpuler days / clene washed & dystilled. **I**n the moornyng and at nyght dronke of the same water / at eche tyme an ounce or an ounce & a halfe is good agaynst the olde colde shynkyng in the bely / and it can seth it to vanyshe. **I**n the forsayd maner dronke of the same water / is good agaynst the olde coughe and withdrueth it. **T**he same water dronke in the forsayd maner brereth the ipostumes of the loques. **G**rate depe & vncient woundes washed with the same purgysch al the vncennes & synkyng of the woundes. **I**n the moornyng & at nyght dronke of the same / at eche tyme an ounce and a half prelerueth a man from the fall of the passy.

F The same healeth the benigne
diseases of the canker/twoise in a day
washed therewith/and cloutes wette
therin and layd there vpon/ **G**

It healeth also the fistule washed
therewith and cloutes wet therin &
layd thervpon **H** The same water
healeth the podagra and the impostu-
mes/cloutes wette therin and layd
thervpon **I** The same water he-
leth polipiu nasis/that is foule syn-
kynges fleshe growynge in the nose/
in the moornyng and at nyght was-
shed therewith **K** Cloutes wet in
the same water and layd vpon the
fore hede stoppeth the bledynge at the
nose/ **L** In the moornyng and at
nyght dronke of the same water at
eche tyme an ounce & a half is good
for the moder in womē **M** Two
ounces dronke of the same water in
the moornyng fastynge/causeth las-
kyng in the bely. **N** In the moor-
nyng and at nyght dronke of the sa-
me water/at eche tyme an ounce or
an ounce and a half/is good against
the dysraies of the longues/and hel-
peth the brest **O** In the moornyng
and at nyght dronke of the same
at eche tyme an ounce or an ounce
and a half wyll not suffre the dede
chylde long to abyde in the mothers
wombe/ **P** In the moornyng &
at nyght dronke of the same at eche ty-
me halfe an ounce wythdrueth the
paynine the stomake/ **Q** It drow-
ke in the moornyng and at nyght at
eche tyme halfe an ounce prouoketh
the floures in women.

Water of nettlesedes. Ca.cxxviii

S emē brice in latyn. The best
tyme of his dysyllacon is/in
August **I** The same causeth the
handes to be whyte, in the moornyng
and at nyght oftē washed therewith
and let dye agayne by hym selfe.

Water of nettles. Ca.cxxix.

U rtyca in latyn. The best par-
te of his dysyllacon is. the
comon netles/the leues & floures
stroped fro the stalkes/and dyspylled
about the tyme and day of saynt mar-
garete. **I** In the moornyng/at
none/and at nyght dronke of the sa-
me at eche tyme an ounce and a halfe
is good agaynst the growte in the gut-
tes **B** It dronke in the forsayde
maner is good agaynst the shrinkyn-
ge in the bely **C** In the forsayde
maner dronke of the same is good for
the bermoder toban she pussheth by
warde **D** An ounce and a halfe
dronke of the same water in the moor-
nyng fastynge, and at nyght goyn-
ge to bedde/wythdrueth the stone &
the dysseles of the raynes comynge of
colde **E** An ounce of the samewa-
ter dronke fastynge is good agaynst
the woynes in the bely **F** At no-
ne and at nyght dronke of the same
is good agaynst the colde colough.

In the maner also sayd dōok of
same is good for them that haue a he
up brette & is faynte of colde. **I**
In the forsayd maner dronke of the
same is good for a colde longue. **I**
The same is good dronke in the for
sayd maner for ryfynge bp and blo
wyng in the bely. **I** The
same water is good for greate depe
bncleue woundes and impostumes
in the moynnge and at nyghte wal
shed there with/and clowtes wette
therin and layd there vpon. **I**
The same water is good for them
that haue ipossumig which floweth
and ronnethe in the moynnge and
at nyght therewith wasshed/and clo
thes wet in the same and somewhat
wzonge oute agayne/and layd there
vpon. **I** With the same water
washe the dogges byte and cloutes
wet and a litle wzonge out & layde
there vpon causeth the to hele. **I**
Water of rede nettles is very hold
me for byles therewith wasshed in the
forsayd maner

Water of Eufraffe. or iſen conſort
Capitulum. **cc.**

Eufragia in latyn. The best ty
me of his diſtillation is/ the le
ues/ stalk/ and ſtew/ with al his ſub
ſtaunce diſtilled whan it bereth ſtew
res. **I** The ſame water put in the
eyen/ and enoynted rotonde aboute
the eyen/ clereth and cleſeth the ſyght.

It vſed in the ſame ma
ner with/ and enoynted the two of the eyen.

The ſame wa
ter is very good by cauſe it doth con
ſorte/ ſtrengtheneth and alſo it healeth
the ſight/ and is a pectusium of the
ſame diſeaſes/ and principally in the
olde ſlegmatike cōplexions/ an hoto
re beſore nyght put in the eyen/ and
enoynted there vpon / and at eche ty
me dronke an ounce and a halfe.

Water of Smere woze. Ca. c

Rristolozila longa in latyn.

The beste parte and tyme of
his distyllacyon is the leues/ the ro
te and the stalke chopped to gyder &
distyllid in the ende of maye.

A The same water heleth the par
te of a man/ in the moynynge and at
nyght therewith washed. **B** The
same water wothdrieth the crampe
with the pobagra/ the membres ther
with washed and let drye agayn by
them selfe. **C** It is good for yll leg
ges/ washed with the same water &
clothes wet therein and layde on the
legges/ it causeth them to drye. **D**
In the moynynge and at nyght dꝛo
ke of the same water/ at eche tyme an
ounce and a halfe/ ceaseth the payne
in the bely. **E** In the forsayd ma
ner dꝛonke of the same wat/ is good
agaynst the fallynge seknes.

F Dꝛonke of the same water in the
maner aforesayde and cloutres wet
therin and layd vpon the syde wyth
dryueith the stiches in the syde. **G**
In the moynynge and at nyght dꝛo
ke of the same water/ at eche tyme an
ounce and a halfe/ taketh awaye the
swellynge and greatnes of the bely
comig of the moder. **H** The same
water is good for the old flowynge
woundes/ in the moynynge and at
nyght washed therewith/ and clow
tes wet in the same and layde there
vpon. **I** The same water heleth
the gutte of the fondament/ whan it
goth out/ than a sponge wet in the
same & layde ther vpon. **K** It is
good for yssues/ whan they be wal
shed therewith & cloutres wet therein

layd ther vpon. **L** Thre spones ful
dꝛonke of the same in the moynynge
and at night amendeth Reuma/ that
is the murre & flode in the hede. **M**
It is also good dꝛonke in the maner
aforesayd for them that be narow on
the brest. **N** In the moynynge and
at nyght dꝛonke of the same/ at eche
tyme an ounce or an ounce and a hal
fe/ thre or foure dayes contynynge
purifyeth the woman after the byr
the of the chyld. **O** In the mo
ynynge & at nyght dꝛonke of the same
at eche tyme an ounce and a halfe
heleth the dysseases of the mylte. **P**
It dꝛonke in the forsayd maner. & or
xii. dayes contynuing wothdrieth the
arces or febres. **Q** The same water
heleth the small holes/ the pcell blay
nes/ and scabbes on the womens se
crete membres/ oftē washed therewith
and cloutres wette therein and layde
ther vpon.

Water of sage.

Ca. c. ii.

Salvia in latyn. The best par
te a tyme or his styllacpon
is, the leues of the noble sage stro
ped from the stalkes/whan it bereth
floures and dystylled.

AThe same water dronke in the mor
nyng and at nyght at eche tyme.ii.
ounces/and the wyne myxted ther
with is for them that haue a cold sy
uer.

BThe membres rubbed with same
water and lette drye agayne by hym
selfe/and often drinke is good again
ste the palsey.

CThe same water dronke in the mor
nyng and at nyght/at ethe tyme.ii
ounces/or two ounces and a halfe
is good against the crampe/whā the
membres be rubbed therwith.

DIt vled i the ma
ner aforesayd/is very good agaynst
the colde paralisis.

EThe same water is good for
the sleppng membres/often the me
bres rubbed therwith/and dronke in
the moynyng and at nyght of the
same water/at ethe tyme an ounce
a halfe.

FIn the moynyng/or at nyghte dron
ke of the same water/at ethe tyme
an ounce and a halfe/or two ounces
for the dayes contynuyng/is good
agaynst the fallynge schenes.

GIn the moynyng a at
nyghte dronke of the same water/at
ethe tyme an ounce and a half/is ve
ry good agaynst the dasyng in the
hede.

Hwater of the herbe buglossa.

Buglossa vel lingua bovis in
latin/a is of many maners
As buglosses with one stalk and pur
ple coloured floures/ and is called
of many psons shespes tongue/ and
it is not trewe/ for that is named in
latin lyngua agni/or lyngua arctis
and groweth on harde stony wayes
and it is very comon/ And there is
an herbe called small oxce tongue
groweth on the gardens and on or
ther laboured feldes with many sma
le floures and his stalk groweth sel
dome aboue a cubyte of hyght. The
re is yet an other buglossa and with
braunches with rughe leues a with
blewe floures lyke borage. The sa
me Buglossa is with red floures/
wherfore she is called of many par

stones bozage/and in latyn buglossa
siluestris oz agrestis, in some places
and somtyme they haue rede rootys
The best partie and tyme of they? dy
styllacyon is / the buglossa with the
rughe leues & bleweflours oz rede
flours, the rote, the herbe, the steles
and the flours chopped to gyder, &
distilled in the begynnyng of June
whan the hath ouermuche floures.
After that the small buglossa is the
best, and after that the first buglossa.
And they shall all thze be distilled
in the forsayd maner. A

contynuyng/ wherwith he became
fully hole/ and well amended/ and
gate his wyttes agayn/ and he stu-
dyed moche more than he dyd before

உட

Fyngge
 mator
 scabbes
 lypsey

Dronke of thesame water in the for
 sayd maner & the mouth therewith
 wasshed / is good agaynst the syn-
 kyng of the mouth **M** Twyse a
 day dronke of thesame water at eche
 tyme an ounce and a halfe / is good
 agaynst all maner of scabbes and le-
 pyre / for it clenseth the blode.

Water of crabbes. **Ca. cc. lili.**

M Ala maciana in latyn. The
 best part & tyme of his dy-
 stillacyon is / in the ende of the secode
 moneth of haruest / stamped and dy-
 styllid **A** In the moynynge
 fastynge / at none & at nyght dronke
 of the same water / at eche tyme an
 ounce & a halfe is very good agaynst
 the synkyng in the bely / vt proba-
 tum repetimus. **B** water of
 thesame herbe distylled aboute saynt
 John baptistes day at mydsomer is
 very good agaynst the redde faces /
 whan they be enoynted with thesa-
 me watir & let drye agayn by them
 selfe. **C** In the
 moynynge / at none / and at nyght
 dronke of thesame water stoppeth the
 lakke with the stipticte **D** Thyrse
 in a daye dronke of thesame water
 and at eche tyme an ounce and halfe
 or thre ounces / & thre or four dayes
 contynewynge dothe melt the stone

E Dronke in the forsayd maner
 of thesame water / is good agaynst
 the grauell for it clesyth the bladder
 and the raynes.

Water of apples **Ca. cc. d.**

Poma in latyn. The best part
 of theyz distyllacyon is / The
 apples berynge hote redde / & the red-
 dest be the best. **A**

The same water is good agaynst the
 colde brennyng / & for a soze etynge
 rounde about / and sallynge out with
 peces / or in what maner so euer it
 be / wasshed with thesame water &
 clowtes wet therein and layde there
 vpon in the moynynge and at nyght
 til it is hole **B** The same is good

oz blacke blaynes/ & agaynste In-
 tract in the pestilence/ a small hole pye
 ked therein/ and cloutes wet also in
 thesame/ & layd ther vpon. iii. or. iiii.
 tymes in a day/ it slaketh/ colet/ &
 defendeth fro the eatyng roude about
 & wold wyeth the payn & the skynge
 C. ye may also distill wa-
 ter of tame apples which be nat red
 & they shall be distylled whan they
 be fully ripe/ but oz they becom softe
 & oz they fall of. The same water
 comforteth and colet/ the bodye and
 the harte naturally

Water of floures of apples.
 Ca. cc. vi.

f Lozes pomorū in latyn. The
 best floures hen of the red ap-
 ples afore sayd/ whan the budde be-
 gynneth to blossom and to go open.
 Cha shall be layd a fayre lynn clothe
 vnderneath the apple tree & bete vpo
 the braunches of the tree with a smal
 stycke and the leues of the flowres
 whiche as than fall downe gadered
 & distylled in balneo marie. A The
 same water is good agaynst the red-
 nes of the face & the euill dysposy-
 on of the face/ whan the face is was-
 shed therewith and let drye agayn by
 hym selfe/ and that shalbe done thre
 oz foure wekes/ oz els till it be hole.

Water of Oxre blode. Ca. cc. vii.

S Anguis bontinus in latyn.
 The best parte and tyme is
 of a black ore which goth in a good
 pasture wher as many flowres do
 growe/ distylled in the May. A
 The same water is good agaynst the
 paralisis/ whether it come of colde
 oz heat/ therewith enoynted/ and sof-
 tely rubbed/ in the mornyng/ at
 none/ and at nyght. it dreyes conty-
 nyng/ & yf the water greue hym/
 than it helpeth hym/ probatum est
 inuentum rerum veritas. B
 The podagra washed with the same
 water/ & cloutes wet therein & layd
 ther vpon/ it slaketh the payne.

Water of muschetrans. Ca. cc. viii

f Anguis bontinus in latyn.
 The best parte & tyme of his
 distyllacyon is/ the muschetrans god
 wyngs vpon cleue places distylled
 whan they be fully ripe. A
 The same water is good agaynst the
 paralisis/ in the mornyng and at
 nyght therewith enoynted/ & let drye
 by them selfe agayne. B
 The same water brenned oz
 distylled in the May/ is the best wa-
 ter agaynst the rede blaynes/ & byles
 in the face/ the face with the same e-
 noynted/ & let drye agayne by them
 selfe. C

D. ii.

Thesame water is colde of nature in the thyrd degre/therfore it is wel dyspense/ but outwarde layd thereon withdrieth al herte of the body wher euer it be. **D** It is also good agaynst podagra and paralisis cloures wet therein and layde there vpon. And it is also good for the membyes and ioyntes. **E** It is good also for the thoyne/clowtes wet therein & layd ther vpon/ two or thre tymes in a daye.

Water of perceley.

Capit. cc. ix.

Petrocelinum in latyn. The best parte and tyme of his dyspyllatyn is the rotyes and the herbe with all his substance/chopped and dyspylled. **I** Dronke in the morninge and at nyght of thesame water/at eche tyme an ounce or an ounce and a halfe thyrte or xl. dayes continuinge is good agaynst the belyngne stone. **B**

In this maner dronke of thesame two or thre weekes continuinge / is good agaynst the grauell / and clenseth the bladder and the raynes. **C** Two or thre tymes dronke of thesame at eche tyme an ounce & a halfe / or two ounces / causeth well to pylse. Dronke in the forsayd maner of the same / clenseth the lyuer and ratofeth well to eat meat / & to dygest. **E** Any place that is enoynted with thesame shall waere halde / and it takes away the heres of thesame place. **F** In the morninge and at nyght dronke of thesame / at eche tyme two ounces is good agaynst dyslury and strangury.

Water of the pyper of dandelyon.
Capitulo cc. x.

Pens leonis / or tostrum porcinum in latyn / of thesame

herbe shal onely be distilled the vy-
pes in the myddest of Maye.

The same is principally good for the
blacke blaynes/cloutes wet therein &
layde there vpon/and also washed
a twyse dronke of the same in a day
at eche tyme an ounce.

The
same water is good agaynst the great
euill blaynes on the legges/cloutes
wet therein and layd thereon.

It is good for the eyes/put therin.

Two ounces dronke fastyng eue-
ry day in the mornynge is good for
the moder.

Two or thre tymes
in a day dronke of the same/at eche
tyme an ounce and a halfe/is good
agaynst the flose in the membres/a

in the ioyntes/and cloutes wet ther
in and layd ther vpon.

It dronke in the forsayd maner/is
good agaynst the bitches in the syde.

**Water of the floures of capitis mo-
nachi.** Ca. cxi

**Floures capitis monachi in la-
tyn.** The best part and tyme of
his distyllacion is the floures on-
ly distilled in the begynnyng of the
May.

The same water is very
good for the eye/whā it is put ther
in.

With the same water was
shed the face/and drē dyde agayn by
hym selfe/causeth a fayre & clere face

In the mornynge and at
nyght dronke of the same water/at

the tyme an ounce and a halfe/it
keth all euill botes.

Water of peche leues. Ca. cxi.

The best part and tyme of
the distyllacion is the leues stro-
ped or in the scallynge of the mone/
whā she is almost full/ distilled
in the ende of the may.

An ounce
and a halfe/ or two ounces dronke
of the same in the mornynge fastyng
is good for the grauell.

Thre tymes in a day dronke of the
same/at eche tyme an ounce & a halfe
causeth well to passe/ & cleneth the
bladder.

An ounce dronke of
the same water of yonge chyldren
is good agaynst the woulweymer
the bely.

In the mornynge and
at nyght dronke of the same water/
two ounces/ or two ounces & a halfe
threty or xl. dayes contynynge/ is
good agaynst the dryngge mone.

E whan it is put in the eares it
kylleth the wormes therein. **I** It
is good for the payne in the hede /
whan it is therewith enoynted and let
dye by hym selfe.

Water of Berche flowres

Capitulo. cc. xii

Loris persicorum in latyn.

The best parte and tyme of
theyr distyllacyon is, the flowres
whan they begynne to blossom and
begyn first to become almoste fully
out / and gadze them as I haue sayd
before of the apple flowres.

I An ounce and a halfe dronke
of the same & fast there vpon is good
agaynst the acres on the thyrde day.

from

I Loris hericet in latyn. The
best tyme of theyr distyllacyon
is whan the flowres be fully open &
nere by theyr fallynge of / lyke as I
haue sayd of the apple flowres. **I**

dryſyllacyon/ is the leues and the buds
with the floures ſtroged ſome
the ſalkes in the tyme of the floure. **¶**

¶ P. xl.

rynge distilled / and that may be two tymes in a yere / but the best tyme is in the Maye. **A** The same water is good agaynst all colde dysseases / it rectifyeth and conforteth the spyrte / & the naturall hete with his good odour / where in the spyrte is reioyced thurgh his sluptycite / toherfore the substance of the members gather togyder / when in the moynynge & at nyght is dronke therof an ounce mixed with asmoche wyne. **B** In the forsayd maner dronke of the same water / conforteth and strengtheth the braynes / & al other inward hummes / the face and the hole body washed therewith / and the outward members rubbed therewith / strengtheth the body / and reneweth it and causeth a man to seme yonge / & lusty of his corage. **C** In the moynynge & at nyght dronke of the same water at eche tyme an ounce and a halfe / and the hede therewith enoynted / and than let drye agayne by hyt selfe warmeth the hede / & it strengtheth & conforteth the wyttes / it causeth good memory and vnderstandynge / because it columeth flegma and melancoipe. **D**

The same water is good for them that swete so muche that they become feble and faynt / they shal in the moynynge and at nyght washe the hede and the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **E** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **F** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **G** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **H** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **I** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **K** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **L** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **M** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **N** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **O** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **P** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **Q** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **R** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **S** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **T** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **V** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **X** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **Y** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght. **Z** In the moynynge & at nyght dronke of the same water / & at nyght washe the hede / & the brest / than they shal be ryd from the foule myll of wet and fayntnes / and come agayne vnto theyr myght.

ete meat / he shall drynke in the moynynge fastynge / and also at nyght goynge to bed / at eche tyme an ounce or an ounce and a halfe of the same water / and washe his mouth therewith / than he shall gette agayne his apetyte / but he must vse it. viii. or .x. dayes contynuyng.

F Two or thre tymes in a daye the legges rubbed with the same water / four or fyue weekes contynuyng / and let dry agayne by hym selfe / than it multiplyeth and warmeth the mary.

G who so ever that is swollen on the hyp bone or on the tobyl bone / with betrynge or impostumynge / he shall wete a small linnen cloth in the same water and lay it where as the swelling is thre or four weekes contynuyng / & and it shall become hole agayne.

H Thre or four tymes in a day dronke of the same water / at eche tyme an ounce or an ounce and a halfe / two or thre weekes contynuyng / reioyseth the small waynes named Arteries for it openeth the spyrte of the stoppyng. **I** An ounce dronke of the same water / in the moynynge fastynge / is good agaynst the pestilence.

K In two dayes dronke of the same water / halfe an ounce / or an ounce / durynge the tyme of two or thre monethes / purifyeth and makyth cleene the blode.

L In the forsayd maner dronke of the same water / four or fyue weekes contynuyng is good

for them that be narrowe brested/ & haue the coughe.

M In the moynynge dronke of the same water/ at eche tyme two ounces/ catoweth a man to be courageous/ for it conforteth the substance of the harte/ and it is also good agaynste the woofull payne of the harte.

A In the moynynge and at nyght dronke of the same water/ at eche tyme an ounce and a halfe/ is good for hym that hath consuynge sekenes/ than he wyll become hole agayne.

D In the forsayd maner dronke of the same water/ sharpeneth the tongue and catoweth well to speke. And no body can tell the myght and vertue of the same water.

I In the moynynge and at nyght the face washed with the same water/ causeth a fayre and clere face.

D The hede washed with the same water/ and sette drye agayne by hym selfe/ preserveth the fallynge out of the heres/ & catoweth moze for to growe.

R Of the same water dronke/ and therewith washed/ defendeth a bodye frome Intraic/ that be the great euill sauored blayns of the pestilence.

S In the moynynge and at nyght the fyssiles washed with the same water wyll cause them to hele.

T The same water catoweth a body to appete longe tyme fayre and yong/ whan it is dayly bled/ mycced with his drynke a lyell/ and outwarde therewith rubbed

M With the same often washed/ rectifyeth the tethe and gomes/ and healeth the fyssile and gommies thereon. **R** The same rectifyeth the euill woundes and impostumes/ for it dryeth the/ in the moynynge & at nyght washed therewith. **I** In the moynynge & at nyght dronke of the same at eche tyme two ounces/ is good agaynste the flode in the bely. **I** In the forsayd maner dronke of the same & in the moynynge and at nyght the memmbres enoynted & rubbed therewith/ & let drye agayn by hym selfe. is good for the paralyticon or paralitus/ & agaynste the shakynge & tremblynge of the memmbres/ & it rectifyeth the synewes. **A** Two ounces dronke of the same/ dryeth venum out of the body/ as dothe the tryacle.

S Two or thre tymes dronke of the same/ at eche tyme halfe an ounce rectifyeth the moder/ It causeth the woman to be fruitful/ whichey make a bath of his decoctio/ the same bath is also a bathe of lyfe/ a restraynyng & a withdraynyng of age/ a renewyng of a body/ for it hath many secret vertues/ for whā a glas is ful of the floures & buryed in sande moze thā half a so let stāde therein a month or moze tyll the floures become to water.

Than set the same water in the sōne almost .xl. dayes/ than it wyll become clere/ and of the vertue of batwme.

E The same is than confortynge the harte/ the Braynes and the hole body. **D** It is good for the mekenes of the baynes. **E** It clengeth the spots of the face. **A**

It kepeth a body in yowthe / and
hath the vertue of the batome

¶ The same water wor-
keth maruelously in the eye / wa-
shynge and puttyng away the skyn
and spottys out of the eyen / whan a
droppe or two of the same is put at
nyght in the eyen

¶ The same water rectifyeth also the
sleppynge membris / in the mornynge
and at nyght rubbed therewith / and
dronke at eche tyme an ounce.

¶ It healeth also the salt
flegma / the fistule / & the cancre whi-
che can none other wyse be helpd It
medith also aqua vite whan the rose
mary is steyed and wet therein / but
better ware it distylled

¶ Water of rosemary taken and vsed
thre tymes in a day / at eche tyme an
ounce / and the drynke mixced ther-
ewith / and a cloot of syke wet ther-
in / and outwarde layde vppon the
hart / whiche is diseased of colde / cau-
seth it to be hole.

¶ Here after foloweth a saye addy-
cyon / of the wyne of rosemary with
the vertues and properties of the
same herbe / wrytten by the moste let-
ned and experte master / named Ar-
noldus de villa noua / saynge that
he gate of auuncient phisicians the
properties and vertues of Rosema-
ry / the whiche he kepte for his secret
And sayd that one of his chiefe ver-
tues is in the wyne / an other in a ba-
the / the thyrde in electuaries / And yf
ople were made of it / it sholde haue
the effecte and operacion of batome
Of wyne and the luse of this herbe

is made aqua vite. The wyne ther-
of made conficte of other wynes. as
is aforseyd hath many maruailous
good pperytes / for it purifyeth very
moche for all colde sekennes / It re-
ctifyeth also & sharpneth the apertye
It conforteth / confyrmeth / & iusty-
fyeth / all the membris / the vaines /
and the synewes. The mouthe was-
shed therewith / maketh it swete and
to smelle well / and maketh the face
fayre that is washed therewith. The
here washed therewith / kepeth the
heres frome fallynge / & to growe at
eche washynge. Item vsed therof in
meat preserueth greatly agaynst the
hete of the sonne / and agaynst other
fores and pynples. And also it colu-
meth the flemme and melancoly / and
properly conforteth the substance of
the harte. And it causeth also the age
to gette yowthe and strengthe. Item
yf one be in helthe & vseth customa-
bly / his body shall not rotte / and it
will preserue hym in heithe And yf
the tethe and gomes be rubbed ther-
ewith it taketh awaye the ache. It he-
leth the cankre and fistula. And yf
ony be weakened of sekennes the dryn-
kyng therof / restoreth his strengthe.
Also yf ye vse to eat tosted brede wet
in the same water / it iustifieth the ap-
ertye / it conforteth the wyke mem-
bris / and secrete them in vygoure.
Also yf wyne be tempered with wa-
ter of the decoction of the floures
therof / it ordereth the Ethykes and
Copathykes / which is a great secrete
Also it helpeth agaynst the passions of
the harte / dysenteria / and dyspe.

Also the water therof awayeth agaynst all dayly febres/ quartayns/ & tytarpyes. Also it is taken in the stede of tryacle/ and helpeth agaynst venymous meates/ & agaynste venym/ and it hath greate vertue/ as well in meates as in drynkes/ for it conforteth greatly the vertue regy tyse/ and in drynke it helpeth greatly to the paralytykes/ and for them that tremble/ for it releaseth theyr membrs. Also it helpeth the podagre ambulant. Also it helpeth all women of moysty complexion in easynge theyr matris/ & causeth them to conceyue/ *ut probatum est.* ¶ Electuary made of the floures of Rosemary with ynel escane/ as the rosarium is made which hath a mirrourous vertue/ for it helpeth all thynges above sayd. Also escume made of this herbe bled in vaperous haches dyscoveyth age & maketh a man to renew as the Eagle/ and this is certaynly assured. Also yf oyle be made of the same floures/ it hath the vertue of batome and bycegerence of his vertues/ wherhe is a maruailous thyng & great secrete/ of the whych the chiefe is this/ take a vessel of glasse/ and fyll it with floures of rosemary and stoppe it close with a cleue lynen cloth with mastike/ & bury the same in sande to the myddell/ and lette it abyde a moneth or moze/ tyll all the floures be consumed to water/ than wyll the foresayde water clenely departe from the huskes/ and it beynge so clere and pure/ shalbe put in to an other vessel of glasse/ than purg

fyre it in the sonne thre or four days & the foresayde water wyll be thicke in the maner of batome/ This oyle or batome/ conforteth the hart/ the brayne/ & the other membris of the bodie/ It conforteth also all tokenes and synewes/ and wasteth the webbe/ and all other paynes of the eyen. And it taketh away also the spottes & pynples from the face. And lyke wyse bled in meate and drynke/ it kepeth the body in pouthe. And after the foresayde maner it becometh the very profe of batome/ for a droppe of the sayd oyle put in colde water goth to the botom & abydeth there hole/ Also a drop put in soze fyre fastynge in the morning/ it healeth the cankers/ and also spottes and webbes. It restrayneth the eares & all other dyfficultes that hurtych the syghte. It healeth truly yf it be put thre or foure dayes in the same. Also yf water of wyne distilled thurgh Alembyk called water of wyne/ be tempered with this herbe/ it healeth salte flemme/ scabbes/ syllula/ the mozmal/ the which sores without doubte/ may neuer be heled other wyse. And yf the herbe & floures be put in the brennyng of aqua vite/ and therewith in the hete therof washe the handes and other membris of hym that hath the dyssease of the palsey/ & within a short tyme he shall becomis hole.

Tanacetum in latyn. The best parte and tyme of his distyllacyon is / the leuys and flowres strooped frome the stelys / whan it bereth flowres / that is in the canicular dayes and than distilled. **A** The same water slaketh all euill hete cloutes wet therin too or thre tymes in a daye layd ther vpon. **B** In the moynynge & at nyght dronke of the same water at eche tyme an ounce or an ounce & a halfe. xxx. or xl. days continuinge is good agaynst the stone.

C He that hathe the stone & can nat pssle through the payn of the stone / he shall drynke in the moynynge and at nyght an ounce and a halfe of the same water myxed with a lytell wyne.

D In the moynynge fastynge and at nyght / dronke of the same water at eche tyme an ounce or an ounce and a halfe is good agaynst the wormes in the bely.

¶ Water of cole woote. Ca. cc. xxviii.

Culis romanozum in Latyn. The best tyme and part of his distyllacyon is / the leuys strooped fro the stalkes chopped and distilled in June. **A** The same water is good and holsum to fresshe woundes in the moynynge and at nyght cloutes wet therin and layd there vpon.

B Cloutes wet in the same water and layd vpon the cancre / and also washed therwith too se or thre on a daye healeth them. **C** The same water is good agaynst all olde sores too or thre tymes in a day washed therwith / & cloutes wet in the same and layd there vpon.

¶ Water of rede coles
Capitulo. cc. xxix.

Culis rubra in latyn. The best parte and tyme of his distyllacyon is the leuys brot yn from the stelys / chopped / and brenned / or distilled in the ende of the May. **A** In the moynynge fastynge thre or foure ounces dronke of the same water slaketh the bely.

In the mornynge & at nyght dronke
of the same water / at eche tyme an
ounce & a halfe / two or thre dayes
tynnyng / is good agaynst the da-
lyng of the hede.

C In ounce / or an ounce
and a halfe dronke of the same wa-
ter / is good agaynst the palley.

D The same
water dronke is good agaynst the
crampe / the members rubbed ther-
with & let dye agayne by hym selfe.

E The members and toyntes oft rub-
bed with the same water & let dye
agayne by it selfe / is good agaynst
the shynnyng and trembling of
the members / and strengtheth and
conforteth the members and baynes.

F The same
water is good to be layde vpon all
hote places and impostumes.

G The same wa-
ter healeth woundes inward & out-
warde / in the mornynge & at nyght
dronke of the same / at eche tyme two
ounces and a halfe / or the ounces /
and cloutes wette therin / and stypse
in a day layd therevpon.

Water of Rue or herbe of grace.
ca. **cccc**

ca. **cccc**

R Ruta in latyn. The best yte
and tyme of his distillacyo
is the leues dropped frome the steeles
and brented or distilled in the myd-
dest of the daye.

In the mornynge & at nyght dronke
of the same water / at eche tyme an
ounce & a halfe. viij. or .x. dayes con-
tynnyng / is good for the yll lyuer.

B In the mornynge and
at nyght dronke of the same at eche
tyme an ounce and a halfe / with dry-
ueth lechery.

C Two tymes in a day dronke of the
same / at eche tyme an ounce and a
half / is good for the yll spier / mylte /
or stomake.

D The tymes
in a day dronke of the same water
at eche tyme two ounces / and the
dymme also myxed therewith / is ve-
ry good agaynst perorakynge and
wantynge of the stomake.

*Longe
Rome
Omyde*

E In the forsayd maner dronke of thesame helpeth the longues.

I In the forsayd maner dronke of thesame washeth the swell longe on the brest/ and vnder the rybes/ and softeth the brest.

S Two or thre tymes in a day dronke of thesame/ at eche tyme an ounce/ or an ounce & a halfe with dryueth the wynde in the bely.

H It helpeth the paralyses comynge of herte/ in the mornynge & at nyght washed therewith/ and clowtes wet therein layd there vpon.

I Two or thre tymes in a day dronke of thesame at eche tyme an ounce and a halfe/ helpeth the entrayles

K Thesame water is good for yll iyen/ for it withdryueth the webbe/ & spottys out of the iyen/ and maketh them clere & saye whan it is put in them/ rounde about enoynted therewith/ and euery daye dronke an ounce/ than it beroweth so clere and so ströge/ that the terryes may be sene in the day as well as in the nyght.

L Of thesame water put in the iyen dryeth and cleareth the iyen of all stynny maters.

U Thesame water is good agaynst the tremblynge of the mēbres/ thre or a daye the mēbres rubbed therewith and let drye agayne by hym selfe.

V The same snuffed vp in the nose breketh the impostume of the hede.

W Two or thre mornynge fastynge/ dronke of thesame water/ at eche tyme an ounce or an ounce & a halfe is good agaynst the spoulwoorme in the bely.

X An ounce dronke of thesame water is good for women labourynge of chyldre/ for it wythdryueth oute the

by the therfore it is scathfull for
women that bereth chyldre/ for they
sholde labour of chyldre before they
rygh tyme.

B B In the
mornynge dronke an ounce of the
same water. **iii. oz. v. dayes** continy-
nyng purgeth the flowres of wo-
men.

C C The tymes in
a day dronke of the same water an
ounce & a halfe/ thre oz four dayes
continynge/ is good agaynst the
cough.

D D The same
water slaketh the paine before on the
synger/ named the wyrtlow/ yf clou-
tes be wet therein & wrapped about
the synger/ specially whan the wo-
me is in the synger.

E E An ounce & a halfe of the same wa-
ter dronke in the mornynge fastyng
is good agaynst the rōmelyng in
the bely.

F F The same
water dronke in the for sayde ma-
ner stoppeth the flode in the bely/
that is the flyce/ or great connyng
lacke.

G G In the mornynge
& at nyght dronke of the same water
at eche tyme an ounce and a halfe/
or els two ounces. **v. oz. xii. dayes** con-
tinually/ is good for the febriles or ac-
tes.

H H In the mornynge
fastyng dronke of the same water/
thre ounces/ two oz thre mornynge
and dayes continynge is good a-
gaynst venym or enpoysonyng.

I I The same water streng-
theth the synewes and bayns often
rubbed therewith. **vi. oz. viii. dayes**
continynge.

K K Twyse in a day the mouth washed
with the same water is good for the

that haue rotten tethe/ of whom the
gōmes wyll rote.

L L The same water is good agaynst the
pain/ in the synewes/ therewith rub-
bed/ and cloutes wette therein & layd
there vpon twyse in a day.

M M In the mornynge and at
nyght dronke of the same water/ at
eche tyme an ounce & a halfe healeth
the bytynge of a madde dogge/ and
whan it is also washed wth the
same water and cloutes wet ther in
layd thereon.

N N It is good also agaynst all venymos
bytynge of venymous bestes whan
it is layd ther vpon twyse in a daye.
And it may be occupied for tryacle.

O O who so hath the same water
in his howse can nat be hurte of the
deuyll by the grace of god.

P P Two ounces dronke of the same every
day. **x. oz. x. dayes** continynge/ is
good for the fallynge sekenes.

Q Q The same water is good agaynst wo-
and payne in the membes/ cloutes
wet therein/ and in the mornynge and
at nyght layde there vpon. **R R** In
the mornynge and at nyght dronke
of the same water/ at eche tyme an
ounce and a half prouoketh the flou-
res in women.

Water of grounde moymes.
Capitulum. **cc. cxxi**

Q. a.

when it is come of hete. **C**hesa
 me water is good for seke perones/
 to whiche be saynt of binatural herte/
 two or thre tymes in a day therewith
 enoynted outwardly. **I**n the
 moornyng / at none / and at nyght/
 dronke of thesame water at eche ty-
 me an ounce / & the mouth washed
 therewith withdrieth the synkyng
 of the mouth. **C**hesame water
 is good agaynst rede ympossumyng
 ywen / an houre before the nyght put
 in the yew some dayes contynuyng.
H Four ounces dronke of the
 same water in the moornyng fastyng
 when the water is newe and freshe
 lareth the bely whiche is harde of
 hete. **I**n the moornyng / at no-
 ne / and at nyght dronke of thesame
 water to whiche is metely olde / at eche
 tyme an ounce / and clouts wet ther-
 in and layd vpon the bely / stoppeth
 the flode of the bely / whiche cometh
 tomoche because of hete. **C**hesa-
 me water is good agaynst the hofe
 lyuer / and conforteth thesame / clow-
 tes wet in the same water or heinge
 tow and layd thereon thwile or thre
 in a day. **A** In the moornyng
 at none / and at nyght / dronke of the
 same water / at eche tyme an ounce
 withdrieth the hete of the stomacke
 & conforteth the stomake. **C**he tem-
 ples / the helyng baynes & the nose
 holes enoynted with the same wa-
 ter withdrieth the murre in the hed
 and causeth good rest / and well for
 to slepe. **C**hesame water clen-
 seth the synkyng wounds / when
 they in the moornyng and at nyght

be washed therewith. **D**
 In the moornyng / at none & at nyght
 dronke of the same at eche tyme an
 ounce / clouts wet & layd thereon out-
 wardly / is good agaynst the inward
 hete / whiche cometh outward comige
 of Colera. **B**
 Of thesame a longe tyme holden in the
 mouth / withdrieth the payn in the
 tethe comyng of hete. **D** In the
 moornyng at none & at nyght dronke
 of thesame / at eche tyme an ounce or
 an ounce and a halfe stoppeth the
 whete fluxe named lyentaria in la-
 tyne. **B** He that is in basynge and
 sayntnes / hym shall be gyuen of the
 same water / and his hede shalbe rub-
 bed therewith. **S**
 With the same rubbed the fore hede
 the baynes of the temples / the helyng
 baynes on the handes and fete / &
 the nose / the temples / conforteth the bay-
 nes / & the hede / and slaketh the hete.
C In the
 foggyd maner bled the same water
 receiveth and causeth a bodye to be
 mery. **A**
 Dronke
 of thesame water an ounce fastyng
 is good agaynst the onnatural herte
 named the hysame comyng on the
 skyn with rede pynples and lytel
 small blaynes.
C A dragma of powder chauced
 of yuox / named kasura echous in
 latyn / put an ounce of thesame wa-
 ter in it is very good for to be dronke
 agaynst any maner of swellenge.

Water of the rede Roses.
Capitulum cccc.

Rosa rubra in latyn. The wa-
 ter of the rede roses, cōfōrteth
 and strengtheth, and coleteth the bray-
 nes, the harte, the stomake, and the
 pynceppall memberes / & defendeth
 them fro dyscoloure / and if the me-
 mberes were dyscolored, the same water
 thyngeth the agayn in the mornynge
 with his smellynge & odyor bet-
 ter than a hyppocrite, when it is drunke
 in the mornynge and at nyght, at
 eche tyme an ounce, or an ounce &
 a halfe.

Of the same water dronke an ounce
 cōfōrteth the naturall hete of a bo-
 dy, and the spyrte also, and p̄ser-

ueth them fro destructione.

Continued In the mornynge
 and at nyght dronke of the same wa-
 ter, at eche tyme an ounce & a halfe
 or two ounces, is good agaynst dys-
 tēderia and Atēderia, that is the
 bloody fluxe, or other wyse, the whiche
 lasteth.

The same water bled in the
 maner aforeseyde, is good agaynst
 sayntnes comynge of swete, to han-
 a body becometh saynte of to moche
 swete.

In the mornynge and at nyght rub-
 bed and washed with the same wa-
 ter, the tethe and gūmmes, streng-
 theth and cōfōrteth the tethe, and
 causeth the mouthe to haue a good
 odyor.

The mouthe washed with the
 same water, strengtheneth and fac-
 teth the fleshe, & maketh the face
 blyth & coloureth.

The same water mixed with
 myrrour, wylow, & dyest, the
 spen & pynceppall memberes, is good
 halfe an ounce of the same water, with
 halfe an ounce of wyne, and then
 mixed by resoluē. Thucis preparat
 ta a dragma, Alapaticum & Sagre
 candie, of the same, at lastly grynne
 of weight. In the same maner dothe also
 the hole water, blyth hym, take an
 ounce, with whiche sugre a dragma,
 and dreynd, & Sagre candies, puluise
 and dreynd, the same maner of the
 spen with his spyrte, and in the
 same maner is strenghtly also the
 syght.

Nota water of Roses is good
for all diseases of fayntnes / lyke as
I haue wyrtten of the wyld roses /
but where nedeth to slake hete & con
fortynge therto / shalbe vsed the wa
ter of the wyld roses. **I** It is al
so good for sore yren comynge of hete
whan it is put in the yren than it with
dryueth al grese of the yren / & if it be
so that the blode cometh downe fro
the hede in the yren / the lyddes of
the yren be swollen / & rede also than
a clout wet in thesame & layd vpon
the yren / with dryueth all grese & red
nes frome the yren.

Rozonke of thesame water
fashyng an ounce and a halfe / confort
eth the hede.

Thesame water is colde & drye
and letteth neuer no humours / nor
mofnes come to the yren / whan it
is put in the yren an houre before
nyght / and the yren enoynted rounde
about with thesame.

Thre ounces dronke of
thesame water and wyne myxed to
geder / taketh away the dasyngs of
the hede / and strengtheth the lyuer /
whan it is full of hete and stronge
stoppyng. **A** In the moynage
at none / and at nyght dronke of the
same water at eche tyme an ounce &
a halfe / is good agaynste the hede &
whete fyre.

Clouts or towes wet in thesame wa
ter and layd vpon the woundes / dy
on the nose stoppeth the bledynge of
the woundes and nose.

In the forsayd man
ner dronke of thesame water / with

dryueth the towe the fedmyng of
hote humours / and it is very good
also agaynste the hete of the arces or
febres.

Thesame water is good agaynste
the hete of the impostumacions /
whiche be hote of nature / for it is a
reperculum / cloutys or towes wet
in thesame and layd there vpon the
or four tymes in a daye / and it is
good also agaynste all sores comynge
frome hete.

Thesame water myxed with
wyne and so dronke of it two oun
ces / is very good agaynste the sto
mache / for it conforteth the stomake.

Thesame
water conforteth the harte / whan it
is enoynted therewith.

Water of tame whyte Roses.
Ca. **ccxxvi**

R *Ola alba* in latyn. Those
 whyte double roses shalbe dy
 stilled in balneo marie. **A** Twyle
 or thyrse in a day drōke of thesame/
 at eche tyme an ounce strengteth &
 conforteth & is good agaynst the faynt
 nes of the harte. **B** It streng
 theth the synewes & membres rub
 bed with thesame. **C** With the
 same water rubbed the fore hede the
 temples the eye lyddes & behynde
 on the necke & casteth and conforteth
 them that be faynt and it casteth the
 mowringe of the blode. **D**
 The same water is good for the that
 slepe nat easely when they be rub
 bed with the foresayd water on the for
 sayde places for it causeth easely to
 slepe or only the slepyng bayn rub
 bed therewith helpeth well also. **E**
 The same water luke warme put in
 the eye with a fayre linnen clowte/
 or the eye enoynted therewith after
 the bathe pulleth out the herte of the
 eye.
F water of the Egletyne roses.

Capitulo **cc. xxxviii.**

R *Ola bedagar* bet rosa hnd in
 latyn. **A** At none & at
 nyght drōke of thesame at eche tyme
 an ounce som days contynuyng is
 good for them that be colde of nature
 & whom the stomake is becom colde
 and is good for all fekenes comynge
 of colde to here as a body becometh
 faynte of he shall be enoynted ther
 with in the foresayd maner & drōnk
 thereof it wyll strengthe and conforte
 hem agayne. **B**
 Every day of the same water put in
 the eares. **iii. or. x. dayes** contynu
 yng is good agaynst deafnes.

Water of the budde of Roses.
Capitulo **cc. xxxviii.**

The same water may be dystyl
 led of what roses you please/
 but of the rede roses it is best. And
 there after the whyte roses. Then af
 ter the whyte roses and there after
 the Egletyn roses. The leues pluc
 ked from the budde and the pelow
 sedes within when they be gonne to
 become open & when the budde dy
 styll.

A four tymes in a daye
 dronke of the same water at eche tyme
 an ounce and a halfe stoppeth very
 well the laske without harme or hyn
 draunce / a pyncipally the rede laske
 comynge of hete / named discenteria
 in latyn / & the whyte laske / linteria.

Water of pryncy roses. Ca. cc. xxxix.

Ronia in latyn. The best part
 and tyme of his distyllacion /
 is the roses when they be ripe and
 fully well in theyr season. also the le
 ues of the roses frōme the steyls and
 myxed with somoch weyght of their
 rootes stamped and distypled.

A parson that hath fallen
 of the palsy that he hath lost his spe

che / he shall drynke of the same water
 an ounce / and it shall catose hym to
 speke agayn / & he shall become hole

B In the moynynge / and
 & at nyght dronke of the same water /
 at eche tyme an ounce and a halfe / is
 good for yonge chylidren agaynst the
 stone.

C Twyle
 in a daye dronke of the same water /
 at eche tyme an ounce is good agaynst
 the payne in the lymmes.

D In the moynynge and

 at eche tyme an ounce / or an ounce
 and a halfe. xxx. or xl. dayes conty
 nuyng / is good agaynst the falling
 sekenesse.

Water of flauce.

Ca. cc. l.

B Spa in latyn. The best tyme
 a part of the comon nauce

dystillacyon is in the ende of June/
the rote or naues chopped and been
ned or dystillid. **A** The
same water is good for members the
whiche sore be feken / therwith was
shed and rubbed and cloutes wet the
re in and layde ther vpon twyle or
thryse in a daye. **B** The
same is good agaynst brennyng whe
re so euer it be, of hote water / of fyre
of an hote yron / or of what maner of
brennyng it be / with the same was
shed there shall come vpon a scurf &
the scurf shall be washed with the
same water tyll it is hole.

(Water of Cherries Ca. cc. xli.

A Crasia or grana regis in la
tyn. The cherries that I wry
te of be the comē great cherries with
the shorthe stiles. The best tyme of they
re dystillacyon is whan they be full
rype / or they begynne to rotte or del
troie / than they shall be layd vpon a
sayre linnen clothe the space of a daye
or two / bycause that the watery reg
matyke moistenes may somewhat be
pulled oute and consumed / and ther
after brenned and dystillid.

A Twyle or thryse drō
ke of the same water in a daye prouo
keth the floures in women.

B In the forsayde ma
ner dronke of the same water / cau

seth the whyte lasker and the rede lasker
ke to be stopped. **C** Every
daye in the mornynge and at nyght
dronke of the same / at eche tyme an
ounce and a halfe / is good agaynst
the hete of the lyuer / and of the stomack
ke / & conforteth the harte.

(Water of blacke Cherries. Capitulū cc. xlii.

C Crasia nigra in latyn. Those
cherries be great & blacke /
but in some countreys be small blacke
cherries / & some hole pale / and some
be whyte on the one syde / & rede on
the other syde but of those is nothing
wryten in medecynes / but onely of
the great rede & the great blacke che
ries. The best part of the great blacke
cherries dystillacyon is / the most
blackest that may be gotten & dystillid.

R. li.

led in the same maner as it is done of the great rede cheryle. **A** Every day twyse dronke of the same water / at eche tyme an ounce / three or foure weekys cōtynuyng / is good agaynst the dropsy. **B** Twyse a day dronke of the same water / at eche tyme an ounce and a halfe / is good agaynst the fallynge of the membres and lamenes cōmynge of the passaye yf they be rubbed and wasshed therewith / and let drye agane by hymselfe.

And he that is enclyned of nature to the palsey / shall drynke every morninge fastynge an ounce of the same water. **C** In the forsayd maner dronke of the forsayd water / is good agaynst swellynge. **D**

In the morninge fastynge / and at nyght goynge to bedde dronke of the same water / at eche tyme an ounce & a halfe / stoppeth well the lask.

Water of storkes. Ca. cc. llii.

C Ironia bel Ibis in latyne / The yonge storkes shall be worowed / and plucked out of their feders / & cut and chopped in small peeces / and than byēned and distylled.

of the same water / and at eche tyme
an ounce and a halfe is good agaynſt
the colde lyuer.

Water of waltwoorte rote
Capitulo. cxxxi.

C Onsolida maior in latyn. In
twe.c.and.iij.chapptre I haue
wryten of the hote substaunce of the
walwozte/ here I wyl wryte of the
rote of walwozt. The best parte and
tyme of his dystyllacyon is, onely the
rote washed & chopped & brened or
dystilled in the myddest of the Maye
A Lynce wet in the same/ & layd in
freshe woundes/ healeth them. **B**

The same is good for cysttes in the
lyppes of the mouthe / often washed
therwith **C** The same water is nat
good to be dronke for a body onely
without mystryng/ for it is to stronge
in the helyng. A body which is cence
igall drynke it myxted with wyne/ at
eche tyme an ounce & a halfe **D** It
dronke in the mornynge at none & at
nyght at eche tyme an ounce & a halfe
& the medres ofte rubbed therwith &
cloutes wet therin layd thereon woth
dryeth the hote goute. **E** It wled
in the forsayd maner maketh the wyl
de fyre. **F** The same maketh swel
lyngs/ wher so euer it is/ cloutes wet
in the same/ twyse or thryse in a day &
layd thereon **G** Cotton wet in the
same & layd vpo freshe woundes stop
peth the bledynge of them In lyke wy
se it dothe whan it is dronke two or
thre tymes in a day/ at eche tyme an
ounce myxted with othe drynke **H**
In the mornynge at none & at nyght
dronke of the same / at eche tyme an
ounce and a halfe helpeth them very
well that haue broken a bone or leg
ge / and it be agayne set togyer for
to hele it **I**

In the forsayde maner dronke of the

same water / is a pryncypall medecy
ne whan a man is rente named cap
tuta in latyn/ and that he be wounde
with a bande thereto belonging.

C water of wylow leues.
Capitulum cc. lxxviii.

S alix salicis in latyn. The best
parte and tyme of his dystyllacyon is
the leues stroped of the whyte wylow
wes/ of the newe growen branches
which be of that same yere & first gro
wen/ brened or dystilled in the myd
dest of the Maye **A** In the mornynge
& at nyght dronke of the same / at eche
tyme two ounces / is good agaynst
the stone.

B Of the same water often dronke / and at eche tyme two ounces / or two ounces and a halfe / dryueth oute moche grauell / that is leue layenge on the botthom of the pot lyke landes. **C**

With the same water enorned the ypen / withdryueth the redenes of the ypen lyddes.

D The water byened of the leues of rede wylowes / is very good agaynst the wylde fyre.

E Dronke of the same rede wylowes water / two ounces / or two ounces and a halfe / in the mornynge / fastynge / is good agaynst the wormes in the bodye.

F Some tyme the sete washed with the same rede and whyte wylowes leues water in a daye / and at eche tyme an ounce and a halfe / than softeneth the hely / and cawleth it to be laratye.

G The water of wylowes leues / & specially of the yonge braunches of a yere olde / theyle dronke on a daye at eche tyme an ounce and a halfe is good agaynst the grauele or brekynge stone.

H The same water / pfit be dronke of thre tymes on a daye / at eche tyme two ounces cawleth one well to pisse.

I Rede wylowes and whyte wylowes water is very good for the heyling of the fistule / whan a lytell wyne is myxed with the waters / & therewith the fistula washed.

K Of the same water dronke an ounce or two ounces / dryueth out of a man and consumeth all euill moistenes

L the same water often putte in the ypen is good. **M** water of rede wylowes leues dronke two or three ounces / dryueth out the dede chyld from the moder.

Water of wylowes flowres.
Capitulum c. lxxviii.

A Lozes salicis i latyn. The best parte and tyme of his dryp / lacron is / lyke as I haue wryten of the flowres of apples / and of the peche flowres.

A The same water is good agaynst the gowte / clothes wet therin / and so layde there vpon / in the mornynge / at none and eke at nyght thre or foure dayes contynuing / tyll the payne be wasted. **B** The same water healeth the scaldnes of the hede / often washed therewith and let drye agayne by it selfe / and thus he must be done so often tyll it be hole.

C The same water cawleth sayte hetes to growe / yf they be often washed therewith / and a laye combe of a brushe wet in the same / and the hetes combed etet with / and let drye agayne by themselfe.

Water of henlocke. Ca. c. lxxix.

C *Scuta* in latyn / the best parte
and tyme of his distyllacyon
is / the herbes scraped from the stiles
& distylled in the myddest of the may

A *Thesau* is one of the coldest wa-
ters that may be founde / therfore it is
good agaynste the holy fyre / a clothe
wet therein and layd vpon the sore / it
wyl stike it **B** The same is good
for a mayden whose brestes wyl en-
crease to great / she shall enoynte her
brestes with the same / & a clothe wet
therein made luke warme & wapped
rounde aboute the brestes / than they
shal nat become so great **D** The
same is good for the hote droppe / clou-
tes wet therein and layd there vpon /
in the mornynge and at nyght **E**
The same is good agaynst the hote pa-
ralisis or palley . iiii. double clothes
wet therein and layde vpon the mem-
bres / but take hede that ye take nat

of the same both in the body / for it is
one of the maner of colde venym

F Halfe an ounce dronke of the sa-
me sa lunge lue warme / is good for
hym that hath swallowed a gnat / for
it dryueth the same out,

Water of woodwyne Ca. cc. lxxx.

A *Volubilis* in latyn. The best
parte and tyme of his distyl-
lacyon is / the herbe with the whyte
belles or flowres / whiche wynderth
hym rounde about the hedges / distyl-
led in the myddest of the May **A**
In the mornynge and at nyght dron-
ke of the same / at eche tyme an ounce
and a halfe / or two ounces / is good
agaynst dyslury or the droppe pylle.

Water of wood wyne flowres.
Capitulum cc. lxxxi.

F *Lores volubilis* in latin. The
best parte & tyme of the distyl-
lacyon is / the whyte belles or flou-
res onely distylled / whan they be ful-
ly ripe. **A** The same is good for
many & dyuers dysleases inward in
the body / therwith enoynted / & clo-
thes wet therein / and outward layde
theron. **B** In the mornynge and
at nyght dronke of the same / at eche ti-
me an ounce or an ounce and a halfe
is good agaynst the droppe pylle.

**Water of the herbe of gowles or
tuddes.** Cap. cc. lxxxi.

S *Scilla maritima* Solsequi
 un in latyn. The best parte
 and tyme of his distyllacyon is / the
 herbe & rote chopped togyder / and dy
 styllled in the myddelst of the Maye
A In the mornynge at none and at
 nyght / dronke of the same water at
 eche tyme an ounce / and the drynke
 myxed therewith withdreweth the he
 te of the stomacke **B** In the for
 sayde maner dronke of the same wa
 ter / and cloutes wet ther in and layd
 outwarde on the harte / conforteth
 the harte and stomake **C** It is al
 so good agaynst the hete of the lyuer /
 towe or hempe wet in the same water
 and layde outwarde thereon / thre ty
 mes in a daye **D** Dronke of the
 same water / at eche tyme an ounce or
 an ounce and a halfe / is good for the
 pestilence / for it desedyth and preser
 ueth a body of the same **E** The sam

is good agaynst the lytell small blac
 ke blaynes / dronke of the same in the
 forsayd maner / as I haue lerned of
 the pestylence / and his drynke myxed
 therewith / and a cloute of hempe or
 towe wet therein and layd on the sma
 le blacke blaynes / at euery fyr how
 res ones in the day and at nyght.

F It bled in the forsayd maner sta
 keth the wyld fyre **G** The same
 is good for the longues / whā the wyl
 growe or is growen in the throte / of
 ten dronke of the same / at eche tyme
 an ounce and a halfe. **H** In the
 mornynge / at none / and at nyght drō
 ke of the same water at eche tyme an
 ounce and a halfe / conforteth the har
 te of a man. **I** In the morn
 yng / at none and at night / stoppeth

the bloody fluxe / dysenteria / whā of
 the same is dronke at eche tyme two
 ounces **K** The same water
 gorgwooled and dronke / is good for
 the spene in the trothe **L** The sa
 me water is good for the longues which
 wyll / or is growen in the throte offē
 dronke / at eche tyme an ounce and a
 halfe **M** In the mornynge

at none / and at nyght dronke of the
 same water / at eche tyme an ounce &
 a halfe / openeth the stoppyng of the ly
 uer **N** The same wa
 ter is good agaynst the consumynge
 membres / in the mornynge and at
 nyght washed therewith / and lette
 drye agayne by hym selfe / thre or fou
 re weekes contynynge or longer.

O The same water is
 colde and drye / and is good agaynst
 the byrnyng of venymous bestes / drō

ke therof agaynſt their bytters and in
the mornynge and at nyght with wet
clothes layd thereon ¶ In the mor-
nynge at none and at nyght drinke
of the ſame / at eche tyme an ounce and
a halfe / is good agaynſt ſtoppynge of
the myle.

¶ water of Cyroea ſlowres.
Capitalum cr. lxxiii.

¶ Ionisia in latyn. The best ty-
me of his dystyllacyon is / as
sone as they be open dystylle them

A Of the same water an howze be
fore night put in the yren / is good for
the impostumynge in the yren

B In the forsayd maner put in the yren
cawseth the yren to be fayne and clere

C The same water is good agaynſt
the webbe skynne and spottys

D The same water is good in the yren
and agaynſt more other dysleases of

the yren / whan it is put often in the
yren an howze before the nyght / and

enoynted therewith rounde aboute.

E Often drinke of the same wa-
ter / at eche tyme an ounce / with dry-

uth the here of the liuer / and cloutes
wet ther in layde thereon outwarde.

¶ water of Capſus barbatuſ.

¶ Apſus barbatuſ in latyn.
And they be of two maner /
tame and wyld / but I wyll wyte

of the male of the tame with the yelo-

wre ſlowres. The best pte & tyme of
his dystyllacyon is / the leues & ſlow-

res ſtoped from the ſteles / whā they
be fully ripe / and than dystylled

A The same water is the moſte genty-
lyest water for al ſwellyngeſ in war-

de & outwarde / in the mornynge / & at
nyght drinke of the same / at eche tyme

an ounce & a halfe / or two ounces / &
a dowble clowte wet therin & layde

ther vpon / whan the swelling is out-
warde

B The same is good
whā a body hath a face lyke wyſe as

if he were leprous / but he is nat / a
whyte linnen clowte wet therin and

layd ther vpon / & whan the cloute is
dye wet it agayn / than the face becometh fayne

C In the mornynge at
none & at nyght drinke of the same /

at eche tyme an ounce and a halfe / is
good for hym whome the longue is

growen or wyll growe in the throte

U. i.

D In the morngge and at nyght dronke of the same water / at the tyme an ounce and a halfe / is very good for the hote goute **E**

It is a well proued water agaynste the euill brennyng / as whan a boy bath brennyd hym / than quickly he shall take a cloth two double / and layd there vpon wet in the same / and as lone as the linnen clothe begynneth to drye than wete it agayne / & ble it so often tyll it be hole **F**

The same water is good agaynste the bityng scabbes / clothes wet therein and layde there vpon in the morngge / at none and at nyght.

G It is good also for the soze named the shoyne / were by accident com to the scabbednes / a clothe wet therein and layd there vpon / but whā the clothe is drye it must be wet agayne and euery tyme the clothe shalbe som what wronge out agayne **H**

The same water is good for them that haue had longe connyng or teryng yven / a drope or two put in the yven / two or thre weekes contynuyng than they becom hole **I** Thre tymes in a day dronke of the same water / at eche tyme an ounce and a halfe / is good agaynste all diseases cominge of flodes / how so euer they be **K**

Thrye dronke of the same water betwene the daye and the night / is good agaynste all shynking in the bely.

Water of swynes grasse or knot grasse. Capitulo. cc. lxxv

C Entū nodia in latyne / The best parte and tyme of hys distyllacyon is / the herbe and roote with all his substance / chopped and distyllled in the myddest of the mare.

A In the morngge / at none and at nyght / dronke of the same water / stoppeth the ouer great laske

B Clothes wet in the same water / and layd vpon the wyld fyre / healeth it.

C The same water is good for them that getteth the arces with hete / dronke for the same / and outwarde rubbed therewith

D The same wat is good agaynste all paynes in the woundes / and other accidentes cominge therto The woundes wasshed with the same with clothes wet therein / and so layd there vpon / it is very good and cawseth helynge

E The same water luke warme put in the eares / is good ayest the dysleaks in the eys

F The same water cleareth the
raynes of the graue & conducteth the
wyte & openeth the stopping of the
same membes & causeth the wyte to
go throughe the wayes of the wyte
for the rote is diuretica that is moche
better so the same dysleaseth than o
the waters. **S** Of the same dyon
ke of a thelde an ounce / of a myddell
aged bodye an ounce & a halfe / of an
aged body. ii. ounces is good agayn
ste the woynes in the bely. **S** The
same is good agaynste the yll goynnes
often washed therewith. **I** Ther
oz threyle in a day dyonke of the same
at eche tyme an ounce & a halfe is ve
ry good agaynste the blacke blaynes
and clothes wet therin and outwar
de layd ther vpon. **S** It is a pyn
cypall water for to slake all hete / a
clowte or towne wet therein and tye
or thre dayes layd ther vpon tyl it be
hole.

Cwater of Salomons seale.
Capitulum. cclxxvi.

S Agallum Salomonis in latin
The best parte and tyme of
his dystyllacyn is onely the rote chop
ped in the ende of the Maye.

S The same water is
good agaynste the congeled blode whi
che layth vnder the sayn clothes wet
therin and layd ther vpon and dron
ke also. **S** In the mor
nyng and at nyght dronke of the sa

me water at eche tyme an ounce and
a halfe and the drinke myxed ther
with is good agaynste the graue in
the lymmes. **S** It cau
seth a fayer face / often washed ther
with and let hys agaynste by hym sel
fe. And it withdryueth also the spot
tys and malys in the face / and on o
ther places of the body washed with
the same water thre or foure times
continuyng & at lesse two tymes in
a day. **S** The same wa

ter withdryueth the colome of the fa
ce / often washed therewith and lette
dye agayn by hym selfe. **C**

the same water withdryueth the m
der. **S** Thre or foure tymes
in a day dronke of the same water at
eche tyme an ounce / is good agaynste
inwarde impostumes.

Cwater of wilde sage Ca. cc. lxxxvii

S Aluisa agrestis in latin. The
best parte and tyme of his dy
styllacyn is the leues shored frome
the steles chopped and distilled in the
myddest of the Maye. **S** Thre ty
mes in a day dronke of the same wa
ter at eche tyme two ounces / is good
agaynste the styches about the harte
comig of bnclede blode. **S** It is
for good him that is fallē, wounded or
styched and hath bleded inwarde / &
hath cōgeled blode within / it causeth
departyng of the one blode frome an
other & dryueth it out of the body.

U.ii.

It is good to be dronke for them
that haue had the palley / whan they
drynke of it / an ounce. or an ounce &
a halfe / thre or foure times in a weke
than they be sure that they shall haue
no more the fall of the palley.

Water of Nicotia Ca. lxxviii.

Nicola in latyn. The best par-
te & tyme of his dystyllacion
is the herbe / stalle and rote of the ma-
le / dystilled i the myddest of the Ma-
ye **I**n the mornynge at none &
at nyght dronke of the same / at eche ty-
me an ounce / is good for freshe wou-
des at eche tyme the woundes washed
therwith & cloutes wet therein & layd
ther vpon **T**hesame is good for ol-
de sores / in the mornynge / at none &
at nyght washed therwith.

Water of peres Ca. cclxxix.

Pera siluestris in latyn. The
best tyme of theyr dystyllacion is
in the fyrst moneth of the beuest / or
they begynne to be softe / Raped & dis-
tylled **I**n the mornig & at nyght
dronke of the same / at eche tyme .ii.
ouces / or .ii. ouces & a halfe / stoppeth
all maner of lakke **T**hesame is
good whan a maydens or womans
brestes become to weyken groweth
great. Than cloutes shall be wet in
thesame / & layd thereon twyle or thre
le a day / than they abyde the smaller
and become harde.

Water of Clarey Ca. c.

Agrastia agreste vel siluestre
in latin. Ther is also tame cla-
rey / & it shall be dystilled in the myd-
dest of the may for it is the best & nat-
the wilde **I**n water of clarey cōfor-
teth the hede / therwith enoynted **T**
hesame slabeth the payn of the bely
of the stomake & of the sydes / dronke of
thesame / and outwarde cloutes wet
in thesame water & layd ther vpon.

Thesame water shaketh maruay
lously the payn of the moder/ and pre
pareth for to receiue the same/ dronke
of the same twyse in a daye/ at eche ty
an ounce **D** Two or thre ty
mes in a daye dronke of the same wa
ter/ at eche tyme an ounce and a hal
fe/ and outwarde layd on the moder/
conforteth and rectifyeth the moder/
whan the members of the moder ben
dyleased with colde maters.

Water of Sula, Ca.

cc. xxi.

Sula in latyn, the best parte
of his distyllacyō is the herbe
the steeles & the rote with all his sub
stance/ Of the great Sula named in
latyn Sula maior distyllid in the be
gynnyng of the prime tyme.

Thesame water is good for the
wraungayles/ whan they be sore/
what cut/ thre or foure tymes a daye

wasshed therewith/ and clothes better
therin/ and wrapped theron/ but the
same water shall nat only be dronke
without other thynges/ nor putte in
the yren.

Water of whyte Lylles, Ca. cxvii.

Lilum in latyn/ The best co
uenient parte and tyme of
their distyllacions/ is whan they be
in their full season/ only the whyte le
ues plucked from the flowres and is
distyllid in the ende of June/

In houre before the nyght
put in the yren/ and rownde aboute
enoynted therewith after that a body
hathe bene in the bathe/ pulleth out
the rednes and hete of the yren/ that
they become cleene and gete none un
poysonyng **B** with this
water the handes and the face was
shed twyse on a daye/ caueth therein
to be cleere/ cleene/ whyte and fayre/

In the mornynge and at
nyght dronke of the same water at e
che tyme an ounce & a halfe/ is good
agaynst fayntnes of a body

In the forsayd maner ordred is good
whan a body hathe hete aboute the
harte

Dronke of it in the
for sayd maner/ is good agaynste the
hete of the lyuer

In the
mornynge & at nyght dronke of the
same water/ at eche tyme an ounce &
a halfe/ or two ounces contynnyng
viii. or i. dayes/ is good for the that
haue euill moordours within them/ &
be narrow on the bryll/ as yf they had

U. iii.

a bade about the hyst & about the har
 te **E** It drōke twise in a day at eche
 tyme an ounce & a halfe. vi. oz. viii. Da
 yes cōtynuyng/ is good for womē who
 the moder caueth wo/ wherof it may
 come **I** In the forlaid maner drō
 ke of the same/ is good for ipostumyn
 ge of the lōgues **I** In the mornynge
 at none & at nyght drōke of the same/
 is good for hym that hath lost his spe
 che/ for it recouereth agayn **I** It
 drōke in the mornynge & at nyght/ at
 eche tyme an ounce & a halfe. xxi. oz. xl.
 dayes cōtynuyng/ & drynke as lytel
 as is possyble/ is good for drypse **A**
 Gyn to drynke of the same to a wey
 ke & feble womā an ounce & a halfe/ &
 ii. ounces & a half or. iii. ounces to a stro
 ge womā/ is good for womē labourin
 ge of childe/ for to be the soner deliue
 red/ bycause it openeth the woman &
 helpeth her softly without harme **I**
 In the mornynge & at nyght drōke of
 the same/ at eche tyme an ounce & a hal
 fe/ & the hede enoynted therwith. v.
 or. vi. dayes cōtynuyng/ is good for
 hym that hath a great flode in the he
 de **A** Twyse a day drōke of the sa
 me/ at eche tyme an ounce & a halfe/ is
 good agaynst ipostumynge & all vn
 clenenes of the body **I** Of the same
 drōke a lōge tyme durynge euery day
 an ounce & the body outward wasshed
 therwith/ is good for the flode of the
 lepre **I** A quarter of a mesure of
 the same put in a vessell/ of. vi. barles
 of troubled wyne/ caueth it to be cle
 ne & clere **I** Two or thre tymes
 in a daye wasshed the comforyn in the
 face & let drye agayn by hym selfe. iii

or foure wekes cōtynuyng/ withdrōke
 the same dyskeas **I** Twyse a day
 drōke of the same/ at eche tyme an ou
 ce. xxi. or. xl. dayes cōtynuyng/ is su
 rely good agaynst the stone **S** A
 small clothe wet in the same & twyse
 in a day put in the secreete of womē/
 & at eche tyme dronke an ounce/ cau
 leth the harde moder to become tēpe
 rate **T** In the mornynge fastynge
 dronke of the same an ounce & a halfe
 or two ounces myxed with a lytell
 rose water/ is good for womē of whome
 the moder is dyskeased/ with such
 an ipostumynge/ that the mater cō
 neth out thurgh her secreete/ & it with
 dryueth all vnclenelle of the moder/
 whiche is inwarde in her. **I** It
 dronke myxed with rose water/ is
 good to be dronke of a woman that
 hath payne about the nauyil/ it was
 teth the payne **I** In the mornynge
 & at nyght dronke of the same at eche
 tyme. ii. ounces/ dryueth out the dede
 chylde frome the moder **I**

The same water withdryueth the
 spottys in the face/ whan it is often
 wasshed and rubbed therwith/ and
 let drye agayne by hym selfe

3 The same water is
 warme of nature/ and drye also/ and
 temperate and clenysynge/ therfore it
 is good agaynst Impetigines/ whan
 it is myxed with hony/ and therwith
 it enoynted/ in the mornynge/ at no
 ne/ and at nyght.

4 The same wat healeth the
 blymping of the eyre/ in the mornynge
 & at nyght washt therwith/ & clouten
 wet therin & layd thereon **WS**

Thesame water is good agaynst the
 venymous bytes of bestes / in the mor
 nyng & at nyght washed therewith
 as before is sayd. **C** A womā
 that is enclyned to moche to lechery
 shall drynke an ounce of this wat. &
 it wyl mynysh it. **D** Twyse
 a day dronke of thesame water at e
 che tyme an ounce / prouoketh flowres
 in women. **E** A woman that
 hath tomoche oꝝ to some hcr flowres
 shall take a small linnen cloth wet in
 thesame water / & put in her secrets
 than it wyl come medyately at demer
 season. **F** The face often wal
 shed with thesame water / geueth it a
 good colour & wythdryeth the frey
 ces.

Water of whyte lilly notes
 Capitulo. cc. lxxii.

A Spe lilioru albatu in latyne
A This wat is good wher
 as a wounde is hote and yll dyspoled
 washed therewith & clothes wet ther
 in and layde there vpon / in the morn
 nyng and at nyght / it coleteth the
 and it healeth them / and is more pre
 cious than golde. **B** The face
 often washed with thesame water
 and let it drye agayne by heyn selle
 wythdryeth the freunces in the face.

C Thesame water healeth
 all maner of blaynes in the mouthe
 yf they be often washed therewith.

D Honey mixed with thesam
 water / and therewith the mouth was
 shed / it healeth the stynges sores with
 in thesame.

E Thesame wa
 ter healeth the rottyng sowle gomes
 yf thesame water be often holden in
 the mouth.

F This water
 healeth the bytte of the snake / In the
 mornyng and at nyght dronke of the
 same at eche tyme an ounce / & clothes
 wet therein & layde therupon.

It purifyeth & cleneth the eyes
 an houre before nyght put therein.

Water of the leues and the roote of
 whyte Lylles. Ca. cc. lxxiii

Holia & radex lilioru alborum
 The leues and the rote of the
 whyte lylles of eche a lyke moche / chop
 ped togeder and dyspylled / in the try
 me that the berbe becometh flowres.

A The face washed with
 thesame water / & let drye agayns by
 hyndse cleneth the moche i the face.

D The same healeth the brennyng troy
 is a day washed therewith / & at eche
 tyme a clout wet ther in layd thereon

 & a cloute wet therin layd thereon **F**
 Cotton wet in the same & layd wel vpon
 a wounde / stoppeth the bledynge of a
 wounde **G** It purifyeth & cleseth the
 secretes of women / often washed ther
 with **I** The same healeth & dryeth
 the woundes / & wasteth the matter
 which is to much / twyle in a daye wal
 shed therewith / & a cloute wet therin
 & layd ther vpon

Water of mayde here. Ca. cc. xlv.

A Pilli veneris in laryn / The
 best pte & tyme of his distylla
 cyō is / the hole substance chopped &
 distyllled in the myddest of the Maye
A The same water is indynged to a

lytel dynes & is temperat / it helpeth
 loze in Alopecia / that is a baldnes of
 the hede / that the heres fall out / it cau
 leth the heres to holde / & is good for
 the kynelles of the hede / whā therof
 is drōnke two or thre tymes in a day
 at eche tyme an ounce and a halfe

B In the forsayd maner drōnke of
 it / cleseth the brest & lognes from the
 grosse syme moystenes **C** Drōnke
 of the same twyle in a day / at eche ty
 me an ounce & a halfe. xxx. or. xl. dayes
 con tynuyng / healeth the stone.

D Twyle in a day drōnke of the same / at
 eche tyme an ounce & a halfe / is good
 agaynst the yelowe jaundys and wō
 in the mylke **E** It cleseth the stoma
 ke & guttes of the ouerliche coleryke
 humours drōnke ther of **F** It drōnke
 is good agaynst dyslury **G** It with
 dryueth scrophulas with cloutes wet
 ther in &. ii. in a day layd ther vpon.
Water of gonyper betyes Ca. cc. xvi.

A mi fructus bel bacce Junipe
 ri / vel granū Juniperi. The
 best tyme of his distyllacyō is / i the

beginnyng of the fyrst moneth of har-
uest the blacke berries whiche be wel
cure broken and styllid

In the morninge / at none & nyght /
dronke of the same water at eche tyme
an ounce / is good agaynst the grauell
in the lymmes and in the bladder / &
causeth the bryne to come out & wel
to pisse

It is good for all
dysces in the membres comynge of
colde / in the morninge / at none and
at nyght rubbed therewith / and let it
drye agayne by hymselfe

The
water causeth moche subtylne / & it
openeth & clenseth the vncient impo-
tumes / washed therewith

It is good for all
dysces in the membres comynge of
colde / in the morninge / at none and
at nyght rubbed therewith / and let it
drye agayne by hymselfe

It is good agaynst the venym
bytten of the bestys.

Water of matrisilua. Ca. cxxviii.

Matrisilua / bel herba stellaris The
best parte & tyme of his distillation is
the herbe / the stele / the rote with all
his substance / whiche groweth in
the felde / chopped & distyllid in the
ende of the Maye

water dronke a longe tyme / in the
morning and at nyght / at eche tyme
an ounce and a halfe / is good agaynst
a rottige body or whiche wyll corse /
causynge of ouer moche wo / ke of seche
cure / other wyse

Water of wyld saffran.

Capitulum

cc. xlviii.

Rocus oz tularius in latyn.

The best parte and tyme of
his distillation is / the leues stroped
froime the steles / and distyllid in the
ende of the Maye.

The same water slaketh the wyld fy-
re named ignis perlicus clowtes. iii.
or foure folde thyeke wet in the same
water and layd thereon thye or foure
tymes in a daye.

Water of the rotes of peletier.

Capitulum

cc. xcij.

R *Adix Elebori nigri* / The best parte and tyme of his distyllacyon is only the rotes chopped and distyllled in august
A draguna of the same water myxed with an ounce of wyne & drōk at thre of the clocke in the mornynge / & fast thetupon tyll it be ix. of the clocke it clenseth the melancolye and cawseth to be laxatyf.

Water of the herbe of peletet
 Capitulo. ccc.

Herba elebori nigri / The best parte and tyme of his distyllacyon is the herbe chopped and distyllled in the myddest of maye

The same water stoppeth the lakke yf it be dronke / and it is good agaynst many dysces / and for to kepe the body in helthe / euery day a halfe an ounce dronke of the same / for I haue seene a man at Strasborowe whiche was a hondred and thyrty yere olde

whiche had euery day without bypon his hande the powder of the same herbe / the quantyte of an haseell nutte / & lycked therof / and he abode in good helthe vnto the tyme of his naturall endynge of lyfe.

Water of Asara alba Ca. ccc.

Asara alba / vel Asa dulcis in latyn / The best parte and tyme of his distyllacyon is onely the rotes stamped in peces and distyllled betwene bothe the saynt mary dayes

A In the mornynge & at nyght / and at nyght / dronke of the same water at eche tyme an ounce and an halfe / or two ounces / is very good agaynst al diseales of the brest / it largeth the brest and color teth it

same membris / in the mornyng and
at nyght washed therwith **F**

Twyle in a daye dronke of the same
water / at eche tyme an ounce and a
halfe / healeth the goute the whiche is
frullged.

Water of Viticella. Ca. **ccc. h.**

Viticella / bel vitis alba in
latyn / The best parte and
tyme of his distyllacion / is the rote
chopped / and brenned or distyllled in
the ende of the maye **A**

The fete rubbed with the same wa-
ter is good agaynst the goute in the lere
named podagra **B**

In the
mornyng fastyng dronke of the sa-
me water / at eche tyme an ounce is
good for the yll stomake and clemently
the same **C**

In the mornyng
fastyng dronke of the same water /
at foure of the clocke / and faste vpon
that tyl it be ix. of the clocke is good
and caueth to be laratye **D**

The same water slaketh the ho-
ly fyre / named ignis perlicus / thre or
foure folde of clothe wet therin / and
layde therupon **E**

with
the same water often the face washed
withdriuech the rede ppymples & mas-
ses and spottes in the face **F**

It is good agaynst the colom in
the face or in othe places / washed
with the same water and let drye a-
gayne by hymselfe **G**

The
same water is good agaynst the rede
leprous face / often washed therwith
and let drye agayne by hym selfe.

H Thre or foure tymes
dronke of the same water / at eche ty-
me two ounces / caueth wel to digest
the meat / and waiteth the flegma in
the throte / whan the throte is out-
wardly rubbed therwith. **I**

The same water is good a-
gaynst swellynge / and agaynst para-
lisis / clothes wet therin / and layde
there vpon.

A layre addicjon of an other
mayster of the vertue of aqua
bite which is made of wy
ne / or of feces of wyne.

Will you take a prouf of
the aqua bite be good
and ryghtfull / tha wet
a small linnen clothe
and holde it in the fla-
me of a candell / and than yf the wa-
ter byenneth of the linnen clothe / than
it is good / but yf it byenneth nat of
than it is nat good nor ryghtfull / &
it is of lytell vertue. **C**f icthe or
fyllthe soden in the same water can
longe endure without synnyng and
destroynge. **A**ny thyng that
is wette and layd somwhat in the sa-
me aqua bite / the wynges wil nat ro-
me in it.

Here begynneth the vertues of
aqua bite.

Aqua bite is comunly cal-
led the mall rulle of al me-
dreyne / for it chalethe the
dysleas comynge of col-
de . It gyueth alio yonge
sozage in a petson and causethe hym
to haue a good memoire and remyn-
braunce . It purgeth the fyue wy-
tes of melancolye and of all badenes
whan it is dronke by reason and me-
sure . That is to vnderstande fyue or
syr dropes in the mornynge fastyn-
g with a sponfull of wyne / byn-
ge the same in the maner afozsayde the cruel
humours can not hurt the body / for
it withdrueth them oute of the vays-
nes . **I**t conforteth the harte
and causeth a body to be mery . **I**t
heleth all olde and newe sores on the
hede comynge of colde / whan the he-
de is enoynted therewith and a lytell
of the same water holden in the mou-
the / and dronke of the same . **I**t
causethe a good colour in a patson .

¶ Tobast it is Dyonke and the hede e:
 noughted therewith the space of .xx. da
 yes/ it heleth Alopecia/ or whan it is
 Dyonke fastyng with a lytell tryacle.
 It causeth the here well to growe/ &
 heleth the lyce and flees. **¶** It cu
 reth the Rheuma of the hede/ whan the
 temples and the fore hede therewith
 be rubbed/ and a sponse full taken in
 the mouth. **¶** It cureth Aitar
 gain/ and all yll humours of the he
 de. **¶** It heleth the colome in the
 face/ & all maner of pynples. It
 heleth the fistule whan it is put there
 in with the Juice of Celendyne.
¶ Cotton wet in the same / & a lytell
 wonged out agayn/ & so put in the ea
 res at nyght goynge to bedde/ and a
 lytell Dyonke therof/ is good agaynst
 all defies. **¶** It easeh the payn
 in the tethe/ whan it is a longe tyme
 holden in the mouthe/ it causeth a swe
 te brythe/ & heleth the rottyng tethe.
¶ It heleth the canker in the mouthe
 in the tethe/ in the lippes/ and in the
 tongne/ whā it is longe time holdē in
 the mouthe. **¶** It cawleth the heuy
 tōgue to become light/ & wel spekyng
¶ It heleth the shoyte brythe whan it
 is Dyonke with wat wher as the figes
 be soden in/ & banysyth al flewmes
¶ It causeth good dygestyng and ap
 petyte for to eat/ & taketh awaye the
 bolkyng. **¶** It dryueh the wyndes
 out of the body/ and is good agaynst
 the euyl stomake **¶** It easeh the fayn
 tenes of the harte/ the payn of the mil
 te/ the pelowe Jandis/ the dyoply/ the
 yll lymmes/ the goute in the handys
 and in the fete/ the payne in the brel

tes whan they be swollen/ & heleth al
 dysleasies in the bladder/ and bryeth
 the stone. **¶** It withdyteth venym
 that hath be take in meat or in Dyonke
 whā a lytell tryacle is put therto.
¶ It heleth the flantres and all dys
 seases comig of colde. **¶** It heleth the
 bryennyng of the body/ & of al meynes
 whan it is rubbed therewith by the ty
 re. viii. dayes contynuyng. **¶** It is
 good to be Dyonke agaynst the loosyn
 dede. **¶** It heleth all scabbes of the bo
 dy/ & all colde swellng/ enoynted or
 washed therewith & also lytell therof
 Dyonke. **¶** It heleth all thronke lyne
 ues & causeth them to become soite &
 right. **¶** It heleth the feyres tertiana
 and quartana/ whan it is Dyonke an
 hōwe beforē/ or the feyres becometh
 on a body. **¶** It heleth the venymous
 bytes/ and also of a mad dogge/ whā
 they be washed therewith **¶** It heleth
 also all styngyng woundes whā they
 be washed therewith.

¶ Aqua bite compolita.

¶ The same water is made some
 tyme of wyne with lypres one
 ly. Somtyme with wyne/ and rootes
 of the herbes/ somtyme with the her
 bes/ somtyme with the rootes and her
 bes toggyder/ so; at all tymes there;
 to must be stronge wyne withoute s
 res.

¶ If ye wyll make Aqua vite compolita with spices, this shall ye take nutmeggis cloves, graynes, gynger, of eche lyke moche powdered. This shall be put all in wyne and abyde therin a day and a nyght than ye shall pore the wyne out / and dystyll it with an helme / as the water of coles must be dystilled. ¶ The same water bled is good for the braynes. ¶ The same water is good for litargia / that is an impostume swarthyde behynde in the hede / and a bodye that is so forgetfull that he knoweth nat what he dothe / and hath losse some tyme his wyttes / and some tyme fallynge & slepeth much / it shall be holpe whan the same water with venegre and rue is layd behynde on the hede. ¶ It healeth the paralisis of the tongue. ¶ It healeth the pores in the face whan it is myxed with

quyre syluer and swynes grese.

¶ It healeth skaldnes of the hede / offe washed therewith.

¶ The same water myxed with venegre is good agaynst the pynples in the face.

The same water myxed with lye honey / and flowres of barley / purifyeth all vncleannes of the skynne of a patient of a parson.

¶ It healeth the impostumes of the longues / whan it is myxed with scabyole.

¶ The same water stoppeth the laske / and is good agaynst stranguy / and agaynst the al herte of the bladder.

¶ The same water myxed with plantayne / prouoketh the flowres in women.

¶ The same water myxed with reysyns and pouder of cornyn / healeth the dysscales and swellinges of the codys.

¶ The same water myxed with the iuce of posuim or leue healeth the bites of snakes.

¶ It healeth the godote or paralisis in the legges.

¶ It healeth all colde woundes / & all maner of arces or febles comynge of colde / and it caweth the wyne to be good. The same water shall nat be bled alone / but with other meat and drynke.

A p[re]cious water for Lep[ro]sy,

The flyng of y[er]o/ of copper/ of tynne/ of lede/ of latton/ of golde/ & of syluer/ of eche lyke moche: all these thynges shall be layd a daye and at nyght / in watme bryne of a chyldre that is yet a mayde/ thā a daye and a nyght in whyte wyne/ thā laye it a day & a nyght in the uice of fenel than a day and a nyght in the whyte of an egge/ than lay it a day & a night in womans mylke/ that sucketh a mā chyldre/ than a day & a nyght in rede wyne. Thā a day and a nyght in the whyte of. vii. egges/ Than myrc all these substaunces that the sayd flyngys haue layde in togyder/ and put it in to the vessell that ye will dystille in/ and do that with softe fyre. And thesame that cometh out of your flylatorye ye shall kepe in a syluer vessell for this water clenseth and healeth al

maner of lepp[ro]sy/ natural & onnatural and it purgeth all vncleines of the body hath be well p[ro]oued/ but I the- we nat all the vertues of this water for he that knowe al his vertues wol de be to p[ro]uide,

Some flow[er]e water,

This water is good to be dronke of them that haue the dropsey or consume/ or drye a way/ and it breketh the grauell/ It is good to be drynke against the thyrst/ for who so drynke in the mornynge. ii. or. iii. ounces is p[re]serued frome the thyrst all that daye.

Damasce water and oyle.

The Lauender with the flow[er]e/ rosemary/ tyme/ cypres/ or lauender cotton/ bay leues/ browne holy/ margeroin/ our lady bedstraw with the flow[er]es/ and walnut leues

A y[ou]ng f[or]est nat

*bidus goly a gulyt golyng
in the f[or]est*

abouts all oyles / and he that letteth
one droppe fall on his hande / it wyl
perce thurgh / it is wonderfull good
excellynge many other souerayns oyls
les to dryuers dyficalis,

Water of plata leonis / or pedelyon
f. ped. leonis pedelyon

of eche an handfull. These herbes shal
be stamped all togyder in a mortar &
than putte it in a cleane vessell and do
herto a pynte of Rose water / and a
quarte of comney / and than stoppe it
close & let it stande so. iij. or. iiii. dayes
whan ye haue so done put all this to
gyder in a stillatory and distyll wa-
ter of the same / than take your distyl-
led water and pore it vpo the herbes
agayne in to the stillatory & strew
vpon it these powders folowynge.

Clifford cloues / a cynamom / of eche
an halfe ounce / Orpous an ounce / &
a few maces / nutmeggs halfe an ou-
nce / a lytell saffran / muscus / spicanar-
di / ambrce / and some put campher in
it / bycause the materpals be so hote /
Stere all the same well togyder and
distyll it cleane offyll it come fat lyke
oyle / than set awaye your water and
let it be wel kepte. After that make a
stronge fyre and distyll oyle of it and
receyue it in a fyale / this oyle smelleth

Ducke or gader planta leonis
before the sonne vpryng / &
stampe that and distyll it / who so
drynketh of the same water inconty-
nent he shal haue lust to the worke of
generacyon / It is very good for the
that consume / or waie drye within
the breste or lacketh nature / soo that
they waste it nat in vayne. It is also
good for the yren / the stomake / the lvs
uer / the mylte / the raynes & the blad-
der. And it is good for olde folke and
for them that haue taken colde,
